Introduction

1. The Meeting of Legal and Technical Experts to examine Amendments to the Barcelona Convention and its Related Protocols and the Mediterranean Action Plan (MAP), held in Barcelona from 14 to 18 November 1994, decided that in order to ease the process of revision of the Barcelona system, it would be appropriate to hold an additional meeting to examine further the Barcelona Convention, the Dumping Protocol and the Specially Protected Areas Protocol. This Meeting was convened in Barcelona from 7 to 11 February 1995 at the invitation of the Government of Spain.

Attendance

2. Experts designated by the following Contracting Parties to the Barcelona Convention attended the Meeting: Algeria, Croatia, Cyprus, European Community, France, Greece, Italy, Libyan Arab Jamahiriya, Malta, Monaco, Morocco, Slovenia, Spain, Tunisia and Turkey.

4. The list of participants appears as Annex I to this report.

Agenda item 1: Opening of the Meeting

5. Mr. Joaquín Ros, Representative of Spain, welcomed the participants to Barcelona and expressed the hope that the Meeting would reach an agreement and finalize the texts of the amendments to the Convention, the Dumping Protocol and the Specially Protected Areas Protocol to be submitted to the Ninth Meeting of the Contracting Parties to be held in June 1995.

6. Mr. Lucien Chabason, Coordinator of the Mediterranean Action Plan, welcomed the participants on behalf of the Executive Director of UNEP and outlined the future programme of work related to the process of revision of the Barcelona system. He said that the revised text of the Mediterranean Action Plan would be studied by the Joint Meeting of the Scientific and Technical Committee and the Socio-Economic Committee, to be held in Athens (3-8 April 1995), while he hoped that the revised texts of the Barcelona Convention, the Dumping Protocol, and the Specially Protected Areas Protocol would be finalized at the present Meeting and transmitted directly to the Contracting Parties Meeting in June. He also informed the Meeting that
the Government of Italy had offered to host a meeting to examine the amendments to the LBS Protocol and that therefore such Protocol and the Protocol on the Transboundary Movement of Hazardous Wastes in the Mediterranean could be adopted by the end of 1995 by a Meeting of Plenipotentiaries.

Agenda item 2 : Election of Officers

7. The Meeting elected the following Officers:
   
   Chairperson: Mr. Patrick Van Klaveren (Monaco)
   Vice-Chairpersons: Mr. Mohamed Adel Bentati (Tunisia)
                      Mr. Franjo Gasparovic (Croatia)
   Rapporteur: Mr. Anthony E. Borg (Malta)

Agenda item 3 : Adoption of the Agenda and organization of work

8. The agenda proposed in document UNEP(OCA)/MED WG.91/1 was adopted (Annex II).

Agenda item 4 : Background and scope of the Meeting

10. The Coordinator emphasized that the revised texts submitted for discussion had taken into account the discussions and the opinions expressed at the Meeting held in Barcelona in November 1994. In particular, he emphasized that the articles on which consensus had not been reached at the previous meeting of experts had been prepared or re-drafted by the secretariat on the basis of the discussions and the deliberations of that Meeting.

11. The secretariat briefly introduced the working documents prepared for the Meeting, "Amendments to the Convention for the protection of the Mediterranean sea against pollution" UNEP(OCA)/MED WG.91/3, "Amendments to the Protocol for the prevention of pollution of the Mediterranean sea by dumping from ships and aircraft" UNEP(OCA)/MED WG.91/4 and "Amendments to the Protocol concerning Mediterranean specially protected areas" UNEP(OCA)/MED WG.91/5. The amendments which had been received too late for inclusion in the text had been incorporated in a separate document (UNEP(OCA)/MED WG.91/6).

12. The representative of the European Community emphasized that he had not yet received from the Council of the Union authority to negotiate amendments to the Barcelona convention and its related Protocols. He was therefore participating in the Meeting as the representative of the European Commission.
Agenda item 5 : Proposed revision of the legal texts

5.1 Barcelona Convention

13. In examining the document UNEP(OCA)MED WG.91/3, several representatives suggested that discussion should commence with Article 11A of the Convention and continue with the Articles in sequence, but expressed the wish to return for final revision to the text of Articles 1 to 9 which had been agreed in Barcelona in November.

14. The delegate of the European Commission said that he could accept that text subject to further study by the services of the Commission.

15. All the amended articles proposed in document UNEP(OCA)MED WG.91/3 and in part 1 of document UNEP(OCA)MED WG.91/6 were examined and discussed in length by the experts. In addition, the Meeting examined two written proposals by the Maltese delegation (amendments to Art. 14) and a written proposal by the Italian delegation (Criteria for the definition of practices and techniques related to Best Available Techniques and Best Environmental Practice).

16. The Meeting, while recalling the decision to create a Mediterranean Commission on Sustainable Development in the framework of MAP, agreed to stress under Art. 4 the guiding role of the Commission for the purpose of implementing sustainable development.

17. The delegate of Malta, in presenting his proposal to establish a "High Level Segment" in the Meeting of the Contracting Parties, emphasized the importance of involving the policy makers of the Mediterranean countries in the management of the Barcelona Convention and MAP. He expressed the opinion that regular meetings of Ministers of the Environment of Mediterranean countries would give such Ministers the opportunity to discuss problems related to the Mediterranean environment on a regular basis, so that such meetings would enhance the importance of the Barcelona Convention and MAP.

18. The delegate of Malta, in presenting the second proposal regarding the way of selecting the Coordinator of the Mediterranean Action Plan by the Contracting Parties, suggested that the Coordinator should receive his authority directly from the Contracting Parties.

19. During the discussion on the two proposals, the opinion was expressed that it would be very important for the implementation of MAP to have more frequent Ministerial Meetings on Barcelona Convention and MAP, and it was agreed that the Contracting Parties should be more involved in the selection of the Coordinator of MAP.

20. The Secretariat was invited to prepare proposals for the possible inclusion of "High Level Segment" meetings and the greater involvement of the Contracting Parties in the selection of the Coordinator in the framework of MAP, to be submitted to the
meeting of experts in Athens next April. The delegate of Malta emphasized his view that the issues of the "High Level Segment" and the Coordinator be kept open until the Meeting of the Contracting Parties to be held in June 1995, if no agreement is reached in Athens.

21. The Croatian delegation expressed the view that the text of Art. 4 para 3b) did not cover compensation costs and suggested that the present text should include all costs. The proposal was not accepted.

22. The proposal by the Italian delegation to attach an annex to the Convention on the criteria for the definition of Best Available Techniques and Best Environmental Practice was not accepted by the Meeting but raised the subject of the need to include under Art. 2 a number of additional necessary definitions. The Meeting agreed that some definitions including, if appropriate, those proposed by the Italian delegation, had to be inserted and that it could be done in connection with the discussion on the amendments of the various Protocols, especially the Protocol on Land-based Sources of pollution, and brought to the attention of the Joint Committees Meeting in April 1995.

23. Some delegations reminded the request to the Coordinating Unit to prepare, in consultation with the Contracting Parties, forms for reporting in a comparable way on how each Contracting Party is implementing the objectives of the Convention and its annexed Protocols.

24. The amended texts of the articles of the Convention, as agreed upon by the Meeting after discussion, appear in Annex III to this report. The articles not referred to in Annex III remain unchanged.

