Head of Branch
UNEP Chemicals Branch DTIE
11-13, chenin des Anémones
CH-1219 Châtelaine – Geneva, Switzerland

Dear Sir or Madam,

Our company supports the UNEP Global Mercury Partnership and would like to become a Partner in this collaborative organization. We believe that now is a critical time for mercury measurement and control technologies to be disseminated world-wide, because of the finalization of the Minamata Convention.

ADA-ES, Inc., an Advanced Emissions Solutions, Inc. company, was founded in 1996 to provide emissions control solutions for the coal-fired utility and industrial boiler sectors in North America. Since then, ADA has established one of the most highly recognized teams of industry experts, especially in mercury control. For two decades, ADA has conducted more than 100 mercury control demonstrations at coal-fired boilers in North America and sold 140 activated carbon injection systems for mercury control. Our portfolio of products has grown to address limitations in coal composition, balance-of-plant impacts from alternate approaches, and operational challenges introduced by other technologies. We have also secured more than 30 US patents with additional US and international patents pending as well as received several prestigious industry awards.

ADA will support the partnership area on mercury releases from coal combustion by providing technical and economic information as required. We feel that this industry experience is crucial as mercury control technologies are evaluated in different countries using different types of coal.

Very Sincerely Yours,

A handwritten signature in black ink that reads "Constance Senior". The signature is written in a cursive, flowing style.

Constance Senior
Vice President of Technology

UNEP GLOBAL MERCURY PARTNERSHIP INFORMATION ON BECOMING A PARTNER

PARTNERSHIP AREA

Please check the partnership areas to which your organization intends to contribute to:

- artisanal and small scale gold mining
- mercury cell chlor alkali production
- mercury air transport and fate research
- mercury in products
- mercury releases from coal combustion
- mercury waste management
- mercury supply and storage mercury supply and storage
- mercury releases from the cement industry

Please indicate in your support letter how your organization intends to contribute to each of the indicated partnership areas.
