

# Production and Consumption of Ozone Depleting Substances 1986 - 1995

Ozone Secretariat

VIENNA CONVENTION  
MONTREAL PROTOCOL

September 1997  
Tenth Anniversary of the Montreal Protocol

## Preface

1. This report contains data on the production and consumption of ozone-depleting substances (ODS), as reported to the Secretariat by the Parties to the Montreal Protocol on Substances that Deplete the Ozone Layer during the period 1986-1995. The Secretariat has arranged the data provided by the Parties into the groups for which control measures are prescribed in the Protocol. To calculate the figures for each group, the figures reported by the Parties for each substance of the group in metric tonnes have been multiplied by the ozone-depleting potential (ODP) of that substance and added together.
2. The substances subject to the controls introduced in 1987, 1990 and 1992 are as follows:
  - (a) Montreal Protocol, 1987 - Annex A, Group I: chlorofluorocarbons (CFCs) and Group II: halons;
  - (b) London Amendment, 1990 - Annex B, Group I: other fully halogenated CFCs, Group II: carbon tetrachloride and Group III: methyl chloroform;
  - (c) Copenhagen Amendment, 1992 - Annex C, Group I: hydrochlorofluorocarbons (HCFCs) and Group II: hydrobromofluorocarbons (HBFCs); Annex E: methyl bromide.
3. In the tables, a hyphen (-) has been used where Parties were not required to report data and the abbreviation N.R. (not reported) where Parties are required to report but have not. Data have not been received by the Secretariat for all the groups of substances or for all the years. Among the many reasons for these are the following.
4. One reason is that Parties are required to report, and are bound by the control measures, on only those substances controlled by the Protocol and the Amendment which they have ratified. The Montreal Protocol has so far been ratified by 162 Parties while the London Amendment has been ratified by only 115 Parties, and the Copenhagen Amendment by only 69 Parties. The reporting obligations of the different Parties are:
  - (a) Parties which have ratified only the Montreal Protocol: Annex A substances;
  - (b) Parties which have ratified the Protocol and its London Amendment: Annex A and B substances and transitional substances (HCFCs);
  - (c) Parties which have ratified the Copenhagen Amendment: Annex A, B, C and E substances.

5. The London Amendment entered into force on 10 August 1992 and the Copenhagen Amendment on 14 June 1994. Therefore, for Annex B and Annex E substances, there are no reporting requirements prior to 1992 and 1994, respectively. Under the London Amendment Parties are required to report on Annex C substances as transitional substances.
6. Annexes A, B, C and E of the Protocol are attached to this report. Parties have not reported for all the years because Article 7 mandates each Party to report, inter alia, only for the years after the entry into force of the Protocol or Amendments for that Party. The yearly ratifications of the Protocol and its Amendments are given in the table below:

**Yearly Ratifications**

	<b>Montreal Protocol 1987</b>	<b>London Amendment 1990</b>	<b>Copenhagen Amendment 1992</b>
To the end of 1988	30	-	-
1989	22	-	-
1990	13	2	-
1991	10	14	-
1992	23	27	-
1993	33	32	14
1994	15	26	22
1995	5	3	14
1996	10	9	14
1997	1	2	5

7. Some developing countries have yet to provide full reports. Under Article 5 of the Montreal Protocol, developing countries with per capita consumption below the limits prescribed in that Article are entitled to delay the implementation of the control measures of the Protocol. Such Parties are eligible for financial assistance from the Multilateral Fund in accordance with Article 10 of the Protocol. The Multilateral Fund provides assistance to such Parties for institutional strengthening, for the preparation of a country programme to implement the control measures and for ODS phase-out projects. It has been recognized that many developing countries may be unable to submit their data until their country programmes have been prepared. The Sixth Meeting of the Parties permitted temporary classification of non-reporting developing country Parties as operating under Article 5 for a period of two years. It also mandated that the Parties operating under Article 5 must report their data within one year of the approval of their country programme by the Executive

Committee of the Multilateral Fund. As can be seen from the data, some developing countries have yet to report their data. These countries are being helped by the Multilateral Fund to prepare their country programmes.

