## MEDITERRANEAN ACTION PLAN

XXIV Meeting of the Inter-Agency  
Advisory Committee (IAAC) for MED POL

Athens, 3-7 December 1990

## REPORT

OF THE XXIV MEETING OF THE INTER-AGENCY  
ADVISORY COMMITTEE (IAAC) FOR MED POL

## **CONTENTS**

	Page
Main body of the report	1 - 5
Annex I:	List of participants
Annex II:	Agenda
Annex III:	Status of MED POL Monitoring Programmes as of December 1990
Annex IV:	Status of preparation of Data Reporting Forms
Annex V:	Parameters for the MED POL Monitoring Programme and Status of Related Reference Methods
Annex VI:	Overview of MED POL Data Base
Annex VII:	MED POL Meetings 1990-1991
Annex VIII:	Complete Calendar of LBS Implementation: 1988-1995
Annex IX:	List of On-going Projects, List of 1991 Research Projects (as of December 1990)
Annex X:	MAP Technical Report Series Volumes scheduled for 1990-1991
Annex XI:	MED POL Meetings 1992-1993
Annex XII:	Draft Agenda of the Joint Meeting of the Scientific and Technical Committee and of the Socio-Economic Committee (Athens, 6-11 May 1991)
Annex XIII:	Guideline for the preparation of progress report for 1991 Committees' meeting
Annex XIV:	A: Proposed Programme Budget for MED POL for the Biennium 1992-1993 (at the level of that of 1990-1991 Biennium) B: Proposed Programme Budget for MED POL for the Biennium 1992-1993 (with 7 per cent increase)

1. The XXIV IAAC Meeting was held in Athens, 3-7 December 1990. The list of participants appears as Annex I.

Agenda Item 1

2. Mr L. Jeftic opened the Meeting and welcomed the participants. As for previous IAAC Meetings, he acted as Chairman and Mr F.S. Civili as Secretary.

Agenda Item 2

3. The Agenda proposed was unanimously adopted (Annex II).

Agenda Item 3

4. The activities implemented in 1990 and those planned for 1991 were reviewed by the Meeting according to Agenda Items 3.1. to 3.11.

5. In reviewing the progress of the monitoring component of MED POL, concern was expressed that a number of laboratories participating in the monitoring component of MED POL were often looking at this as individual participation in an international exercise rather than as part of a national monitoring programme. Also, it was pointed out that any efforts should be made to present to Contracting Parties the results of the monitoring activities in the form of statistical analysis of the data received and maps. Mr Jeftic informed the Meeting of the launching of monitoring activities in Albania which had recently become a Contracting Party to the Barcelona Convention.

6. A table was circulated which summarizes the monitoring activities in all countries (Annex III). The Meeting agreed that the table, which would be presented at the 1991 Committee Meeting, should report the indication of how much, in percentage, the pollution data reported corresponded to the programme proposed in the monitoring agreement.

7. The Meeting also agreed that whenever pollution data and country reports were sent to the relevant Agencies, comments should be forwarded to the MED Unit more promptly.

8. It was noted that the four pilot projects on solid litter, organotin, organophosphorus and carcinogenic and mutagenic substances had been completed. A new pilot project on selected elements of item 1 of Annex II of the LBS Protocol would be launched in 1991 as well as the pilot projects on detergents and herbicides. The pilot project on fungicides would start in 1992.

9. The IAEA representative informed the Meeting that the Data Quality Assurance Programme continued in 1990 with good results in Morocco, Tunisia, Egypt, Malta, Syria and Yugoslavia, while activities were stopped in Algeria because of the unavailability of the laboratory participating in the programme. A sediment sample was also reported as ready for distribution for a new intercalibration exercise. The organotin intercalibration exercise had been concluded with scarce results as far as quantity and quality of response. Updated information were provided by the WHO representative on the running of the annual intercalibration exercises and training courses on microbial pollution.

10. It was unanimously agreed that the results of the intercalibration exercises should be used more promptly for the utilisation of the good data only and for the planning of possible interventions in the weaker laboratories through training.

11. A list describing the present status of preparation of data reporting forms was prepared and updated by the Meeting by including plans for future work (Annex IV).

