

Integrated SC toolkit to improve the transmission of information under Articles 07 and 15

Project concept and national activities

Project Concept

Approach – based on discussions

Trainings/capacity building curriculum

- **“Targeted training”**
- Reporting obligations/Reporting system understanding
- QA&QC
- Data collection and management systems (build capacity as to be able to carry on after the project ends)
- Inventories

Gap analysis

- **SOURCES:**
- NIP and reporting data collected
- individual gap analysis
- inventory data (e.g. from NIP, projects, other sources)

National activities

- Undertaking targeted trainings/capacity building
- Finalizing the individual gap analysis
- Addressing any challenges
- IT interface with existent with data collection and management systems

Mapping out national activities needs – for further discussions

Country	Trainings/capacity building curriculum	QA/QC	IT interface between toolkit and national systems	Synergies with other data collection and management projects	Other e.g. MapX, GIS
Moldova	New POPs inventories Reporting Data collection and management	Yes	PRTR, WMIS...	Special Programme	
Ukraine	New POPs inventories Reporting Data collection and management	Yes	National Registry...	PCBs Project	
Kenya	New POPs inventories Relevance of reporting Data collection and management	Yes	ChemObs...	ChemObs	
Madagascar	Reporting Data collection Data collection and management	Yes	ChemObs...	ChemObs SADC PCB project	
Saint Lucia	New POPs inventories Reporting Data collection and management	Yes	New system to be set...	On going environment management system project	
Honduras	New POPs inventories Reporting Data collection and management	Yes	PRTR, PCBs database...	Project on system to manage pesticides related to public health	
Cambodia	Reporting Data management Data collection and management	Yes	PRTR....	PRTR	
Papua New Guinea	New POPs inventories Reporting Data collection and management	Yes	No system to link to it	?
