# ABNJ Deep Seas Project:

Sustainable Fisheries Management and Biodiversity Conservation of  
Deep-sea Living Marine Resources and Ecosystems in ABNJ

Area-based planning in ABNJ

**Hannah Thomas**

Project Manager, UN Environment World Conservation Monitoring Centre (UNEP-WCMC)

Hydrothermal vents

Deep sea sponges

Cold water corals

Cold seeps

Seamounts

Rich seamount biodiversity

Deep sea fishing

Deep sea mining

Shipping

Cable laying

Very Low Impact   Low Impact   Medium High Impact   Very High Impact

# Ecosystem-based management

## Core Principles

- 1) Maintain **connectivity** within and across ecosystems
- 2) Support **ecosystem services**
- 3) Understand and address **cumulative impacts**
- 4) Manage for multiple objectives (**multi-sectoral**)
- 5) **Learn** and adapt

# Area-based planning for ecosystem-based management

MPA network planning

Marine Spatial Planning

Trade-off analyses

Cumulative impacts

Ecosystem service assessments

# Developing and testing a methodology for area-based planning in ABNJ

## Objectives

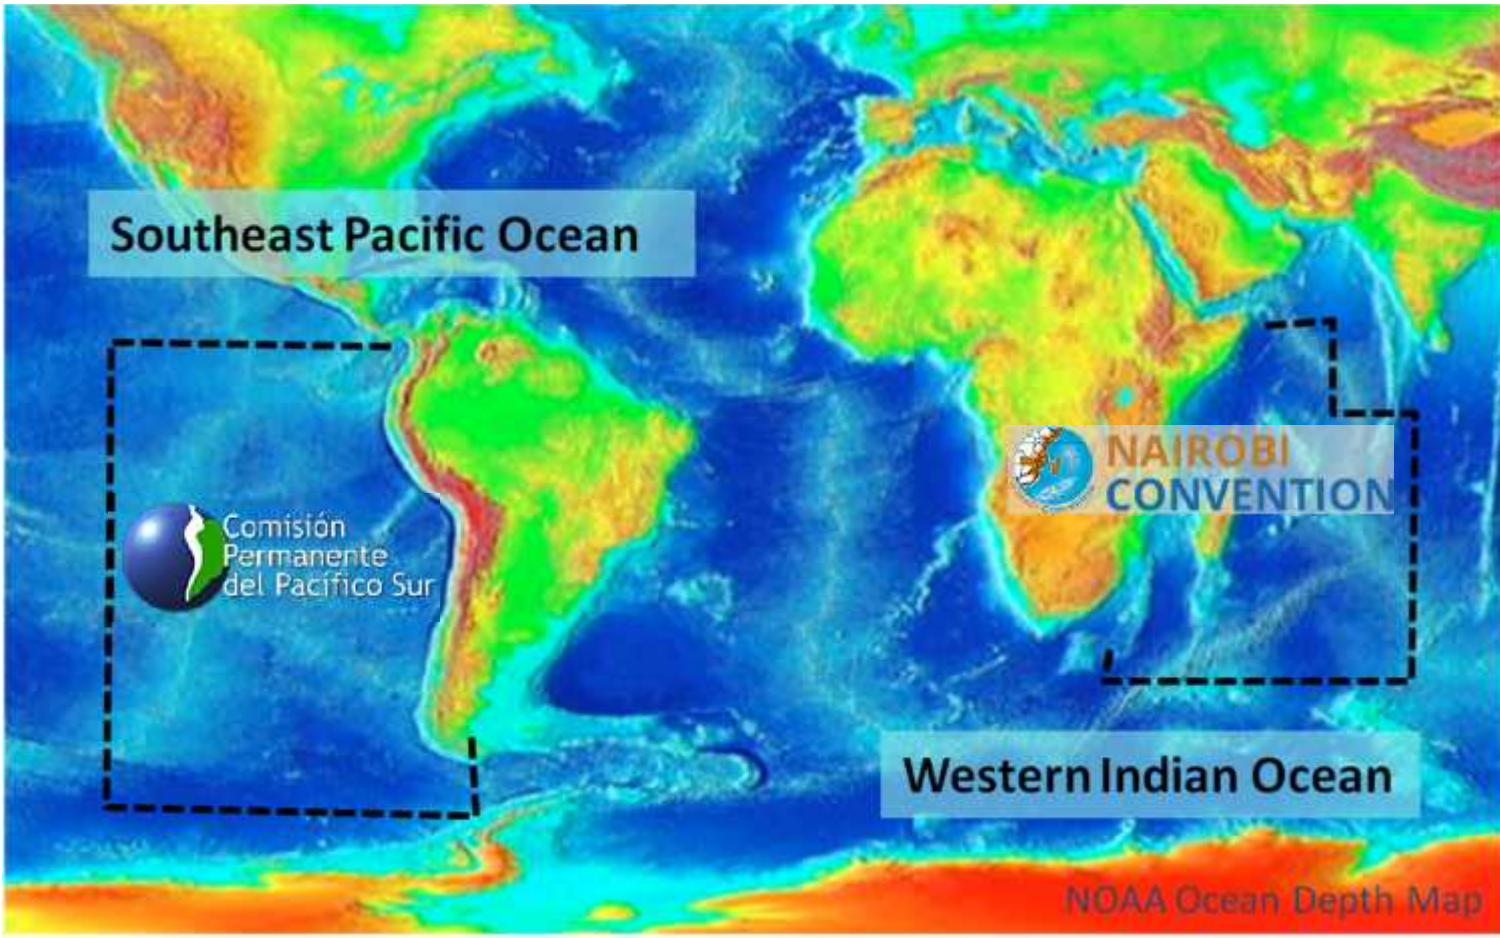

- Apply the ecosystem-based management methodology to ABNJ
- Adapt and further develop suitable area-based planning tools
  - Review applicability of area-based planning tools to ABNJ
  - Gather experiences and good practices from other regions
  - Understand the relevant governance frameworks
- Build capacity in the pilot regions for area-based planning in ABNJ
  - Support a planning process that incorporates ABNJ
  - Test area-based planning approaches and tools
  - Provide policy-relevant advice