12. The Meeting discussed the preparation of Reference Methods relevant to MED POL parameters and matrices. A new updated list which includes plans for future work appears as Annex V.

13. Mr A. Aksel informed the Meeting of the major developments of the data processing activities related to MED POL. He referred to the problems related to the computerization of MED POL data and the establishment of a new structure (Annex VI). He also informed that a manual for the computerized presentation of pollution data would be distributed in January 1991 to selected countries and that a new format of monitoring agreements would be prepared by February 1991 to allow proper data entry already as from 1991.

14. The problem related to the lack of a proper statistical analysis and the graphical presentation of the pollution data transmitted was considered very important and, as a result, the following actions were agreed upon:

Heavy metals and halogenated hydrocarbons:

- a) all available data related to heavy metals and halogenated hydrocarbons should be entered by the end of January 1991 (A. Aksel);
- b) all the necessary software should be purchased by January 1991 (A. Aksel);
- c) the computerized statistical analysis of the data should be fully operational by the end of March 1991 (A. Aksel, G.P. Gabrielides);
- d) a small consultation meeting of selected experts should be organized by March 1991, as soon as the software is acquired (G.P. Gabrielides, A. Aksel);
- e) analysis and presentation of data on maps should be made by May 1991 (A. Aksel, G.P. Gabrielides).

Microbial pollution:

- a) Italy, France, Monaco and Spain (National Co-ordinators and experts) should be provided as soon as possible with the software AQUAMARE and asked to process the microbial data accordingly (L.J. Saliba, F.S. Civili, A. Aksel);
- b) data from Yugoslavia, Israel, Malta and Cyprus (and from any other country who submitted good quality data) should be processed by using the same software by February 1991 (A. Aksel);
- c) analysis and presentation of data on maps should be made by April 1991, if not at the Unit in Athens, in France or in Italy, as appropriate (A. Aksel, L.J. Saliba, F.S. Civili).

15. All meetings held in 1990 and being organized in 1991 were reviewed. A list covering title, venue, date, number of participants and cost is attached as Annex VII.

16. The complete list of activities related to the implementation of the LBS Protocol (1985-1995) was reviewed and revised accordingly (Annex VIII).

17. The implementation of the MED POL research projects was discussed. Two summary lists were distributed covering the ongoing research project as at December 1990 and the newly submitted research projects for 1991 (Annex IX). It was also agreed that the distribution of funds among Agencies should be done according to the letters of understanding recently signed between UNEP and the relevant Agencies.

18. All the MAP Technical Report Series volumes issued during 1990 and planned for preparation in 1991 were discussed and their full list appears in Annex X. The Meeting agreed on the need of presenting on these Series good quality final reports of research projects as they become available.

19. Mr L. Jeftic informed the Meeting of two important meetings which had been held in November 1990 on the subject of climatic changes, i.e. The Second World Climate Conference held in Geneva and the Meeting of Task Team Co-ordinators held in Singapore. He also informed the Meeting that a climatic change component was being inserted in the workplan of the implementation of coastal zone management projects, and that proposals for the second generation of site specific case studies (Izmir Bay, Syrian Coast, Island of Rhodes, Kastela Bay, Island of Malta, Cres/Losinj Islands) had been prepared and submitted to OCA/PAC for supplementary financing. The representative of WHO informed the Meeting that work was being carried out on the health aspects of climatic changes, and it was agreed that its aspect could be included in the relevant Mediterranean studies.

Agenda Item 4

20. In dealing with Agenda Items 4.1 to 4.13, in parallel to the activities proposed for 1992-1993, the respective budget was also agreed upon (see para 27.)

21. In discussing the monitoring activities for the new biennium, it was agreed that, while taking into account paragraphs 5 and 14 above, the monitoring activities, including Data Quality Assurance programme and intercalibration, should continue as in the past. However, preparations for the presentation of a newly structured monitoring programme should continue in order to have a new proposal by the end of 1992 (see Agenda Item 5) to allow formal adoption by Contracting Parties in 1993.

22. The Meeting felt that the discussion and the conclusions on Agenda Item 3 also covered the subjects of Agenda Items 4.4, 4.5, 4.6, 4.8, 4.10 and 4.11 and no further discussion was needed.

