## GEO-5 Summary for Policy Makers

- Lack reliable consistent time-series data
- Drivers / impacts not systematically monitored
  - countries should monitor
  - standardized approaches
  - international cooperation
  - capacity building
  - Improving access to information

## **Partnerships at country level:**

With National Statistical Offices, Environment Ministries, Line Ministries, in coordination with other actors

## **Regional technical support projects:**

Provide policy and programmatic support to countries to:

- advocate/dismantle barriers to regular production of environment statistics
- support the implementation of national plans to monitor the environmental dimension of the SDGs, MEAs, International Initiatives
- promote South-South cooperation and sharing of best practices

## **Global policy support and SDGs monitoring:**

Coordinate all activities

Link normative & technical work at global level to the regional & national levels

## Partnerships at country level

With National Statistical Offices, Environment Ministries, Line Ministries, in coordination with other actors

- Match UN Environment expertise with UNDAF/Sustainable Development Plans in countries
  - Identify diverse forms of collaboration:  
Providing / receiving capacity development on priority areas, development of methodologies and guidelines, pilot testing of methodologies, joining geospatial experts and statisticians at national level, ...
  - Joint fund raising
-
