* **Micro-site**

A microsite is a separately promoted part of a larger website. A microsite is designed to meet separate objectives and has a separate web address (or Uniform Resource Locator) as its home page. Typically, a microsite resides on the same web server and reflects the branding and overall visual design of the larger site with which it is associated.

7 GLOSSARY

TWITTER

This month, UNEP's Twitter account recorded a 3.1% increase in followers from 406,417 to 420,711. Greater overall engagement numbers with the audience likely contributed to the rise to 7.7M impressions, an average of 240K per day. This growth is mainly attributed to more frequent tweeting to accommodate a larger percentage of UNEP's diverse audience and engagement with accounts whose following is based on a similar mandate as that of UNEP's.

In addition to the overall increase in impressions and engagement, review of analytics data informed that UNEP's Twitter audience is likely to engage with positive and informative news on the SDG's, climate change and climate pledge submissions from different countries ahead of COP21.

What worked:

- + News on renewables
- + UN observance content
- + INDC submission news
- + News on climate change
- + #DidYouKnow tweets

What did not work:

- + Text-only Tweets
- + Images of press conferences

FACEBOOK

This month Facebook account recorded a 3.2% increase in followers bringing the total number of fans to 171,761, up from 166,416. This increase in numbers is mainly attributed to a change in the nature of posts to fit users' preferences based on ongoing audience behavior analysis. The new approach features more interactive posts with news and videos resulting in the greatest user engagement. Changes in the content in posts has recorded increases in fans and engagement rate in the face of Facebook's News Feed algorithm changes in 2015, which have made company/organization pages less likely to be placed in front of potential new followers (unless paid promotion is arranged).

Continued daily engagement of current users and creative uses of the platform to fuel post sharing are contributors to the growth of UNEP's Facebook audience.

What worked:

- + Environmental, wildlife and food waste news
- + Reports
- + Videos
- + Sustainable consumption posts

What did not work:

- + Posts without strong accompanying images
- + News reporting that does not add value through the most sharable aspects of news/reports

Post Details

UNEP

Published by unepweb@unep.org [?] - July 29 at 9:54pm - Edited -

It is estimated that plastic pollution in the world's oceans consists of more than 5 trillion plastic pieces weighing over 250,000 tons afloat at sea. Where exactly is this plastic? This map shows field locations where count density of plastic debris in the oceans were measured between 2007-2013. Do you know someone who cares about keeping our oceans clean? Let them know about this map!

Vatnajokull National Park, Iceland. In the evening, August 12, 2014 in the Icelandic Highlands the unique co-incidence of red lava fountains of the Holuhraun eruptions and string greenish northern lights was visible over long-distance for several observers. The remaining blue and yellow color of the clear sky (only partly covered by the black sulphur smoke of the volcanic activities) contributed to this image. The Vatnajokull National Park's unique landscape is permanently formed by volcanic activities. Photo: Peter Prokosch for GRIDArendal (a Centre collaborating with #UNEP) [#environment](#) [#environnement](#) [#medioambiente](#) [#mediambient](#) [#UNEP](#) [#sky](#)

Fans on **WeChat**, **Sina Weibo** and **QQ** rising.
RenRen audience numbers continue to drop due to decrease in use of platform by users as well as popularity. The possibility that RenRen might be phased out as a Chinese social media platform remains.

WEB

Bounce Rate: The percentage of visitors to a particular website who navigate away from the site after viewing only one page.

Direct Traffic: Represents traffic to the web site with no referrer as one of the following: 1) the visitor typed the domain name directly into their browser, 2) the visitor bookmarked the site, 3) the visitor clicked on an email, shortcut, or other direct link

Page Views: An instance of an Internet user visiting a particular page on a website.

Referring Domain: A web site that refers a visitor to your site by linking to it.

Visitors: The number of inferred individual people (filtered for spiders and robots), within a designated reporting timeframe, with activity consisting of one or more visits to a site.

Visits: An instance of an Internet user visiting a particular page on a website.

SOCIAL MEDIA

Engagement Rate: Is the percentage of people who saw a post and liked, shared, clicked or commented on it. Monthly engagement rate can be used as a benchmark to measure how posts perform on a daily/weekly basis.

Eng.Rate = (Engaged users/Reach) *100

Fans: Users who "like" a particular page

Followers: Users who have subscribed to your Twitter updates and will see your Tweets show up in their news stream.

Replies: Replies are mentions that start with the @handle of a specific user you're engaging.

Retweet: A retweet is when a user shares a post of another user with their followers. Twitter enables this action with their "retweet" button.

Impressions: Is the *potential* number of users that saw the tweet. E.g. if you have 2,000 followers and send the same message two times, your reach is 2,000 but impressions is 4,000 - because those 2000 people could potentially have seen the message twice.

Reach: Is the total number of estimated unique Twitter users that saw a tweet from UNEP.

Tweets: Any message you send out to your followers.