8. Some of the production or consumption figures may be negative. Production has been defined under the Protocol as production minus the amount destroyed minus the amount entirely used as feedstock in the manufacture of other chemicals. Consumption is defined as production plus imports minus exports of controlled substances. Since the figures are for each calendar year, it is quite possible that in some years the feedstock figure may exceed the production figure of that year, if the feedstock use is from a carry-over stock. The production could be negative in such cases. For the same reason, the consumption could also be negative.
9. For Parties which have reported production of ODS, but have not reported the quantities of ODS which they imported and exported, their consumption (defined by the Protocol as: production plus imports minus exports) is noted as "not reported" (N.R.).
10. Since the entry into force of the Montreal Protocol in 1989, many political changes have come about. Many States have emerged in the place of the former Soviet Union. Similar changes have occurred in Yugoslavia and the former Czechoslovakia. The European Community has also expanded its membership from 12 to 15 during this period. The data report contains appropriate footnotes to explain the basis of the various figures given, taking into account these political changes.
11. In this data report, the Secretariat has not attempted a time series or regional analysis. The main obstacle to such an analysis is that comparisons are only possible for the countries which reported for all the years and not all countries have made such reports. No doubt, researchers throughout the world will undertake detailed statistical analyses, with interesting results.. The present report benefited from the analysis made by Dr. S. Oberthuer, of Ecologic of Germany, supported by the German Agency for Technical Coorperation.
12. The Secretariat hopes that this publication will be of interest to many readers and it would be grateful for any suggestions on ways of improving the format of presentation or for any corrections. The Secretariat hopes to present an update of this publication every year, after taking into account any suggestions received.

K.M. Sarma  
Executive Secretary  
Ozone Secretariat  
United Nations Environment Programme

## Summary of control measures under the Montreal Protocol

*Note: An Article 5(1) Party is a party classified at a meeting of the parties as a developing country and whose annual per capita consumption of Annex A and Annex B substances are below the limits set in Article 5 of the Montreal Protocol.*

### Annex A – Group I: Chlorofluorocarbons (CFC-11, CFC-12, CFC-113, CFC-114 and CFC-115)

*Applicable to production and consumption*

#### *Non-Article 5(1) Parties*

Base level: 1986

Freeze: July 1, 1989, and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

75 percent reduction: January 1, 1994, and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

100 percent reduction: January 1, 1996 (with possible exemptions for essential uses), and 15 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

#### *Article 5(1) Parties*

Base level: Average of 1995–97

Freeze: July 1, 1999 and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

50 percent reduction: January 1, 2005, and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

85 percent reduction: January 1, 2007 and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

100 percent reduction: January 1, 2010 (with possible exemptions for essential uses) and 15 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

Annex A – Group II: Halons (halon 1211, halon 1301 and halon 2402)

*Applicable to production and consumption*

*Non-Article 5(1) Parties*

Base level: 1986

Freeze: January 1, 1992 and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

100 percent reduction: January 1, 1994 (with possible exemptions for essential uses), and 15 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

*Article 5(1) Parties*

Base level: Average of 1995–97

Freeze: January 1, 2002 and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

50 percent reduction: January 1, 2005, and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

100 percent reduction: January 1, 2010 (with possible exemptions for essential uses) and 15 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

Annex B – Group I: Other fully halogenated CFCs (CFC-13, CFC-111, CFC-112, CFC-211, CFC-212, CFC-213, CFC-214, CFC-215, CFC-216, CFC-217)

*Applicable to production and consumption*

*Non-Article 5(1) Parties*

Base level: 1989

20 percent reduction: January 1, 1993 and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

75 percent reduction: January 1, 1994 and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

100 percent reduction: January 1, 1996 (with possible exemptions for essential uses), and 15 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

*Article 5(1) Parties*

Base level: Average of 1998–2000

20 percent reduction: January 1, 2003, and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

85 percent reduction: January 1, 2007 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

100 percent reduction: January 1, 2010 (with possible exemptions for essential uses), and 15 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

## Annex B – Group II: Carbon tetrachloride

*Applicable to production and consumption*

### *Non-Article 5(1) Parties*

Base level: 1989

85 percent: January 1, 1995 and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

100 percent: January 1, 1996 (with possible exemptions for essential uses), and 15 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

### *Article 5(1) Parties*

Base level: Average of 1998–2000

85 percent: January 1, 2005 and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

100 percent: January 1, 2010 (with possible exemptions for essential uses), and 15 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

## Annex B – Group III: 1,1,1-trichloroethane (methyl chloroform)

*Applicable to production and consumption*

### *Non-Article 5(1) Parties*

Base level: 1989

Freeze: January 1, 1993 and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

50 percent: January 1, 1994 and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

100 percent: January 1, 1996 (with possible exemptions for essential uses), and 15 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

### *Article 5(1) Parties*

Base level: Average of 1998–2000

Freeze: January 1, 2003 and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

30 percent: January 1, 2005 and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

70 percent: January 1, 2010 and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

100 percent: January 1, 2015 (with possible exemptions for essential uses), and 15 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

### Annex C – Group I: HCFCs

*Applicable only to consumption*

#### *Non-Article 5(1) Parties*

Base level: 1989 HCFC consumption + 2.8 percent  
of 1989 CFC consumption

Freeze: 1996.

