

**Turkey inputs on Implementation Plan “Towards a pollution-free planet”**

“3.4 Action Area 4: Awareness - Communication, Education and Consumer Information and subtitle 3) Education programmes on the dynamics of pollution (i.e. causes of pollution, life-cycle of pollutants) and youth mobilization for behavior” to be amended as follows (last sentence):

“This will be an educational tool that will help raise awareness among students and share knowledge on pollution, including linkages with climate change, biodiversity, **chemicals safety** and lifestyles and on the available solutions.”

In addition, Turkey is of the view that translation of all deliverables under the action “3.4 Area 4: Awareness - Communication, Education and Consumer Information” to the UN Member States official languages (to the extent possible) would immensely contribute to fulfill the objectives set in this Implementation Plan.”