23. The Meeting agreed that three pilot projects should be implemented for the period 1992-1993, i.e. on monitoring of fungicides, on monitoring of Sb, Sn, Ba, Be, B, U, Tl and Te (final selection would be done in February 1991) and on monitoring of cyanides, fluorides and phenols in effluents.

24. The Meeting agreed on a number of meetings to be held in the biennium and a tentative list appears as Annex XI.

25. In discussing the research component, it was agreed that a new approach could be proposed to the 1991 Scientific and Technical Committee Meeting which would be implemented in the biennium 1992-1993. It was therefore suggested that fifty per cent of the budget earmarked for the research could be used for one priority research area (which could be eutrophication and plankton blooms for 1992-1993). All the research proposals sent through National Co-ordinators on this subject, in addition to proposals solicited by the Med Unit and approved by the National Co-ordinators, could form the basis for a regional programme, to be defined in detail by the Unit and the Agencies' staff involved and by a number of selected scientists and implemented by institutes selected from those who had submitted proposals. This system could allow for a higher financial contribution for participating institutes and could lead to multi-institutional- joint projects in the region which would enhance the geographical coverage of the research component of MED POL.

26. The preparation of the relevant documents to be presented to the Joint Committee Meeting was discussed. It was agreed that all assessment documents to be presented to the Meeting, specified in Item 5.2 of the draft Agenda for the Meeting (see Annex XII), the document related to the finalization of Annex IV to the LBS Protocol, the progress report on the 1990-1991 activities and the proposed activities for 1992-1993 should be sent to the unit not later than the end of January 1991 to allow the translation into French, reproduction and dispatch to be made in time. A short paper guiding the preparation of the progress report was distributed at the Meeting (Annex XIII).

27. Mr L. Jeftic informed the Meeting that the budget to be proposed for the biennium 1992-1993 should be prepared in all components with zero growth. On this basis the MED POL budget was prepared and it appears as Annex XIV, which contains two parts, (a) budget at the level of that of 1990-1991 and (b) budget with 7 per cent increase.

Agenda Item 5

28. The Meeting agreed that the new MED POL programme should be presented for approval at the Contracting Parties Meeting in 1993. While the indications given by the recent ICSEM Workshop were being used, a small consultation should be organized by the end of 1991 at which the preparation of the new programme should be discussed. The consultation should also serve to identify a consultant who could prepare a preliminary draft of the new programme during 1992.

Agenda Item 6

29. The Meeting took note of the fact that the formal closure of project 5102-81-01, terminated in December 1989, could not be operated since not all terminal reports had been submitted. It was then considered necessary to establish the end of January 1991 as the definite deadline for the submission of terminal reports from the Agencies who had not yet sent the closing documents. It was also stressed that six-monthly progress reports for project 89-02 (Umbrella Project) should be sent regularly, the late submission of which was impeding the submission of the complete report. For the period June 1990-December 1990, the progress report should be submitted not later than the end of January 1991.

Agenda Item 7

30. It was agreed that the organization of next IAAC Meetings before the end of each calendar year could be repeated for a more efficient planning of the activities.

Agenda Item 8

31. The report of the XXIV IAAC was unanimously adopted on 6 December 1990.

Agenda Item 9

32. Mr L. Jeftic closed the Meeting at 13,30 hours of 6 December 1990.

ANNEX VIII

**COMPLETE CALENDAR OF LBS IMPLEMENTATION: 1988-1995**

**Indicative Workplan and timetable for the formulation of programme  
and measures in terms of Articles 4, 5, 6, 7 and 13  
of the LBS Protocol from 1988 to 1995**

(based on the calendar adopted by the Contracting Parties  
in 1985)