35 percent: January 1, 2004.  
reduction

65 percent: January 1, 2010.  
reduction

90 percent: January 1, 2015.  
reduction

99.5 percent: January 1, 2020, and thereafter,  
reduction consumption restricted to the servicing  
of refrigeration and air-conditioning  
equipment existing at that date.

100 percent: January 1, 2030.  
reduction

### Annex C – Group II HBFCs

*Applicable to production and consumption*

#### *Non-Article 5(1) Parties*

100 percent: January 1, 1996 (with possible  
reduction exemptions for essential uses)

#### *Article 5(1) Parties*

Base level: 2015 consumption

Freeze: January 1, 2016

100 percent: January 1, 2040.  
reduction

## Annex E: Methyl bromide

*Applicable to production and consumption, amounts used for quarantine and preshipment applications exempted.*

### *Non-Article 5(1) Parties*

Base level: 1991

Freeze: January 1, 1995 and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

25 percent reduction: January 1, 2001 and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

50 percent reduction: January 1, 2005 and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

100 percent reduction: January 1, 2010 with possible critical agricultural use exemptions and 15 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

### *Article 5(1) Parties*

Base level: Average of 1995–98

Freeze: January 1, 2002 and 10 percent of base level production allowed to be produced additionally to meet the basic domestic needs of parties operating under Article 5(1).

### Annex A: Controlled substances

Group	Substance	Ozone-Depleting Potential*
<i>Group I</i>		
CFC <sub>1</sub>	(CFC-11)	1.0
CF <sub>2</sub> Cl <sub>2</sub>	(CFC-12)	1.0
C <sub>2</sub> F <sub>3</sub> Cl <sub>3</sub>	(CFC-113)	0.8
C <sub>2</sub> F <sub>4</sub> Cl <sub>2</sub>	(CFC-114)	1.0
C <sub>2</sub> F <sub>5</sub> Cl	(CFC-115)	0.6
<i>Group II</i>		
CF <sub>2</sub> BrCl	(halon-1211)	3.0
CF <sub>3</sub> Br	(halon-1301)	10.0
C <sub>2</sub> F <sub>4</sub> Br <sub>2</sub>	(halon-2402)	6.0

\* These ozone depleting potentials are estimates based on existing knowledge and will be reviewed and revised periodically.

### Annex B: Controlled substances

Group	Substance	Ozone-Depleting Potential
<i>Group I</i>		
CF <sub>3</sub> Cl	(CFC-13)	1.0
C <sub>2</sub> FCl <sub>5</sub>	(CFC-111)	1.0
C <sub>2</sub> F <sub>2</sub> Cl <sub>4</sub>	(CFC-112)	1.0
C <sub>3</sub> FCl <sub>7</sub>	(CFC-211)	1.0
C <sub>3</sub> F <sub>2</sub> Cl <sub>6</sub>	(CFC-212)	1.0
C <sub>3</sub> F <sub>3</sub> Cl <sub>5</sub>	(CFC-213)	1.0
C <sub>3</sub> F <sub>4</sub> Cl <sub>4</sub>	(CFC-214)	1.0
C <sub>3</sub> F <sub>5</sub> Cl <sub>3</sub>	(CFC-215)	1.0
C <sub>3</sub> F <sub>6</sub> Cl <sub>2</sub>	(CFC-216)	1.0
C <sub>3</sub> F <sub>7</sub> Cl	(CFC-217)	1.0
<i>Group II</i>		
CCl <sub>4</sub>	carbon tetrachloride	1.1
<i>Group III</i>		
C <sub>2</sub> H <sub>3</sub> Cl <sub>3</sub> *	1,1,1-trichloroethane* (methyl chloroform)	0.1

\* This formula does not refer to 1,1,2-trichloroethane.

**Annex C: Controlled substances**

Group	Substance	Number of isomers	Ozone-Depleting Potential*
<i>Group I</i>

C <sub>3</sub> H <sub>5</sub> F <sub>2</sub> Br		9	0.07-0.8
C <sub>3</sub> H <sub>6</sub> FBr		5	0.02-0.7

\* Where a range of ODPs is indicated, the highest value in that range shall be used for the purposes of the Protocol. The ODPs listed as a single value have been determined from calculations based on laboratory measurements. Those listed as a range are based on estimates and are less certain. The range pertains to an isomeric group. The upper value is the estimate of the ODP of the isomer with the highest ODP, and the lower value is the estimate of the ODP of the isomer with the lowest ODP.

\*\* Identifies the most commercially viable substances with ODP values listed against them to be used for the purposes of the Protocol.

