Offshore Monitoring Programmes

Greece, 3-4 April 2017

Agenda item 3: Offshore Monitoring Programme

Lists of substances addressed under the Convention for the Protection of the Marine Environment of the North-East Atlantic (the 'OSPAR Convention') (i.e. LSPC and PLONOR), and by Cefas OCNS (i.e. CHARM)

For environmental and economic reasons, this document is printed in a limited number. Delegates are kindly requested to bring their copies to meetings and not to request additional copies.

Introduction

The Mediterranean Offshore Action Plan in the framework of the Protocol for the Protection of the Mediterranean Sea against Pollution resulting from Exploration and Exploitation of the Continental Shelf and the Seabed and its Subsoil (Mediterranean Offshore Action Plan) adopted by the Nineteenth Ordinary Meeting of the Contracting Parties to the Convention for the Protection of the Marine Environment and the Coastal Region of the Mediterranean (Barcelona Convention) and its Protocols, which was held in Athens, Greece, from 9 to 12 February 2016, under Specific Objective 7.c, requests Contracting Parties to identify the required modifications of Annex I, II and III to the Protocol for the protection of the Mediterranean Sea against pollution resulting from exploration and exploitation of the continental shelf and the seabed and its subsoil (Offshore Protocol) and definition of which chemicals should be covered and not covered by such standards and under which conditions.

The lists of substances already prepared by the Convention for the Protection of the Marine Environment of the North-East Atlantic (the ‘OSPAR Convention’), for instance the List of Substances of Possible Concern (LSPC), the List of Substances Used and Discharged Offshore which Are Considered to Pose Little or No Risk to the Environment (PLONOR), and the Offshore Chemical Notification Scheme (OCNS) Chemical Hazard and Risk Management (CHARM) from the Centre for Environment, Fisheries and Aquaculture Science (Cefas), reproduced in Annex I, Annex II and Annex III to current document respectively are being proposed in the context of the suggested changes to Annex II to the Offshore Protocol, as detailed in document UNEP(DEPI)/MED WG.434/3.