Actions	Relevance to the Protocol	Responsible Agencies	Original target date	Present status
1. Assessment of the state of pollution in the Mediterranean Sea by persistent synthetic materials which may float, sink or remain in suspension, and proposed measures	Article 5; Annex I	UNEP/MEDU, IOC, FAO	Dec. 1988	Ready by January 1991. To be presented at STC 1991
2. Assessment of the state of pollution in the Mediterranean Sea by organophosphorus compounds and proposed measures	Article 5; Annex I	UNEP/MEDU, FAO	Dec. 1988	To be resubmitted at STC 1991
3. Assessment of the state of pollution in the Mediterranean Sea by organotin compounds and proposed measures	Article 5; Annex I	UNEP/MEDU, FAO	Dec. 1988	Done. UNEP(OCA) MED WG.1/7
4. Completion and revision of the list of substances included in the groups contained in annexes I and II to the Protocol	Annexes I, & II	UNEP/MEDU, All Agencies	Dec. 1988	Continuously covered in the assessments
5. Evaluation of <i>in situ</i> investigations on selected submarine outfalls to determine their efficiency and cost-effectiveness	Article 7, para 1(a)	UNEP/MEDU, WHO	Dec. 1988	Document prepared as part of the guidelines (see 21.) and being edited. To be presented at STC 1991
6. Survey of the situation currently existing with regard to products, installations and other processes within the region actually or potentially causing significant pollution of the marine environment	Article 7, para 1(d)	UNEP/MEDU, WHO, UNIDO	Dec. 1988	Pending results of MED X bis

Actions	Relevance to the Protocol	Responsible Agencies	Original target date	Present status
7. Preparation of draft Annex IV Protocol concerning pollution from land-based sources transported by the atmosphere	Article 4	UNEP/MEDU, WHO	Dec. 1988	Presented at STC 1990. New draft for STC 1991
8. Assessment of the state of pollution in the Mediterranean Sea by radioactive substances and proposed measures	Article 5; Annex I	UNEP/MEDU, IAEA	Dec. 1989	To be presented at STC 1991
9. Assessment of the state of pollution in the Mediterranean Sea by substances proven carcinogenic, teratogenic or mutagenic and proposed measures	Article 5; Annex I	UNEP/MEDU, WHO	Dec. 1989	Ready by end Jan. 91 for STC 1991
10. Assessment of the present state of pollution in the Mediterranean Sea by pathogenic microorganisms and proposed measures	Article 6; Annex II	UNEP/MEDU, WHO	Dec. 1989	Ready by end Jan. 91 for STC 1991
11. Compilation and evaluation of already existing international experience of use of alternative products and processes. In this regard, experiences on recycling and re-use of solid and liquid wastes will be taken into account	Article 7; para 1(d)	UNEP/MEDU, WHO, UNIDO	Dec. 1989	Activity postponed to 1992-1993
12. Assessment of the state of pollution by crude oils and hydrocarbons of any origin and proposed measures	Article 6; Annex II	UNEP/MEDU, IOC	Dec. 1990	Consult. in 1991. Ass. to be prepared for STC 1992
13. Assessment of the state of pollution in the Mediterranean Sea by zinc and copper with proposed measures	Article 6; para 1(a)	UNEP/MEDU, FAO	Dec. 1990	Consult. in 90. Ass. to be prepared for STC 1992
14. Assessment of the present state of pollution in the Mediterranean Sea by nickel and chromium with proposed measures	Article 6, para II	UNEP/MEDU, FAO	Dec. 1990	Consult. in 90. Ass. to be prepared for STC 1992
15. Assessment of the present state of pollution in the Mediterranean Sea by arsenic and lead with proposed measures	Article 6, Annex II	UNEP/MEDU, FAO	Dec. 1990	Consult. in 90. Ass. to be prepared for STC 1992
16. Identification and categorisation of alternative products, installations and other processes capable of reducing pollution of the Mediterranean marine environment	Article 7, para 1(d)	UNEP/MEDU, WHO, UNIDO	Dec. 1990	Activity postponed to 1992-1993