# Developing and testing a methodology for area-based planning in ABNJ

Pilot regions

## ACTIVITIES & OUTPUTS

### Phase 1: Information gathering

Regional case studies

Review of suitable area-based planning tools

Study on governance and legal frameworks

Inventory of ABNJ datasets

Connectivity study

Capacity assessment

## METHODOLOGY

- Build knowledge base
- Take stock of existing management practices
- Develop a common understanding of the ecosystem
- Recognize connections within and across ecosystems
- Assess existing capacity

ACTIVITIES & OUTPUTS

ACTIVITIES & OUTPUTS

Phase 1: Information gathering

Phase 2: Analysis & synthesis

METHODOLOGY

Regional case studies

Review of suitable area-based planning tools

Study on governance and legal frameworks

Inventory of ABNJ datasets

Connectivity study

Capacity assessment

Reviews & studies

Data & tools

Capacity development

Stakeholder engagement

## ACTIVITIES & OUTPUTS

### Phase 1: Information gathering

Regional case studies

Review of suitable area-based planning tools

Study on governance and legal frameworks

Inventory of ABNJ datasets

Connectivity study

Capacity assessment

## ACTIVITIES & OUTPUTS

### Phase 2: Analysis & synthesis

Synthesis: area-based planning options and recommendations

Cumulative impacts assessment

Ecosystem service assessment

Knowledge sharing workshops

Sectoral engagement

## METHODOLOGY

- Choose area-based planning strategy
- Adapt and further develop suitable area-based planning tools to ABNJ and connected EEZs
- Build capacity for area-based planning
- Develop opportunities for sectors to come together

ACTIVITIES & OUTPUTS

ACTIVITIES & OUTPUTS

ACTIVITIES & OUTPUTS

Phase 1: Information gathering

Phase 2: Analysis & synthesis

Phase 3: Testing

METHODOLOGY

Regional case studies

Review of suitable area-based planning tools

Study on governance and legal frameworks

Inventory of ABNJ datasets

Connectivity study

Capacity assessment

Synthesis: area-based planning options and recommendations

Cumulative impacts assessment

Ecosystem service assessment

Knowledge sharing workshops

Sectoral engagement

ACTIVITIES & OUTPUTS

Phase 1: Information gathering

Regional case studies

Review of suitable area-based planning tools

Study on governance and legal frameworks

Inventory of ABNJ datasets

Connectivity study

Capacity assessment

ACTIVITIES & OUTPUTS

Phase 2: Analysis & synthesis

Synthesis: area-based planning options and recommendations

Cumulative impacts assessment

Ecosystem service assessment

Knowledge sharing workshops

Sectoral engagement

ACTIVITIES & OUTPUTS

Phase 3: Testing

Policy messages

Area-based planning scenario development

Capacity re-assessment and lessons learned

Policy maker outreach

METHODOLOGY

- Provide policy-relevant advice
- Evaluate management options and examine trade-offs
- Understand lessons learned and good practices

