DIRECTORY OF EXPERTS AND INSTITUTIONS ON SOILS AND FERTILIZERS IN AFRICA

COMPILED BY:

R.D. ASIAMAH
DIRECTOR

KWADASO-KUMASI, GHANA

FEBRUARY 1995

PREFACE

The African Ministerial Conference on the Environment (AMCEN) decided and recommended the establishment of Eight Regional Technical Cooperation Networks on environment and ecodevelopment in Africa during their meeting in Cairo, Egypt, in December, 1985.

Paramount among the decisions and recommendation made in establishing the Networks were:

1. Cooperation among the technical and research institutions of African States should be strengthened and developed through the exchange of information and the conduct of the basic studies and scientific research necessary for the environmentally sound utilization of African resources.
2. Strengthening and development of technical co-operation among African Countries through the development of horizontal scientific and technical links between national departments in specific areas.

The management of the Soils and Fertilizers network (SOFERNET) decided that this Directory is produced to help it achieve these mandates of the Network.

The Directory contains lists of institutions and experts in each country involved in soils and fertilizers research and application activities.

The list of countries, institutions and experts are in alphabetical orders. The Directory will make it easy for contacts to be made with Institutions and experts for SOFERNET activities.

The compilation of the lists started in 1990 and this is the first publication which will continuously be reviewed. There are still no inputs from some countries and Institutions. Efforts will be made to get all institutions and experts listed in future editions.

Meanwhile, SOFERNET requires updating of the lists in the countries and results sent to its Secretariat for incorporation into the future editions which will be published every two years.

SOFERNET is grateful to FAO Regional Office for Africa in Accra for its immense assistance.