Actions	Relevance to the Protocol	Responsible Agencies	Original target date	Present status
17. Assessment of the present state of pollution in the Mediterranean Sea by inorganic compounds of phosphorus and elemental phosphorus and proposed measures	Article 6; Annex II	UNEP/MEDU, FAO	Dec. 1991	Ass. as part of 26.
18. Assessment of the state of pollution in the Mediterranean Sea by non-biodegradable detergents and other surface-active substances and proposed measures	Article 6; Annex II	UNEP/MEDU, WHO	Dec. 1991	Consult. in 1991. Ass. to be prepared for STC 1992
19. Assessment of the present state of pollution in the Mediterranean Sea by thermal discharges and proposed measures	Article 6; Annex II	UNEP/MEDU, FAO	Dec. 1991	Consult. in 1991. Ass. to be prepared for STC 1992
20. Common guidelines for the determination of the length, depth and position of pipelines for coastal outfalls, taking into account, in particular, the methods used for pre-treatment of effluents	Article 7, para 1(a)	UNEP/MEDU, WHO, UNIDO	Dec. 1991	Document ready and being edited. Document to be presented at STC 1991 (includes 5.)
21. Compilation of a Mediterranean inventory of effluents requiring special and/or separate treatment including type, category, amount, locality and existing treatment, if any, together with, wherever possible, those local characteristics influencing the effects of such effluents on the marine environment and the feasibility of separate and/or special treatment	Article 7, para 1(b)	UNEP/MEDU, WHO, UNIDO	Dec. 1991	Pending results of MED X bis
22. Formulation of draft common guidelines, standards and criteria for special requirements for effluents necessitating separate treatment	Article 7, para 1(b)	UNEP/MEDU, WHO	Dec. 1991	For Annex I substances doc. ready for STC 1991. For Annex II doc. being prepared for STC 1992
23. Survey on the yield and the cost/benefit of the application of alternative products and processes	Article 7, para 1(d)	UNEP/MEDU, WHO	Dec. 1991	Document to be prepared for STC 1992
24. Assessment of the present state of pollution in the Mediterranean Sea by acid or alkaline compounds of such composition and in such quantity that they may impair the quality of seawater and proposed measures	Article 6, Annex II	UNEP/MEDU, WHO	Dec. 1992	Consult. in 1992. Ass. to be prepared for STC 1993

Actions	Relevance to the Protocol	Responsible Agencies	Original target date	Present status
25. Assessment of the present state of pollution in the Mediterranean Sea by substances which have, directly or indirectly, an adverse effect on the oxygen content of the marine environment, especially those which may cause eutrophication and proposed measures	Article 6; Annex II	UNEP/MEDU, FAO	Dec. 1992	Consult. in 1991. Ass. to be prepared for STC 1992 (will cover 18.)
26. Assessment of the present state of pollution in the Mediterranean Sea by molybdenum, titanium, selenium, vanadium, cobalt and silver with proposed measures	Article 6; Annex II	UNEP/MEDU, FAO/IAEA	Dec. 1992	Consult. in 1992. Ass. to be prepared for STC 1993
27. Assessment of the present state of pollution in the Mediterranean Sea by cyanides and fluorides and proposed measures	Article 6; Annex II	UNEP/MEDU, WHO	Dec. 1993	Consult. in 1992. Ass. to be prepared for STC 1994
28. Assessment of the present state of pollution in the Mediterranean Sea by substances which, though of a non-toxic nature, may become harmful to the marine environment or may interfere with any legitimate use of the sea owing to the quantities in which they are discharged and proposed measures	Article 6; Annex II	UNEP/MEDU, IMO	Dec. 1993	Consult. in 1994. Ass. to be prepared for STC 1995
29. Assessment of the present state of pollution in the Mediterranean Sea by organosilicon compounds and substances which may form such compounds in the marine environment, excluding those which are biologically harmless or are rapidly converted into biologically harmless substances and proposed measures	Article 6; Annex II	UNEP/MEDU, FAO	Dec. 1993	Deleted from Annex II
30. Assessment of the present state of pollution in the Mediterranean Sea by antimony, tin, boron, beryllium, barium, uranium, tellurium and thallium with proposed measures	Article 6; Annex II	UNEP/MEDU, FAO	Dec. 1994	Consult. in 1993. Ass. to be prepared for STC 1994
31. Assessment of the present state of pollution in the Mediterranean Sea by substances which have a deteriorous effect on the taste and/or smell of products for human consumption derived from the aquatic environment, and compounds liable to give rise to such substances in the marine environment and proposed measures	Article 6; Annex II	UNEP/MEDU, WHO	Dec. 1994	Consult. in 1994. Ass. to be prepared for STC 1995

