Ozone and climate: Restored by a world united

September 16 – the date on which the entire world community celebrates the International Day for the Preservation of the Ozone Layer after UN General Assembly adopted the resolution in 1994 to commemorate the signing of the Montreal Protocol – the most powerful policy tool for issues to prevent negative effects of ozone depletion.

Under the tagline for the International Ozone Day 2016: **“Working towards reducing global-warming HFCs under the Montreal Protocol”** series of events were held in the capital, 12 regions of Uzbekistan and Karakalpakstan Republic.

From September 13 to September 14, representatives of national and local mass media of Uzbekistan set out on a media-tour along the route of the Ozone Layer recovery where they learned the practical implementation of declared initiatives on the example of several enterprises in the Fergana Valley.

“We took part in the media-tour over the enterprises of Fergana Valley to see the example measures taken in our country to preserve the ozone layer. Besides, we have witnessed the transfer of special equipment to the service centres. It was interesting to learn that a great attention is payed to the educational aspects as well, to inform specialists how to use the newly brought installations and equipment, its influence on the ozone layer and many other,” said **journalist from the Truth of Fergana newspaper, Ms. Kamola Parvonova.**

39 journalists from local and republican TV, Radio, Newspapers and web-editions took part in the media-tour, initiated by UNDP in Uzbekistan and the State Committee for Nature Protection of the Republic of Uzbekistan.

About 10 TV and 8 radio reports, over 50 articles highlighted information on the media-tour:
