

The World Ozone Day in Serbia, 2020

I would like to inform you that the NOU of Serbia / Ministry of Environmental Protection of RS has celebrated The World Ozone Day. The information in regard to the World Ozone Day has been posted on the website of the Ministry: <https://www.ekologija.gov.rs/medjunarodni-dan-zastite-ozonskog-omotaca-2/#more-31966>.

The Serbian Association promoted The World Ozone Day on its social networks and posted the letter by James S. Curlin on ECA Network News page: <http://kgh-drustvo.rs/index.php/sr-rs/eca-mreza/eca-network-news>.

NOU of Serbia recorded the video message for The Ozone Day which has been consolidated in the ECA Network video message.

In order to raise awareness of the importance of the ozone layer and its protection, The NOU of Serbia decided to mark this year the World Ozone Day through support for the activities of the youngest population. It is planned to organize an art class in several primary schools and kindergartens, where children, with the help of their teachers and educators, will draw works on the topic of protection of the ozone layer, and for that activity they will be given educational materials and drawing accessories.

Created materials: posters, roll-up, notebooks, drawing accessories, small bags, balloons, wooden educational material, Ozzy ozone puzzles, coloring books, pencils, calendars for 2021 will be distributed to children from different schools.

Next week we will visit special needs children from the primary school in the city of Valjevo, who had an art class on the World Ozone Day. They had the art classes for every Ozone Day in the past and they will present their paintings from the previous years.
