**The challenge:**

**60%** of ecosystems are now damaged or being used unsustainably

**3° C or more** rise in temperature by the end of the century, due to doubling of GHG emissions by 2050, under BAU.

**140 billion tonnes** of global extraction of natural resources per year if consumption stays at current rates

**2 to 3 billion** additional middle class consumers by 2030

**What is SCP?**

**Sustainable Consumption and Production (SCP) is about "the use of services and related products, which respond to basic needs and bring a better quality of life while minimizing the use of natural resources and toxic materials as well as the emissions of waste and pollutants over the life cycle of the service or product so as not to jeopardize the needs of further generations".**  
(Oslo symposium, 1994)

*SCP should not focus only on promoting green consumption, but has to take into account justice and equity aspects.*

**ANPED** Green Growth or post Growth ?  
NORTHERN ALLIANCE for SUSTAINABILITY

Unlimited growth  
destroys  
limited systems

!!!!  
The Rio outcome promotes: **Sustained Growth** – which is incompatible with Sustainable Development and/or SCP, thus the 10YFP  
!!!!

## 10YFP Programmes

Programmes will serve as “umbrellas” that bring together existing and/or develop new initiatives and partnerships to fill capacity and knowledge needs and “gaps”.

They will build synergies and cooperation between stakeholders, and allow scaling up and replication of policies, voluntary measures, management practices, and partnerships promoting the shift to SCP patterns,

They will use a mix of policies and engage all stakeholders: governments, business, consumers and other major groups.

Programmes are expected to deliver capacity building and technical support as necessary/requested at all levels: regional, sub-regional, national and local.

STOP THE RAT RACE

'RAT RACE'

where the poor have cars. It's where  
the rich use public transportation."