5.2 Dumping Protocol

25. The Meeting examined document UNEP(OCA)MED WG.91/4 and part 2 of UNEP(OCA)MED WG.91/6.

26. After a lengthy discussion, the Meeting agreed on the amendments to the Protocol which appear in Annex IV to this report.

27. In discussing amendments to Art. 6, the Meeting agreed that the criteria, guidelines and procedures referred to in the article, should be adopted by the Meetings of Contracting Parties.

28. The French delegation stressed the need for establishing a procedure of scientific assessment, similar to the procedures set up in other similar conventions (e.g. Waste assessment framework of the London Dumping Convention).

5.3 Specially Protected Areas Protocol

29. The secretariat introduced documents UNEP(OCA)/MED WG.91/5 and WG.91/6 explaining that the new text of the Protocol had been prepared in
consultation with a number of Mediterranean experts on the basis of the deliberations and the discussions of the Experts’ meeting held in Barcelona in November 1994.

30. All the proposed amended Articles were examined and discussed in length by the experts. In addition, the Meeting discussed a written proposal by the Turkish delegation concerning Article 2, a written proposal by the Greek delegation concerning Article 18, and three written proposals by the Chairman concerning Articles 1 to 11 prepared on the basis of the work of an open-ended group which met during the Meeting.

31. A number of general problems were raised in the course of the debate, among which the geographical coverage of the Protocol, the existence of two distinct categories of protected areas, the procedures for the establishment of protected areas and their inclusion in the SPAMI List.

32. On the proposal of the Chairman, an open-ended group prepared a new version of Articles 8 and 9, on the basis of the following agreed principles:

- the need for a single list of protected areas;
- the inclusion by consensus in the SPAMI List of the areas established in the high seas;
- the need not to include the SPAMI List in an annex to the Protocol.

33. While appreciating the efforts made by the group to meet the different opinions expressed by the delegations, the Meeting stressed that, considering the implications of the subject, the text of certain Articles was still open to any proposal of amendment by the Contracting Parties.

34. In discussing Article 13, the Meeting raised the issue of the exemptions to the prohibition prescribed for the protection of the species listed in the annexes and agreed that the exemptions granted by each country should be notified to the Meetings of the Parties.

35. Concerning the guidelines and common criteria for the inclusion of areas in the SPAMI list provided for in Article 18, it was agreed that they should be the object of a separate annex to the Protocol.

36. It was noted that, because of time constraints, the annexes mentioned in the present draft Protocol could not be possibly finalized by the meeting of Plenipotentiaries expected to adopt the Protocol in June 1995. It was agreed that the final act of the Conference of Plenipotentiaries would mention that the annexes could be adopted at a later Plenipotentiaries meeting.

37. With regard to the articles related to the geographical coverage of the draft Protocol and the procedure for inclusion of areas in the SPAMI list, certain delegations stressed that, due to the possible political implications, they reserved their position in view of the necessary consultations with the competent authorities of their respective
governments, until the forthcoming Meeting of the Contracting Parties. In particular, as regards Art. 2 paragraph 3, alternatives were presented by the delegates of Turkey and Greece but were not discussed by the Meeting. These alternatives are listed in Art. 2 paragraph 3 of Annex V to this report.

38. The articles of the Protocol as finalized by the Meeting appear in Annex V to this report.

39. The delegate of the European Commission expressed a reservation, subject to further study by the services of the Commission.

40. The problem was raised whether the draft Protocol concerning Specially Protected Areas and Biological Diversity in the Mediterranean had to be considered an amendment to the existing SPA Protocol, or a new Protocol. The opinion of the Parties was requested on this matter, to be transmitted to the secretariat before the next Joint Meeting of the Scientific and Technical Committee and the Socio-Economic Committee, to be held in Athens from 3 to 8 April 1995.

41. The Chairman expressed his satisfaction for noting during the discussions the clear will of the delegations to provide the region with a useful instrument for the protection of the biodiversity adapted to the Mediterranean characteristics. He also underlined that through that common work the identity of the Mediterranean people would be strengthened.

Agenda item 6: Other business

42. No other business were raised by the participants of the Meeting.

Agenda item 7: Adoption of the report

43. During the adoption of the report, and in particular during the adoption of Annex V, the Greek delegation proposed to change the text of Art. 11 of the Convention by substituting the word "clean" with "best available techniques".

44. The Maltese delegation, in reviewing the text of Art. 14 of the Convention, proposed the following amendments to the article:

"1. The Contracting Parties shall hold ordinary meetings once every two years, and extraordinary meetings at any other time deemed necessary, upon the request of the Organisation or at the request of any Contracting Party, provided that such requests are supported by at least two Contracting Parties. Ordinary Meetings of the Contracting Parties shall include a High Level Segment to which all Contracting Parties shall be invited to participate at Ministerial Level. High Level Segments may also be included in extraordinary Meetings of the Contracting Parties."
2. ..... 

(viii) to elect the Coordinator".

45. During the adoption of the amended texts of the Protocol on Specially Protected Areas the Turkish delegation made the following statement:

"The Turkish delegation is not satisfied with the draft text due to a grey area left on the subject whether this draft allows a Contracting Party unilaterally establish a protected area beyond its territorial sea limits.

From the start of the drafting process the Turkish stand on this delicate legal issue has been the following:

"If this Protocol meant to give a right to the Contracting Parties to establish protected areas beyond territorial sea limits this should only be allowed upon the consensus of the Contracting Parties or concerned Contracting Parties, i.e. adjacent or opposite Contracting States of a marine area".

The Turkish delegation requested a small study group on this subject but failed to get a response.

Considering the existing balances in the semi-enclosed seas in which this draft Protocol meant to be applied and Turkey is a Coastal State, Turkey cannot afford grey areas left in the draft on this matter.

Therefore, the Turkish delegation has the view that the draft Protocol still needs to be worked on by the Contracting Parties and Turkey's further views and additional proposals concerning the text will be presented at next Meeting in order to create a balanced, clear and acceptable text of consensus accommodating also Turkish concerns".

46. The Greek delegation expressed the view that:

"The Meeting of Legal and Technical Experts should finalise as much as possible the text regarding the legal and technical issues, and that eventual major political issues should be brought up for discussion to the Meeting of the Contracting Parties and the Plenipotentiaries. Keeping always in mind that neither the Barcelona Convention nor any of its Protocols should prejudice the rights of the Contracting Parties, as deriving from the UNLOS 1982 or the applicable international law, the Greek delegation expressed from the outset its willingness to cooperate and contribute actively in order to obtain a draft SPA Protocol acceptable by all Contracting Parties."
Greece is also in favour of clear solutions, to avoid future misunderstandings related to the implementation. To this end, the Greek delegation will continue efforts to reach acceptable solutions, meeting the concerns of all Contracting Parties to the fullest possible extent, in particular as regards Art. 2 and 9 of this Protocol.