Actions	Relevance to the Protocol	Responsible Agencies	Original target date	Present status
32. Assessment of the present state of pollution in the Mediterranean Sea by herbicides and their derivatives not covered in Annex I and proposed Measures	Article 6; Annex II	UNEP/MEDU, FAO	Dec. 1994	Consult. in 1992. Ass. to be prepared for STC 1993
33. Assessment of the present state of pollution in the Mediterranean Sea by fungicides and their derivatives not covered in Annex I and proposed Measures	Article 6; Annex II	UNEP/MEDU, FAO	Dec. 1994	Consult. in 1993. Ass. to be prepared for STC 1994
34. Assessment of the present state of pollution in the Mediterranean Sea by other biocides other than fungicides and herbicides and their derivatives not covered in Annex I and proposed Measures	Article 6; Annex II	UNEP/MEDU, FAO	Dec. 1994	Consult. in 1994. Ass. to be prepared for STC 1995

## IMPLEMENTATION OF THE LAND-BASED SOURCES PROTOCOL DURING 1986-1987

Actions	Relevance to the Protocol	Responsible Agencies	Original target date	Present status
1. Assessment of the state of microbial pollution in the Mediterranean Sea and proposed measures	Article 6; Annex II	UNEP/MEDU, WHO	Dec. 1985	To be revised in 1993
2. Completion an revision of the Glossary	Protocol and UNEP/MEDU, annexes	WHO	Dec. 1986	Prepared: UNEP/WG.125/9
3. List of substances falling within each of the groups in Annex I to the Protocol	Annex I	UNEP/MEDU, IRPTC, IAEA	Dec. 1986	Continuously covered in the assessments
4. List of substances falling within each of the groups in Annex II to the Protocol	Annex II	UNEP/MEDU, IRPTC	Dec. 1986	Continuously covered in the assessments
5. Assessment of the state of pollution in the Mediterranean Sea by used lubricating oils and proposed measures	Article 5; Annex I	UNEP/MEDU, UNIDO	Dec. 1986	Done: WG.3/Inf.4
6. Survey of land-based sources and amounts of pollutants reaching the Mediterranean Sea	Article 5 & 6; Annex I and II	UNEP/MEDU, WHO	Dec. 1986	Questionnaire ready. Sent to N.C. in June 1989
7. Assessment of the state of microbial pollution in the Mediterranean Sea and proposed measures for shellfish and shellfish-growing waters	Article 6; Annex II	UNEP/MEDU, WHO	Dec. 1986	Done: UNEP/WG.160/10
8. An evaluation of the benefits limitations of submarine pipelines, whether or not associated with treatment plants, for discharge of liquid effluents	Article 7; para.1 (a)	UNEP/MEDU, WHO	Dec. 1986	See guidelines and MED X-bis
9. Formulation of the procedure for the collection and submission of information from the parties on measures taken, results achieved and difficulties encountered in the application of the Protocol	Article 13	UNEP/MEDU, WHO	Dec. 1986	Formats in preparation. Other aspects ongoing.

Actions	Relevance to the Protocol	Responsible Agencies	Original target date	Present status
10. Draft guidelines for the issue of authorization for the discharge of liquid wastes into the Mediterranean	Article 6	UNEP/MEDU, WHO	Dec. 1987	Done: ICP/CEH 082/6
11. Assessment of the state of pollution in the Mediterranean Sea by cadmium and cadmium compounds and proposed measures	Article 5; Annex I	UNEP/MEDU, FAO	Dec. 1987	Done: MTS No 34
12. Assessment of the state of pollution in the Mediterranean Sea by organohalogen compounds and proposed measures	Article 5; Annex I	UNEP/MEDU, FAO	Dec. 1987	Done: MTS No 39. Consult. in 1990. Ass. for additional compounds in 1992
13. Assessment of the state of pollution in the Mediterranean Sea by mercury and mercury compounds and proposed measures	Article 5; Annex I	UNEP/MEDU, FAO	Dec. 1987	Done: MTS No 18
14. A comparative review of the various types of treatment existing in the Mediterranean area for wastewaters, with the view to their re-use or their discharge into the sea	Article 7; para 1(a)	UNEP/MEDU, WHO	Dec. 1987	Part of MED X Bis
15. Compilation of detailed information on existing legislative measures regarding the discharge of wastes through submarine outfalls in Mediterranean countries together with similar information from selected countries outside the region, to enable comparison and evaluation of applicability and proposed measures	Article 7; para 1(a)	UNEP/MEDU, WHO	Dec. 1987	See 8.
16. Identification and categorisation of effluents requiring special and/or separate treatment and listing of such treatment and/or other requirements normally associated with or advisable for such effluents	Article 7; para 1(b)	UNEP/MEDU, WHO, UNIDO	Dec. 1987	Annex I ready (guidelines). Annex II in preparation