**Annex D:<sup>\*</sup> A list of products<sup>\*\*</sup> containing controlled substances specified in Annex A**

Products	Customs code number
1. Automobile and truck air conditioning units (whether incorporated in vehicles or not)	.....
2. Domestic and commercial refrigeration and air conditioning/heat pump equipment*** e.g. Refrigerators Freezers Dehumidifiers Water coolers Ice machines Air conditioning and heat pump units	..... ..... ..... ..... ..... .....
3. Aerosol products, except medical aerosols	.....
4. Portable fire extinguisher	.....
5. Insulation boards, panels and pipe covers	.....
6. Pre-polymers	.....

\* This Annex was adopted by the Third Meeting of the Parties in Nairobi, 21 June 1991 as required by paragraph 3 of Article 4 of the Protocol.

\*\* Though not when transported in consignments of personal or household effects or in similar non-commercial situations normally exempted from customs attention.

\*\*\* When containing controlled substances in Annex A as a refrigerant and/or in insulating material of the product.

**Annex E: Controlled substance**

Group	Substance	Ozone-Depleting Potential
<i>Group I</i> CH <sub>3</sub> Br	methyl bromide	0.6

**PARTIES THAT HAVE NOT REPORTED DATA DURING THE PERIOD  
1986-1995 AND DO NOT APPEAR IN TABLES 1-14**

*List of Parties who have not reported data at all*

1. Chad
2. Comoros
3. Congo, Democratic Republic of the
4. Democratic Peoples Republic of Korea
5. Grenada
6. Honduras
7. Kiribati
8. Mali
9. Marshall Islands
10. Micronesia
11. Nepal
12. Nicaragua
13. Paraguay
14. Samoa
15. Turkmenistan
16. Tuvalu
17. Vanuatu

*List of Parties that have not reported data for Annexes A, B, C and E.*

<b>PARTY</b>	<b>ANNEX(ES) FOR WHICH NO DATA WAS REPORTED</b>
1. Antigua and Barbuda	B/I, B/II, B/III, C/I, E/I.
2. Bosnia and Herzegovina	A/II, B/I, B/III, E/I.
3. European Community	E/I.
4. Gabon	A/II.
5. Guinea	C/I.

N.R. Data not reported for the year

Not required to report

Data for 1995 is contained in the EC figures

Figures before 1995 contain data reported by the 12 members of the EC. Figures for 1995 contains data from the 15 members of the EC, including Austria, Finland and Sweden

Figures for 1989 for Annex A Group I and Annex C Group I substances are for 15 member states.

N.R. Data not reported for the year

\* Not required to report

\*\* Data for 1995 is contained in the EC figures

\*\*\* Figures before 1995 contain data reported by the 12 members of the EC. Figure for 1995 contains data from the 15 members of the EC, including Austria, Finland and Sweden

\*\*\*\* Figures for 1989 for Annex A, Group I and Annex C Group I substances are for 15 member states.

N.R. Data not reported for the year

- Not required to report

\* Data for 1995 is contained in the EC figures

\*\* Figures before 1995 contain data reported by the 12 members of the EC. Figure for 1995 contains data from the 15 members of the EC, including Austria, Finland and Sweden

Figures for 1989 for Annex A Group I and Annex C Group I substances are for 15 member states.

Figures for 1989 HCFC consumption do not include 2.8% of CFC consumption in 1989.

... Figures for 1989 HCFC consumption do not include 2.8% of CFC consumption in 1989.

The thin layer of Ozone in the stratosphere, located between 10 and 50 kilometres above the Earth, absorbs all but a small fraction of the harmful ultraviolet radiation (UV-B) emanating from the sun and protects all life on Earth.

Observations of the atmosphere have proved depletion of Ozone over the middle and higher latitudes of the Earth and an "Ozone Hole" annually over the South Pole. Scientists have linked the ozone depletion and the "hole" to the increasing emissions of Ozone-depleting substances (ODSs): Chlorofluorocarbons (CFCs), Hydrochlorofluorocarbons (HCFCs) and Halons, as well as Carbon tetrachloride, Methyl chloroform and Methyl bromide.

Alarmed by these discoveries, governments agreed in 1985 upon the Vienna Convention for the Protection of the Ozone Layer and in 1987 on the Montreal Protocol on Substances that Deplete the Ozone Layer. The Montreal Protocol mandates the phase-out of the ODS by all countries according to a specified timetable.

The Montreal Protocol also requires all countries, under Article 7 of the Protocol and other decisions taken by the Parties, to report their annual consumption, production, imports, and exports of ODSs for given baseline years (1986, 1989, 1991) and for subsequent years. To facilitate the verification of compliance by the Parties, the Ozone Secretariat has been preparing an annual summary of the ODS data reported by the Parties for the meetings of the Parties.

1997 is the tenth Anniversary since the adoption of the Montreal Protocol. On this occasion, this report presents for the first time, the ODS data published previously for the period 1986-1995 in a consolidated form, as has been requested by various academic institutes and organizations.