47. The amended text of the report and the annexes in English and French were unanimously adopted by the Meeting.

Agenda item 8 : Closure of the Meeting

48. After the customary exchange of courtesies, the Chairman closed the Meeting at 13:30 hours of 11 February 1995.

AMENDMENTS TO THE CONVENTION FOR THE PROTECTION OF THE MEDITERRANEAN SEA AGAINST POLLUTION

Title

CONVENTION FOR THE PROTECTION OF THE MARINE ENVIRONMENT AND THE COASTAL REGION OF THE MEDITERRANEAN

Preamble

The Contracting Parties,

2. Fully aware of their responsibility to preserve and sustainably develop this common heritage for the benefit and enjoyment of present and future generations,

7. Fully aware that the Mediterranean Action Plan, since its adoption in 1975 and through its evolution, has contributed to the process of sustainable development in the Mediterranean region and has represented a substantive and dynamic tool for the implementation of the activities related to the Convention and its Protocols by the Contracting Parties,

8. Taking into account the results of the United Nations Conference on Environment and Development, held in Rio de Janeiro from 4 to 14 June 1992,

Have agreed as follows:
Article 1

GEOGRAPHICAL COVERAGE

2. The application of the Convention may be extended to coastal areas as defined by each Contracting Party within its own territory.

3. Any Protocol to this Convention may extend the geographical coverage to which that particular Protocol applies.

Article 2

DEFINITIONS

(a) "Pollution" means the introduction by man, directly or indirectly, of substances or energy into the marine environment, including estuaries, which results, or is likely to result, in such deleterious effects as harm to living resources and marine life, hazards to human health, hindrance to marine activities, including fishing and other legitimate uses of the sea, impairment of quality for use of seawater and reduction of amenities.

Article 3

GENERAL PROVISIONS

1. The Contracting Parties may enter into bilateral or multilateral agreements, including regional or sub-regional agreements for the promotion of sustainable development, the protection of the environment, the conservation and preservation of natural resources in the Mediterranean Sea Area, provided that such agreements are consistent with this Convention and the Protocols and conform to international law. Copies of such agreements shall be communicated to the Organization. As appropriate, Contracting Parties should make use of existing organizations, agreements or arrangements in the Mediterranean Sea Area.

3. The Contracting Parties shall take individual or joint initiatives, compatible with international law through the relevant international organizations to encourage the implementation of the provisions of this Convention and its Protocols by all the non-party states.
Article 4

GENERAL OBLIGATIONS

1. The Contracting Parties shall individually or jointly take all appropriate measures in accordance with the provisions of this Convention and those Protocols in force to which they are party to prevent, abate, combat and to the fullest possible extent eliminate pollution of the Mediterranean Sea Area and to protect and enhance the marine environment in that Area so as to contribute towards its sustainable development.

2. The Contracting Parties pledge themselves to take appropriate measures to implement the Mediterranean Action Plan and, further, to pursue the protection of the marine environment and the natural resources of the Mediterranean Sea Area as an integral part of the development process, meeting the needs of present and future generations in an equitable manner. For the purpose of implementing the objectives of sustainable development the Contracting Parties shall take fully into account the recommendations of the Mediterranean Commission on Sustainable Development established within the framework of the Mediterranean Action Plan.

3. In order to protect the environment and contribute to the sustainable development of the Mediterranean Sea Area, the Contracting Parties shall:

   (a) apply, in accordance with their capabilities, the precautionary principle, by virtue of which where there are threats of serious or irreversible damage, lack of full scientific certainty shall not be used as a reason for postponing cost-effective measures to prevent environmental degradation;

   (b) apply the polluter pays principle, by virtue of which the costs of pollution prevention, control and reduction measures are to be borne by the polluter, with due regard to the public interest;

   (c) undertake environmental impact assessment for proposed activities that are likely to cause a significant adverse impact on the marine environment and are subject to an authorization by competent national authorities;

   (d) promote cooperation between and among States in environmental impact assessment procedures related to activities under their jurisdiction or control which are likely to have a significant adverse effect on the marine environment of other States or areas beyond the limits of national jurisdiction, on the basis of notification, exchange of information and consultation;
(e) **commit themselves to promote** the integrated management of the coastal zones, taking into account the protection of areas of ecological and landscape interest and the rational use of natural resources.

4. In implementing the Convention and the related Protocols, the Contracting Parties shall:

   (a) adopt programmes and measures which contain, where appropriate, time limits for their completion;

   (b) utilize the best available techniques and the best environmental practices and promote the application of, access to and transfer of environmentally sound technology, including clean production technologies, taking into account the social, economic and technological conditions.

5. The Contracting Parties shall cooperate in the formulation and adoption of Protocols, prescribing agreed measures, procedures and standards for the implementation of this Convention.

6. The Contracting Parties further pledge themselves to promote, within the international bodies considered to be competent by the Contracting Parties, measures concerning the implementation of programmes of sustainable development, the protection, conservation and rehabilitation of the environment and of the natural resources in the Mediterranean Sea Area.

**Article 5**

**POLLUTION CAUSED BY DUMPING FROM SHIPS AND AIRCRAFT AND INCINERATION AT SEA**

The Contracting Parties shall take all appropriate measures to prevent, abate and to the fullest possible extent eliminate pollution of the Mediterranean Sea Area caused by dumping or incineration from ships and aircraft.

**Article 6**

**POLLUTION FROM SHIPS**

The Contracting Parties shall take all measures in conformity with international law to prevent, abate, combat and to the fullest possible extent eliminate pollution of the Mediterranean Sea Area caused by discharges from ships and to ensure the effective implementation in that Area of the rules which are generally recognized at the international level relating to the control of this type of pollution.
Article 7

POLLUTION RESULTING FROM EXPLORATION AND EXPLOITATION OF THE CONTINENTAL SHELF AND THE SEABED AND ITS SUBSOIL

The Contracting Parties shall take all appropriate measures to prevent, abate, combat and to the fullest possible extent eliminate pollution of the Mediterranean Sea Area resulting from exploration and exploitation of the continental shelf and the seabed and its subsoil.

Article 8

POLLUTION FROM LAND-BASED SOURCES

The Contracting Parties shall take all appropriate measures to prevent, abate, combat and to the fullest possible extent eliminate pollution of the Mediterranean Area and to draw up and implement plans for the reduction and phasing out of substances that are toxic, persistent and liable to bioaccumulate arising from land-based sources. These measures shall apply:

(a) to pollution from land-based sources originating within the territories of the Parties, and reaching the sea:

   directly from outfalls discharging into the sea or through coastal disposal;

   indirectly through rivers, canals or other watercourses, including underground watercourses, or through run-off;

(b) to pollution from land-based sources transported by the atmosphere.

Article 9A

CONSERVATION OF BIOLOGICAL DIVERSITY

The Contracting Parties shall, individually or jointly, take all appropriate measures to protect and preserve biological diversity, rare or fragile ecosystems, as well as species of wild fauna and flora which are rare, depleted, threatened or endangered and their habitats, in the area to which this Convention applies. To this end, the Contracting Parties shall inter alia establish protected areas. The establishment of such areas shall not affect the rights of other Contracting Parties and third States.
Article 9B

POLLU TION RESULTING FROM THE TRANSBOUNDARY MOVEMENTS OF HAZARDOUS WASTES AND THEIR DISPOSAL

The Contracting Parties shall take all appropriate measures to prevent, abate and to the fullest possible extent eliminate pollution of the environment which can be caused by transboundary movements and disposal of hazardous wastes, and to reduce to a minimum, and if possible eliminate, such transboundary movements.