Reviews & studies

Data & tools

Capacity development

Stakeholder engagement

**Regional case studies**

**Review of suitable area-based planning tools**

**Study on governance and legal frameworks**

**Inventory of ABNJ datasets**

**Connectivity study**

**Capacity assessment**

**Synthesis: area-based planning options and recommendations**

**Cumulative impacts assessment**

**Ecosystem service assessment**

**Knowledge sharing workshops**

**Sectoral engagement**

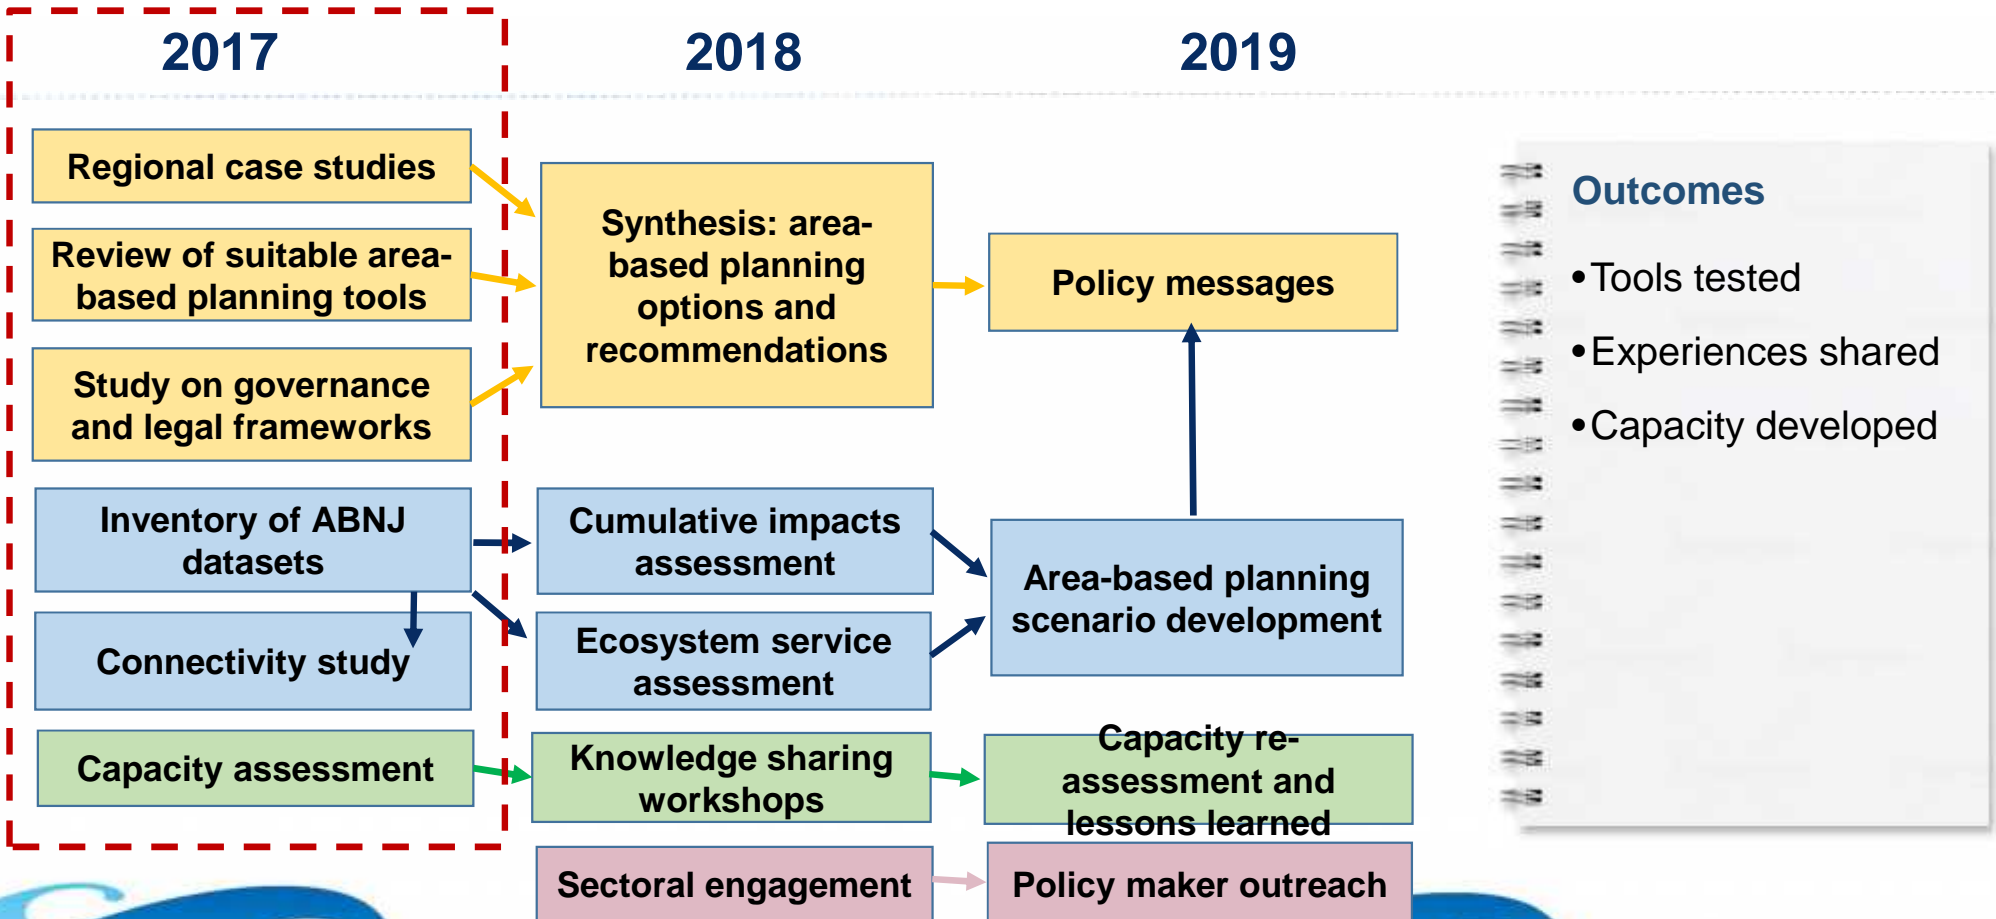

**Policy messages**

**Area-based planning scenario development**

**Capacity re-assessment and lessons learned**

**Policy maker outreach**

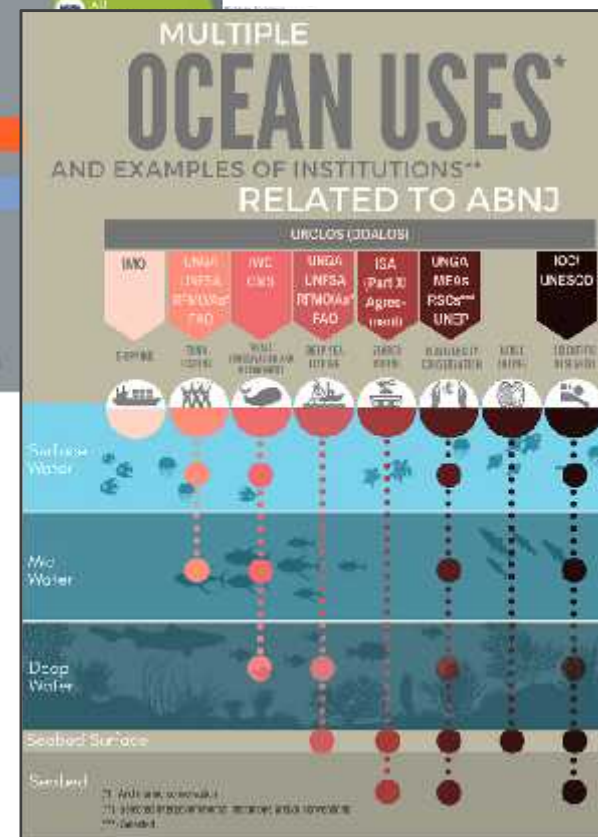

# Governance study: Institutional arrangements and cross-sectoral cooperation

- Limited cross-sectoral cooperation in the region
- Strengthen cross-sectoral cooperation in two regions
- Make a plan for ABNJ
- Nairobi Convention can be an important forum for discussion on ABNJ issues

<http://wcmc.io/ABNJInstitutionalArrangements>

# Learning from experiences: Case studies of regional area-based planning

## Factors influencing success

- Governance
- Ecosystem-based
- Data quality
- Enforcement
- Stakeholder engagement

## Next steps

- Review Dec 2017
- Review to be published Jan 2018

# Assessing the suitability of area-based planning tools for ABNJ

Trade-off tools?

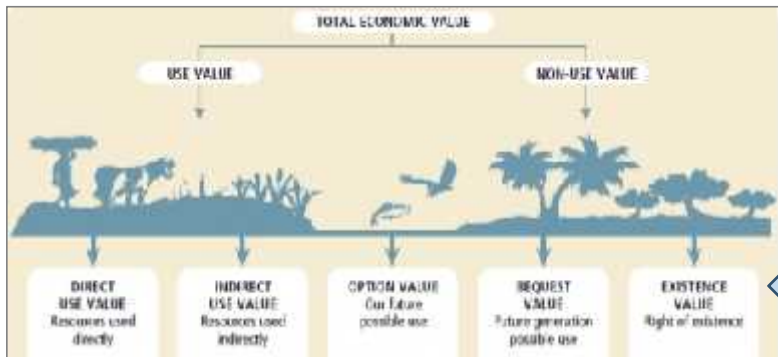

Marine spatial planning?

MPA networks?

Ecosystem service valuation?

## Suitability elements

- Legal framework
- Governance
- Data
- Geological/ecological conditions

## Next steps

- Expert Workshop Feb 2018
- Present final draft at March Focal Points mtg
- Review to be published April 2018

# Assessing regional capacity

# Collating ABNJ data

## Inventory of GLOBAL marine biodiversity datasets

- Over 100 datasets of biodiversity characteristics
- Standardised metadata sheets and interactive pdfs for half the datasets

## Inventory of REGIONAL marine datasets

- Starting in November 2017
- Nairobi Convention Sec coordination
- Supported by other project partners

<http://wcmc.io/WIOdata>

# Adapting area-based planning tools for ABNJ

Transboundary  
y connectivity

Regional  
cumulative  
impacts

# Synthesis: area-based planning options and recommendations

## Next steps:

- Published May 2018
- Presented at ABNJ Deep Seas workshop (2018)
- Foundation for Nairobi Convention decisions
