Introduction

2. Article 27 of the revised Convention provides for:

   The meetings of the Contracting Parties shall, on the basis of periodical reports referred to in Article 26 and any other report submitted by the Contracting Parties, assess the compliance with the Convention and the Protocols as well as the measures and recommendations. They shall recommend, when appropriate, the necessary steps to bring about full compliance with the Convention and the Protocols and promote the implementation of the decisions and recommendations.

3. The Contracting Parties in 1996 committed themselves to set up a reporting system under the Barcelona Convention and its Protocols. In Catania, at their 13th meeting (2003), the Contracting Parties decided to start implementing Article 26 of the revised Convention by promoting the preparation and submission of the national reports on the implementation of the Barcelona Convention and its Protocols.

4. They also decided to establish a Working Group of Legal and Technical experts on Compliance (hereinafter called “Working Group”) for preparing a document-platform related to a possible compliance mechanism under the Barcelona Convention. The Working Group held two meetings in Athens (first meeting on 8 and 9 November 2004 and second meeting on 11 and 12 April 2005) in order to review the legal basis for the establishment of a compliance mechanism and to elaborate a possible compliance mechanism under the Barcelona Convention and its Protocols. At its first meeting the Working Group discussed a document prepared by the Secretariat entitled “Setting up an implementation and compliance mechanism under the Barcelona Convention and its Protocols”. The Working Group asked the Secretariat to revise this document based on the discussion at its first meeting and to submit a revised document to its second meeting. Furthermore it asked the Secretariat to prepare “a draft paper on the main elements for a possible compliance mechanism on the basis of its findings and conclusions”, including “draft criteria to be applied by the CPs in proposing candidates for membership in the Compliance Committee”. At its second meeting (held on 11 and 12 April 2005 in Athens) the Working Group of Legal and Technical experts on Compliance discussed the revised document on “setting up an implementation and compliance mechanism under the Barcelona Convention and its Protocols” as well as a “draft paper on the main elements for a possible compliance mechanism”.

5. As a result of its work at the two meetings the Working Group on Implementation and Compliance under the Barcelona Convention presented a “draft paper on the main elements for a possible compliance mechanism” under the Barcelona Convention and its Protocols to the 14th Meeting of the Contracting Parties in 2005. The draft paper drew upon the experience of international and regional international agreements addressing environmental issues, which had established compliance mechanisms and procedures. Attention was focused on international agreements to which Parties to the Barcelona Convention and its Protocols are parties. In particular, the compliance mechanisms and procedures established under the Montreal Protocol on Substances that Deplete the Ozone Layer, the Basel Convention on Transboundary Movement of Hazardous Wastes and Their Disposal, the Cartagena Protocol on Biological Safety and the Kyoto Protocol to the United Nations Framework Convention on Climate Change served as sources for the elaboration of elements for a compliance mechanism under the Barcelona Convention and its Protocol. Furthermore, implementation and compliance procedures established under the Berne...
Convention for the Conservation of European Wildlife and Natural Habitats, the Convention on Long-Range Transboundary Air Pollution, the Espoo Convention, the Aarhus Convention, the Protocol on Water and Health under the Convention on the Protection of Transboundary Water Courses and International Lakes and the OSPAR Convention were taken into consideration. Moreover, the experience gained by international organisations, such as IMO and WHO, in dealing with issues of implementation of and compliance with international agreements, was considered in the elaboration of the elements of a compliance mechanism under the Barcelona Convention and its Protocols.

6. The 14th Meeting of the Contracting Parties decided to extend the mandate of the Working Group on implementation and compliance and its membership to include all Contracting Parties with a view to developing a full compliance mechanism for adoption by the 15th Meeting of the Contracting Parties in 2007. It stated that the Working Group should develop the compliance mechanism on the basis of the principles, findings, recommendations and deliberations set out in document UNEP(DEC)MED WG.270/7.
Draft Text for a compliance mechanism

The following draft text for a possible compliance mechanism, based on the principles, findings, recommendations and deliberations set out in document UNEP(DEC)/MED WG.270/7, is submitted to the third meeting of the Working Group for further consideration. The draft text intends to propose to the meeting a full compliance mechanism as has been requested by the 14th Meeting of the Contracting Parties. In elaborating the draft text the structure of already established compliance mechanisms and procedures under other multilateral environmental agreements to which Contracting Parties are parties has been followed. The new text (added to the text already considered by the Working Group at its second meeting and transmitted to the 14th Meeting of the Contracting Parties in document UNEP(DEC)/MED WG.270/7) is set out in bold and is underlined.

I. Objective (of the compliance mechanism)

15. In electing members and their alternates of the Committee, the Meeting of the Contracting Parties is to be guided by equitable geographic representation and by rotation in order to ensure participation by nominated individuals of all Contracting Parties as members of the Committee within a reasonable period of time as well as balance among scientific, legal and technical expertise.