Article 11

SCIENTIFIC AND TECHNOLOGICAL COOPERATION

2. The Contracting Parties undertake to promote the research on, access to and transfer of environmentally sound technology, including clean production technologies and to cooperate in the formulation, establishment and implementation of clean production processes.

Article 11A

ENVIRONMENTAL LEGISLATION

1. The Contracting Parties shall adopt legislation implementing the Convention and the Protocols.

2. The Secretariat may, upon request from a Contracting Party, assist that Party in the drafting of environmental legislation in compliance with the Convention and the Protocols.

Article 11B

PUBLIC INFORMATION AND PARTICIPATION

1. The Contracting Parties shall ensure that their competent authorities shall give to the public appropriate access to information on the environmental state in the field of application of the Convention and the Protocols, on activities or measures adversely affecting or likely to affect it and on activities carried out or measures taken in accordance with the Convention and the Protocols.
2. The Contracting Parties shall ensure that the opportunity is given to the public to participate in decision making processes relevant to the field of application of the Convention and the Protocols, as appropriate.

3. The provision of paragraph 1. of this Article shall not prejudice the right of Contracting Parties to refuse, in accordance with their legal systems and applicable international regulations, to provide access to such information on the ground of confidentiality, public security or investigation proceedings, stating the reasons for such a refusal.

Article 12

LIABILITY AND COMPENSATION

The Contracting Parties undertake to cooperate in the formulation and adoption of appropriate rules and procedures for the determination of liability and compensation for damage resulting from pollution of the marine environment in the Mediterranean Sea Area.

Article 13

INSTITUTIONAL ARRANGEMENTS

... (iii) to receive, consider and reply to enquiries and information from the Contracting Parties;

(iii bis) to receive, consider and reply to enquiries and information from non-governmental organizations and the public when they relate to subjects of common interest or to activities carried out at the regional level; in this case, the Contracting Parties concerned shall be informed;

... (iv bis) to regularly report to the Contracting Parties on the implementation of the Convention and of the Protocols;

...
Article 14

MEETINGS OF THE CONTRACTING PARTIES

2. ..... (vii) to approve the Programme Budget.

Article 14A

BUREAU

1. The Bureau of the Contracting Parties shall be composed of representatives of the Contracting Parties elected by the Meetings of the Contracting Parties. In electing the members of the Bureau, the Meetings of the Contracting Parties shall observe the principle of equitable geographical distribution.

2. The functions of the Bureau and the terms and conditions upon which it shall operate shall be set in the Rules of Procedure adopted by the Meetings of the Contracting Parties.

Article 14C

OBSERVERS

1. The Contracting Parties may decide to admit as observers at their meetings and conferences:

   (a) any State which is not a Contracting Party to the Convention;

   (b) any international governmental organisation or any non-governmental organisation the activities of which are related to the Convention.

2. Such observers may participate in meetings without the right to vote and may present any information or report relevant to the objectives of the Convention.

3. The conditions for the admission and participation of observers shall be established in the Rules of Procedure adopted by the Contracting Parties.
Article 15

ADOPTION OF ADDITIONAL PROTOCOLS

3. Deleted.

Article 18

RULES OF PROCEDURE AND FINANCIAL RULES

2. The Contracting Parties shall adopt financial rules, prepared in consultation with the Organisation, to determine, in particular, their financial participation in the Trust Fund.

Article 20

REPORTS

1. The Contracting Parties shall transmit to the Organisation reports on:

   (a) the legal, administrative or other measures taken by them for the implementation of this Convention, the Protocols and of the recommendations adopted by their meetings;

   (b) the effectiveness of the measures referred to in subparagraph (a) and problems encountered in the implementation of the instruments as mentioned above.

2. The reports shall be submitted in such form and at such intervals as the Meetings of Contracting Parties may determine.
Article 21

COMPLIANCE CONTROL

The meetings of the Contracting Parties shall, on the basis of periodical reports referred to in Article 20 and any other report submitted by the Contracting Parties, assess the compliance with the Convention and the Protocols as well as the measures and recommendations. They shall recommend, when appropriate, the necessary steps to bring about full compliance with the Convention and the Protocols and promote the implementation of the decisions and recommendations.
ANNEX IV

AMENDMENTS TO THE PROTOCOL FOR THE PREVENTION OF POLLUTION OF THE MEDITERRANEAN SEA BY DUMPING FROM SHIPS AND AIRCRAFT

Title

PROTOCOL FOR THE PREVENTION AND ELIMINATION OF POLLUTION OF THE MEDITERRANEAN SEA BY DUMPING OR INCINERATION FROM SHIPS AND AIRCRAFT

Preamble

... 

Recognizing the danger posed to the marine environment by the dumping or incineration of wastes or other matter,

...

Bearing in mind that Chapter 17 of Agenda 21 of UNCED calls on the Contracting Parties to the Convention on the Prevention of Marine Pollution by Dumping of Wastes and other Matter (London, 1972) to take the necessary measures to end dumping in the ocean and the incineration of hazardous substances,

Taking into account Resolutions LC 49(16) and LC 50(16), approved by the 16th Consultative Meeting of the 1972 London Convention, which prohibit the dumping and incineration of industrial wastes at sea,

...

Article 1

The Contracting Parties to this Protocol (hereinafter referred to as "the Parties") shall take all appropriate measures to prevent, abate and eliminate to the fullest extent possible pollution of the Mediterranean Sea caused by dumping or incineration from ships and aircraft.
Article 2

The area to which this Protocol applies shall be the Mediterranean Sea Area as defined in Article 1 of the Convention for the Protection of the marine environment and the coastal region of the Mediterranean (hereinafter referred to as "the Convention").

Article 3

(c) Any deliberate disposal or emplacement of wastes or other matter on the seabed or in the marine subsoil from ships or aircraft.

5. "Incineration" means the deliberate combustion of wastes or other matter in the Mediterranean Sea Area, with the aim of thermal destruction and does not include activities incidental to the normal operations of ships or aircraft.

Former paragraph 5 becomes paragraph 6.

Article 4

1. The dumping of wastes or other matter, with the exception of those listed in paragraph 2 of this Article, is prohibited.

2. The following is the list referred to in the preceding paragraph:

(a) dredged material;

(b) fish waste or organic materials resulting from the processing of fish and other marine organisms;

(c) vessels, until 31 December 2000;

(d) platforms and other man-made structures at sea, provided that material capable of creating floating debris or otherwise contributing to pollution of the marine environment has been removed to the maximum extent;

(e) inert uncontaminated geological materials the chemical constituents of which are unlikely to be released into the marine environment.
Article 5

The dumping of the wastes or other matter listed in Article 4.2 requires a prior special permit from the competent national authorities.

Article 6

(a) The permits referred to in Article 5 shall be issued only after careful consideration of the factors set forth in the Annex to this Protocol or the criteria, guidelines and relevant procedures adopted by the meeting of the Contracting Parties pursuant to paragraph (b) below;

(b) The Contracting Parties shall draw up and adopt criteria, guidelines and procedures for the dumping of wastes or other matter listed in Article 4.2 so as to prevent, abate and eliminate pollution.

Article 7

Incineration at sea is prohibited.

Article 9

If a Party in a critical situation of an exceptional nature considers that wastes or other matter listed in Article 4.2 of this Protocol cannot be disposed of on land...

Article 10

1. Each Party shall designate one or more competent authorities to:

   (a) issue the permits provided for in Article 5;

   (b) keep records of the nature and quantities of the wastes or other matter permitted to be dumped and of the location, date and method of dumping.
2. The competent authorities of each Party shall issue the permits provided for in Article 5 in respect of the wastes or other matter intended for dumping:

(a) ...
(b) ...

Article 11

2. Each Contracting Party shall ensure that its vessels and aircraft entitled to sovereign immunity under international law act in a manner consistent with this Protocol.

Article 14

3. The adoption of the amendments to the Annex to this Protocol...

ANNEX

The factors to be considered in establishing criteria governing the issue of permits for the dumping of matter at sea taking into account article 6 include:

...
ANNEX V

PROTOCOL CONCERNING SPECIALLY PROTECTED AREAS AND BIOLOGICAL DIVERSITY IN THE MEDITERRANEAN

The Contracting Parties to this Protocol,

"Being Parties to the Convention for the Protection of the Marine Environment and the Coastal Region of the Mediterranean, adopted at Barcelona on 16 February 1976,

Conscious of the profound impact of human activities on the state of the marine environment and the littoral and more generally on the ecosystems of areas having prevailing Mediterranean features,

Stressing the importance of protecting and, as appropriate, improving the state of the Mediterranean natural and cultural heritage, in particular through the establishment of specially protected areas and also by the protection and conservation of threatened species,

Considering the instruments adopted by the United Nations Conference on Environment and Development and particularly the Convention on Biological Diversity (Rio de Janeiro, 1992),

Conscious that when there is a threat of significant reduction or loss of biological diversity, lack of full scientific certainty should not be invoked as a reason for postponing measures to avoid or minimize such a threat,

Considering that all the Contracting Parties should cooperate to conserve, protect and restore the health and integrity of ecosystems and that they have, in this respect, common but differentiated responsibilities,

Have agreed as follows:
PART I

GENERAL PROVISIONS

Article 1

DEFINITIONS

For the purposes of this Protocol:

(a) "Convention" means the Convention for the Protection of the Marine Environment and the Coastal Region of the Mediterranean, adopted at Barcelona on 16 February 1976;

(b) "Biological diversity" means the variability among living organisms from all sources including, inter alia, terrestrial, marine and other aquatic ecosystems and the ecological complexes of which they are part; this includes diversity within species, between species and of ecosystems;

(c) "Endangered species" means any species that is in danger of extinction throughout all or part of its range;

(d) "Endemic species" means any species whose range is restricted to a limited geographical area;

(e) "Threatened species" means any species that is likely to become extinct within the foreseeable future throughout all or part of its range and whose survival is unlikely if the factors causing numerical decline or habitat degradation continue to operate;

(f) "Conservation status of a species" means the sum of the influences acting on the species that may affect its long-term distribution and abundance;

(g) "Parties" means the Contracting Parties to this Protocol;

(h) "Organization" means the organization referred to in Article 2 of the Convention;

(i) "Centre" means the Regional Activity Centre for Specially Protected Areas.
Article 2

GEOGRAPHICAL COVERAGE

1. The area to which this Protocol applies shall be the area of the Mediterranean Sea as delimited in Article 1 of the Convention. It also includes:
   - the seabed and its subsoil;
   - the waters, the seabed and its subsoil on the landward side of the baseline from which the breadth of the territorial sea is measured and extending, in the case of watercourses, up to the freshwater limit;
   - the terrestrial coastal areas designated by each of the Parties, including wetlands.

2. Nothing in this Protocol shall limit the sovereign immunity of certain ships in accordance with international law. However, each Contracting Party shall ensure that its vessels and aircraft entitled to sovereign immunity under international law act in a manner consistent with this Protocol.¹

Proposal by the Secretariat:

[3. Nothing in this Protocol nor any act adopted on the basis of this Protocol shall prejudice the rights, claims or legal views of any State concerning the law of the sea, the nature and the extent of areas subject to its national sovereignty or jurisdiction, the delimitation of marine areas between States with opposite or adjacent coasts, freedom of navigation on the high seas and the right of innocent passage in territorial seas, as well as the nature and the extent of the jurisdiction of the coastal State, the flag State and the port State.]

Proposal by Turkey:

[3. Nothing in this Protocol nor any act adopted on the basis of this Protocol shall prejudice the rights, the present and future claims or legal views of any State concerning the law of the sea, the nature and the extent of marine areas, the delimitation of marine areas between States with opposite or adjacent coasts, freedom of navigation on the high seas and the right of innocent passage in territorial seas, as well as the nature and the extent of the jurisdiction of the coastal State, the flag State and the port State.]

¹ The delegation of Turkey expressed a reservation on this paragraph.
Proposal by Greece:

[3.]
Variant 1: "Nothing in this Protocol nor any act adopted on the basis of this Protocol shall prejudice the rights of any State deriving from the law of the sea, in particular as regards the nature and the extent of marine areas subject to its sovereignty or national jurisdiction, the delimitation of marine areas between States with opposite or adjacent coasts, freedom of navigation on the high seas and the right of innocent passage in territorial seas, as well as the nature and the extent of the jurisdiction of the coastal State, the flag State and the port State.

Variant 2: "Nothing in this Protocol nor any act adopted on the basis of this Protocol shall prejudice the rights, present and future claims or legal views of any State, provided that they are in accordance with the United Nations Convention on the Law of the Sea of 1982 or the applicable international law of the sea, regarding the nature and the extent of marine areas subject to its sovereignty or national jurisdiction, the delimitation of marine areas between States with opposite or adjacent coasts, freedom of navigation on the high seas and the right of innocent passage in territorial seas, as well as the nature and the extent of the jurisdiction of the coastal State, the flag State and the port State.]

4. No act or activity undertaken on the basis of this Protocol shall constitute grounds for claiming, contending or disputing any claim to national sovereignty or jurisdiction.

Article 3

GENERAL OBLIGATIONS

1. Each Party shall take the necessary measures to:
   
   (a) protect, preserve and manage in a sustainable and environmentally sound way areas of particular natural or cultural value, notably by the establishment of protected areas;

   (b) protect, preserve and manage threatened or endangered species of flora and fauna.

2. The Parties shall cooperate, directly or through the competent international organizations, in the conservation and sustainable use of biological diversity in the area to which this Protocol applies.
3. The Parties shall identify and compile inventories of the components of biological diversity important for its conservation and sustainable use.

4. The Parties shall adopt strategies, plans and programmes for the conservation of biological diversity and the sustainable use of marine and coastal biological resources and shall integrate them into their relevant sectoral and intersectoral policies.

5. The Parties shall monitor the components of biological diversity referred to in paragraph 4 of this Article and shall identify processes and categories of activities which have or are likely to have a significant adverse impact on the conservation and sustainable use of biological diversity, and monitor their effects.

6. Each Party shall apply the measures provided for in this Protocol without prejudice to the sovereignty or the jurisdiction of other Parties or other States. Any measures taken by a Party to enforce these measures shall be in accordance with international law.

PART II

PROTECTED AREAS

Article 4

OBJECTIVES

The objective of protected areas is to safeguard:

(a) representative types of coastal and marine ecosystems of adequate size to ensure their long-term viability and to maintain their biological diversity;

(b) habitats which are in danger of disappearing in their natural area of distribution in the Mediterranean or which have a reduced natural area of distribution as a consequence of their regression or on account of their intrinsically restricted area;

(c) habitats critical to the survival, reproduction and recovery of endangered, threatened or endemic species of flora or fauna;

(d) sites of particular importance because of their scientific, aesthetic, cultural or educational interest.
Article 5

PROTECTION MEASURES

The Parties, in conformity with international law and taking into account the characteristics of each protected area, shall take the protection measures required, in particular:

(a) the strengthening of the application of the other Protocols to the Convention and of other relevant treaties to which they are Parties;

(b) the prohibition of the dumping or discharge of wastes and other substances likely directly or indirectly to impair the integrity of the protected area;

(c) the regulation of the passage of ships and any stopping or anchoring;

(d) the regulation of the introduction of any species not indigenous to the protected area in question, or of genetically modified species, as well as the introduction or reintroduction of species which are or have been present in the protected area;

(e) the regulation or prohibition of any activity involving the exploration or modification of the soil or the exploitation of the subsoil of the land part, the seabed or its subsoil;

(f) the regulation of any scientific research activity;

(g) the regulation or prohibition of fishing, hunting, taking of animals and harvesting of plants or their destruction, as well as trade in animals, parts of animals, plants, parts of plants, which originate in protected areas;

(h) the regulation and if necessary the prohibition of any other activity or act likely to harm or disturb the species or that might endanger the state of conservation of the ecosystems or species or might impair the natural or cultural characteristics of the protected area;

(i) any other measure aimed at safeguarding ecological and biological processes and the landscape.
Article 6

PLANNING AND MANAGEMENT

1. The Parties shall, in accordance with the rules of international law, adopt planning, management, supervision and monitoring measures for the protected areas.

2. Such measures should include for each protected area:

   (a) the development and adoption of a management plan that specifies the legal and institutional framework and the management and protection measures applicable;

   (b) the continuous monitoring of ecological processes, habitats, population dynamics, landscapes, as well as the impact of human activities;

   (c) the active involvement of local communities and populations, as appropriate, in the management of protected areas, including assistance to local inhabitants who might be affected by the establishment of protected areas;

   (d) the adoption of mechanisms for financing the promotion and management of protected areas, as well as the development of activities which ensure that management is compatible with the objectives of protected areas;

   (e) contingency plans for responding to incidents that could cause damage or constitute a threat;

   (f) the regulation of activities compatible with the objectives for which the protected area was established and the terms of the related permits;

   (g) the training of managers and qualified technical personnel, as well as the development of an appropriate infrastructure.

3. When protected areas covering both land and marine areas have been established, the Parties shall endeavour to ensure the coordination of the administration and management of the protected area as a whole.

Article 7

PROTECTED AREAS CONTIGUOUS TO INTERNATIONAL FRONTIERS

1. If a Party intends to establish, in an area subject to its sovereignty or national jurisdiction, a protected area contiguous to the frontier and to the limits of a zone subject to the sovereignty or national jurisdiction of another Party, the
competent authorities of the two Parties shall consult each other with a view to reaching agreement on the measures to be taken and shall, inter alia, examine the possibility of the other Party establishing a corresponding protected area or adopting any other appropriate measures.

2. If a Party intends to establish, in an area subject to its sovereignty or national jurisdiction, a protected area contiguous to the frontier and to the limits of a zone subject to the sovereignty or national jurisdiction of a State that is not a Party to this Protocol, the Party shall endeavour to cooperate with that State with a view to holding the consultations referred to in the previous paragraph.

3. If a State which is not party to this Protocol intends to establish a protected area contiguous to the frontier and to the limits of a zone subject to the sovereignty or national jurisdiction of a Party to this Protocol, the latter shall endeavour to cooperate with that State with a view to holding the consultations referred to in paragraph 1.

[4. If contiguous protected areas are established by two Parties or by one Party and a State that is not a Party to this Protocol, special agreements may provide for the means of consultation or cooperation referred to in paragraphs 1 and 2 respectively.]

Article 8

LIST OF SPECIALLY PROTECTED AREAS OF MEDITERRANEAN IMPORTANCE

1. In order to promote cooperation in the management and conservation of natural areas, as well as in the protection of threatened species and their habitats, the Parties shall draw up a "List of Specially Protected Areas of Mediterranean Importance", hereinafter referred to as the "SPAMI List".

2. The SPAMI List may include protected sites which:

- can play an important role in conserving the components of biological diversity in the Mediterranean;

- contain ecosystems specific to the Mediterranean area or the habitats of endangered species;

- are of special interest at the scientific, aesthetic or cultural levels.

3. The SPAMI List may only include protected areas that have protected status and adequate management methods and capacity to allow them to contribute towards the sustainable conservation of the natural and cultural heritage of the Mediterranean.
4. The Parties agree:

   (a) to recognize the particular importance of these areas for the Mediterranean;

   (b) to comply with the measures applicable to the SPAMIs and not to authorize or undertake any activities that might be contrary to the objectives for which the SPAMIs were established.

Article 9

PROCEDURE FOR INCLUSION IN THE SPAMI LIST

1. Proposals for inclusion in the List may be submitted:

   (a) by the Party concerned, if the area is situated in a zone already defined, over which it exercises sovereignty or jurisdiction;

   (b) jointly by two or more neighbouring Parties concerned if the area is situated on the high sea;

   (c) jointly by the neighbouring Parties concerned in areas where the limits of national sovereignty or jurisdiction have not yet been defined.

2. Parties making proposals shall provide the Centre with an introductory report containing information on the area's geographical location, its physical and ecological characteristics, the background to its establishment, its legal status, its management plans and the means for their implementation, as well as a statement justifying its Mediterranean importance.

3. The procedure for inclusion of the proposed area in the List is the following:

   (a) for each area, the proposal shall be submitted to the National Focal Points, which shall examine its conformity with the common guidelines and criteria adopted pursuant to Article 18;

   (b) if a proposal made in accordance with subparagraph 1 (a) of this Article is consistent with the guidelines and common criteria, after assessment, the Centre shall inform the meeting of the Parties, which decide to include the area in the SPAMI List;
(c) if a proposal made in accordance with subparagraphs 1 (b) and 1 (c) of this Article is consistent with the guidelines and common criteria, the Centre shall transmit it to the Organization, which shall inform the meeting of the Parties. The Parties decide to include the area in the SPAMI List by consensus.

4. The Parties which proposed the inclusion of the area in the List shall implement the protection and conservation measures specified in their proposals in accordance with paragraph 2 of this Article. The Contracting Parties undertake to observe the rules thus laid down. The Centre shall inform the competent international organizations of the List and of the measures taken in the SPAMls.

5. The Parties may revise the SPAMI List. To this end, the Centre shall prepare a report.

Article 10

CHANGES IN THE STATUS OF SPAMls

Changes in the delimitation or legal status of a SPAMI or the suppression of all or part of such an area shall not be decided upon unless there are important reasons for doing so, taking into account the need to safeguard the environment and comply with the obligations laid down in this Protocol and a procedure similar to that followed for the creation of the SPAMI and its inclusion in the List shall be observed.

PART III

PROTECTED SPECIES

Article 12

NATIONAL MEASURES FOR THE PROTECTION AND CONSERVATION OF SPECIES

1. The Parties shall manage species of flora and fauna with the aim of maintaining them in a favourable state of conservation.

2. The Parties shall, in the zones situated on the landward side of the external limit of their territorial sea, identify and compile lists of the endangered or threatened species of flora and fauna and accord protected status to such species. The Parties
shall regulate and, where appropriate, prohibit activities having adverse effects on such species or their habitats, and carry out management, planning and other measures to ensure a favourable state of conservation of such species.

3. With respect to protected species of fauna, the Parties shall control and, where appropriate, prohibit:

   (a) the taking, possession or killing (including, to the extent possible, the incidental taking, possession or killing), the commercial trade, the transport and the exhibition for commercial purposes of these species, their eggs, parts or products;

   (b) to the extent possible, the disturbance of wild fauna, particularly during the period of breeding, incubation, hibernation or migration, as well as other periods of biological stress.

4. In addition to the measures specified in the previous paragraph, the Parties shall coordinate their efforts, through bilateral or multilateral action, including if necessary, agreements for the protection and recovery of migratory species whose range extends into the area to which this Protocol applies.

5. With respect to protected species of flora and their parts and products, the Parties shall regulate, and where appropriate, prohibit all forms of destruction and disturbance, including the picking, collecting, cutting, uprooting, possession of, commercial trade in, or transport and exhibition for commercial purposes of such species.

6. The Parties shall formulate and adopt measures and plans with regard to ex situ reproduction, in particular captive breeding, of protected fauna and propagation of protected flora.

7. The Parties shall endeavour, directly or through the Centre, to consult with range States that are not Parties to this Protocol, with a view to coordinating their efforts to manage and protect endangered or threatened species.

8. The Parties shall make provision, where possible, for the return of protected species exported or held illegally. Efforts should be made by Parties to reintroduce such specimens to their natural habitat.
Article 13

COOPERATIVE MEASURES FOR THE PROTECTION AND CONSERVATION OF SPECIES

1. The Parties shall adopt cooperative measures to ensure the protection and conservation of the flora and fauna listed in the Annexes to this Protocol relating to the List of Endangered or Threatened Species and the List of Species whose Exploitation is Regulated.

2. The Parties shall ensure the maximum possible protection and recovery of the species of fauna and flora listed in the Annex relating to the List of Endangered or Threatened Species by adopting at the national level the measures provided for in paragraphs 3 and 5 of Article 12 of this Protocol.

3. The Parties shall prohibit the destruction of and damage to the habitat of species listed in the Annex relating to the List of Endangered or Threatened Species and shall formulate and implement action plans for their conservation or recovery. They shall continue to cooperate in implementing the relevant action plans already adopted.

4. The Parties, in cooperation with competent international organizations, shall take all appropriate measures to ensure the conservation of the species listed in the Annex relating to the List of Species whose Exploitation is Regulated while at the same time authorizing and regulating the exploitation of these species so as to ensure and maintain their favourable state of conservation.

5. When the range area of a threatened or endangered species extends to both sides of a national frontier or of the limit that separates the territories or the areas subject to the sovereignty or the national jurisdiction of two Parties to this Protocol, these Parties shall cooperate with a view to ensuring the protection and conservation and, if necessary, the recovery of such species.

6. Provided that no other satisfactory solutions are available and that the exemption does not harm the survival of the population or of any other species, the Parties may grant exemptions to the prohibitions prescribed for the protection of the species listed in the Annexes to this Protocol for scientific, educational or management purposes necessary to ensure the survival of the species or to prevent significant damage. Such exemptions shall be notified to the Contracting Parties.
Article 14

INTRODUCTION OF NON-INDIGENOUS OR GENETICALLY MODIFIED SPECIES

1. The Parties shall take all appropriate measures to regulate the intentional or accidental introduction of non-indigenous or genetically modified species to the wild and prohibit those that may have harmful impacts on the ecosystems, habitats or species in the area to which this Protocol applies.

2. The Parties shall endeavour to implement all possible measures to eradicate species that have already been introduced when, after scientific assessment, it appears that such species cause or are likely to cause damage to ecosystems, habitats or species in the area to which this Protocol applies.

PART IV

PROVISIONS COMMON TO PROTECTED AREAS AND SPECIES

Article 16

AMENDMENTS TO ANNEXES

1. The procedures for amendments to Annexes to this Protocol shall be those set forth in Article 17 of the Convention.

2. All proposed amendments submitted to the meeting of Contracting Parties shall have been the subject of prior evaluation by the meeting of National Focal Points.

Article 17

INVENTORIES

Each Party shall compile comprehensive inventories of:

(a) areas over which they exercise sovereignty or jurisdiction that contain rare or fragile ecosystems, that are reservoirs of biological diversity, that are important for threatened or endangered species;

(b) species of fauna or flora that are endangered or threatened.
Article 18

ESTABLISHMENT OF GUIDELINES AND COMMON CRITERIA

The Parties shall adopt:

(a) common criteria for the choice of protected marine and coastal areas that could be included in the SPAMI List which shall be annexed to the Protocol;

(b) common criteria for the inclusion of additional species in the Annexes;

(c) guidelines for the establishment and management of protected areas.

The criteria and guidelines referred to in paragraphs (b) and (c) may be amended by the meeting of the Parties on the basis of a proposal made by one or more Parties.

Article 19

ENVIRONMENTAL IMPACT ASSESSMENT

In the planning process leading to decisions on industrial and other projects and activities that could significantly affect protected areas and species and their habitats, the Parties shall evaluate and take into consideration the possible direct or indirect, immediate or long-term, impact, including the cumulative impact of the projects and activities being contemplated.

Article 20

INTEGRATION OF TRADITIONAL ACTIVITIES

1. In formulating protective measures, the Parties shall take into account the traditional subsistence and cultural activities of their local populations. They shall grant exemptions, as necessary, to meet such needs. No exemption which is allowed for this reason shall:

(a) endanger either the maintenance of ecosystems protected under this Protocol or the biological processes contributing to the maintenance of those ecosystems;
(b) cause either the extinction of, or a substantial reduction in, the number of individuals making up the populations or species of flora and fauna, in particular endangered, threatened, migratory or endemic species.

2. Parties which grant exemptions from the protection measures shall inform the Contracting Parties accordingly.

Article 21

PUBLICITY, INFORMATION, PUBLIC AWARENESS AND EDUCATION

1. The Parties shall give appropriate publicity to the establishment of protected areas, their boundaries, buffer zones, applicable regulations, and to the designation of protected species, their habitats and applicable regulations.

2. The Parties shall endeavour to inform the public of the interest and value of protected areas and species, and of the scientific knowledge which may be gained from the point of view of nature conservation and other points of view. Such information should have an appropriate place in education programmes. The Parties shall also endeavour to promote the participation of their public and their conservation organizations in measures that are necessary for the protection of the areas and species concerned, including environmental impact assessments.

Article 22

SCIENTIFIC, TECHNICAL AND MANAGEMENT RESEARCH

1. The Parties shall encourage and develop scientific and technical research relating to the aims of this Protocol. They shall also encourage and develop research into the sustainable use of protected areas and the management of protected species.

2. The Parties shall consult, when necessary, among themselves and with competent international organizations with a view to identifying, planning and undertaking scientific and technical research and monitoring programmes necessary for the identification and monitoring of protected areas and species and assessing the effectiveness of measures taken to implement management and recovery plans.

3. The Parties shall exchange, directly or through the Centre, scientific and technical information concerning current and planned research and monitoring programmes and the results thereof. They shall, to the fullest extent possible, coordinate their research and monitoring programmes, and endeavour jointly to define or standardize their procedures.
4. In technical and scientific research, the Parties shall give priority to SPAMIs and species appearing in the Annexes to this Protocol.

**Article 23**

**MUTUAL COOPERATION**

1. The Parties shall, directly or with the assistance of the Centre or international organizations concerned, establish cooperation programmes to coordinate the establishment, conservation, planning and management of protected areas, as well as the selection, management and conservation of protected species. There shall be regular exchanges of information concerning the characteristics of protected areas and species, the experience acquired and the problems encountered.

2. The Parties shall, at the earliest opportunity, communicate any situation that might endanger the ecosystems of protected areas or the survival of protected species of flora and fauna to the other Parties, to the States that might be affected and to the Centre.

**Article 24**

**MUTUAL ASSISTANCE**

1. The Parties shall cooperate, directly or with the assistance of the Centre or the international organizations concerned, in formulating, financing and implementing programmes of mutual assistance and assistance to developing countries that express a need for it with a view to implementing this Protocol.

2. These programmes shall include public environmental education, the training of scientific, technical and management personnel, scientific research, the acquisition, utilization, design and development of appropriate equipment, and transfer of technology on advantageous terms to be agreed among the Parties concerned.

3. The Parties shall, in matters of mutual assistance, give priority to the SPAMIs and species appearing in the Annexes to this Protocol.

**Article 25**

**REPORTS OF THE PARTIES**

The Parties shall submit to ordinary meetings of the Parties a report on the implementation of this Protocol, in particular on:
(a) the status of the areas included in the SPAMI List;
(b) any changes in the delimitation or legal status of the SPAMIs and protected species;
(c) possible exemptions allowed pursuant to Articles 13 and 20 of this Protocol.

PART V
INSTITUTIONAL PROVISIONS

Article 27
NATIONAL FOCAL POINTS

Each Party shall designate a National Focal Point to serve as liaison with the Centre on the technical and scientific aspects of the implementation of this Protocol. The National Focal Points shall meet periodically to carry out the functions deriving from this Protocol.

Article 28
COORDINATION

1. The Organization shall be responsible for coordinating the implementation of this Protocol. For this purpose, it shall receive the support of the Centre, to which it may entrust the following functions:

(a) assisting the Parties, in cooperation with the competent international, intergovernmental and non-governmental organizations, in:

- establishing and managing specially protected areas in the area to which this Protocol applies;
- conducting programmes of technical and scientific research as provided for in Article 22 of this Protocol;
- conducting the exchange of scientific and technical information among the Parties as provided for in Article 22 of this Protocol;
- preparing management plans for protected areas and species;
- developing cooperative programmes pursuant to Article 23 of this Protocol;
- preparing educational materials designed for various groups;
(b) convening and organizing the meetings of the National Focal Points and providing them with secretariat services;

(c) formulating recommendations on guidelines and common criteria pursuant to Article 18 of this Protocol;

(d) creating and updating databases of protected areas, protected species and other matters relevant to this Protocol;

(e) preparing reports and technical studies that may be required for the implementation of this Protocol;

(f) elaborating and implementing the training programmes mentioned in Article 24, paragraph 2;

(g) cooperating with regional and international governmental and non-governmental organizations concerned with the protection of areas and species, provided that the specificity of each organization and the need to avoid the duplication of activities are respected;

(h) carrying out the functions assigned to it in the action plans adopted in the framework of this Protocol;

(i) carrying out any other function assigned to it by the Parties.

Article 29

MEETINGS OF THE PARTIES

1. The ordinary meetings of the Parties to this Protocol shall be held in conjunction with the ordinary meetings of the Contracting Parties to the Convention held pursuant to Article 14 of the Convention. The Parties may also hold extraordinary meetings in conformity with that Article. [Take into account any changes in the Convention]

2. The meetings of the Parties to this Protocol are particularly aimed at:

(a) keeping under review the implementation of this Protocol;

(b) overseeing the work of the Organization and of the Centre relating to the implementation of this Protocol and providing policy guidance for their activities;
(c) considering the efficacy of the measures adopted for the management and protection of areas and species, and examining the need for other measures, in particular in the form of Annexes and amendments to this Protocol or to its Annexes;

(d) adopting the guidelines and common criteria provided for in Article 18 of this Protocol;

(e) considering reports transmitted by the Parties under Article 25 of this Protocol, as well as any other pertinent information which the Parties transmit through the Centre;

(f) making recommendations to the Parties on the measures to be adopted for the implementation of this Protocol;

(g) examining the recommendations of the meetings of the National Focal Points pursuant to Article 27 of this Protocol;

(h) examining any other matter relevant to this Protocol, as appropriate.

(i) discussing and evaluating the exemptions allowed by the Parties in conformity with Articles 13 and 20 of this Protocol.

PART VI

FINAL PROVISIONS

Article 30

EFFECT OF THE PROTOCOL ON DOMESTIC LEGISLATION

The provisions of this Protocol shall not affect the right of Parties to adopt relevant stricter domestic measures for the implementation of this Protocol.

Article 31

RELATIONSHIP WITH THIRD PARTIES

1. The Parties shall invite States that are not Parties to the Protocol and international organizations to cooperate in the implementation of this Protocol.
2. The Parties undertake to adopt appropriate measures, consistent with international law, to ensure that no one engages in any activity contrary to the principles or purposes of this Protocol.

Article 32

SIGNATURE

This Protocol shall be open for signature at [place] from [date] to [date], by any Contracting Party to the Convention.

Article 33

RATIFICATION, ACCEPTANCE OR APPROVAL

This Protocol shall be subject to ratification, acceptance or approval. Instruments of ratification, acceptance or approval shall be deposited with the Government of Spain, which will assume the functions of Depositary.

Article 34

ACCESSION

As from [date], this Protocol shall be open for accession by any State and regional economic grouping which is Party to the Convention.

Article 35

[ENTRY INTO FORCE]

1. This Protocol shall enter into force on the thirtieth day following the deposit of at least six instruments of ratification, acceptance or approval of, or accession to, the Protocol.

2. From the date of its entry into force, this Protocol shall replace the Protocol Concerning Mediterranean Specially Protected Areas, open for signature at Geneva on 3 April 1982, in the relationship among the Parties to both instruments.
In witness whereof, the undersigned, being duly authorized, have signed this Protocol.

Done at [place], on [date], in a single copy in the Arabic, English, French and Spanish languages, the four texts being equally authoritative, for signature by any Party to the Convention.]