**DRAFT AGENDA**

OF THE JOINT MEETING OF THE SCIENTIFIC AND TECHNICAL  
COMMITTEE  
AND THE SOCIO-ECONOMIC COMMITTEE  
(ATHENS, 6-11 MAY 1991)

Joint Meeting of the Scientific and  
Technical Committee and of the Socio-  
Economic Committee

Athens, 6-11 May 1991

DRAFT AGENDA

1. Opening of the Meeting
2. Rules of Procedure
3. Election of officers
4. Adoption of the Agenda and Organization of Work
5. Progress report on the implementation of the Mediterranean Action Plan during 1990/1991 and recommendations and programme budget for 1992/1993:
  - 5.1 Programme management and co-ordination for the Mediterranean Action Plan:
    - (a) Programme approval through decision-making meetings
    - (b) Programme co-ordination
    - (c) Legal component
  - 5.2 Implementation of the Land-Based Sources Protocol (LBS) and Dumping Protocol:
    - (a) Implementation of the LBS protocol and the Dumping protocol

- (b) Assessment of the state of pollution in the Mediterranean Sea by pathogenic micro-organisms and proposed measures
- (c) Assessment of the state of pollution in the Mediterranean Sea by substances proven carcinogenic/mutagenic/teratogenic and proposed measures
- (d) Assessment of the state of pollution in the Mediterranean Sea by organophosphorus compounds and proposed measures
- (e) Assessment of the state of pollution in the Mediterranean Sea by radioactive substances
- (f) Assessment of the state of pollution in the Mediterranean Sea by persistent synthetic materials which may float, sink or remain in suspension and proposed measures
- (g) Annex IV to the Protocol concerning pollution from land-based sources transported by the atmosphere
- (h) Research projects directly relevant to the LBS protocol

5.3 Monitoring of marine pollution in the Mediterranean:

Marine pollution monitoring activities through MED POL

- (a) Monitoring programmes and supporting activities
- (b) Data Quality Assurance
- (c) Monitoring of plankton blooms
- (d) Research projects
- (e) Climatic changes

5.4 Prevention and combating pollution from ships:

- (a) Implementation of the protocol on Emergency
- (b) Activities of the Regional Oil Combating Centre (ROCC)
- (c) Port reception facilities for ballast water and other oily residues in the Mediterranean

5.5. Protection of the common Mediterranean heritage:

- (a) Implementation of the protocol concerning Specially Protected Areas
- (b) Activities of the Specially Protected Areas/Regional Activity Centre (SPA/RAC)
- (c) Preservation of the 100 historic sites

5.6 Environmentally sound management of the Mediterranean coastal zone:

- (a) Database on Mediterranean environment and development. Activities of the Blue Plan/Regional Activity Centre (BP/RAC)
- (b) Coastal planning and management. Activities of the Priority Actions Programme/Regional Activity Centre (PAP/RAC)
- (c) Coastal areas management programmes

5.7 Public information

6. Other business

7. Adoption of the report

8. Closure of the meeting

ANNEX XIII

**GUIDELINE FOR THE PREPARATION OF PROGRESS REPORT  
FOR 1991 COMMITTEES' MEETING**

A. Monitoring of Marine Pollution in the Mediterranean

- 1) National Monitoring Programmes  
(Describe your involvement in the design and formulation of monitoring programmes and in the purchase of equipment in 1990 and plans for 1991)
- 2) Data Quality Assurance Programme  
(Describe the programme implemented in the various countries in 1990 and being carried out in 1991)
- 3) Intercalibration  
(Describe the activities implemented in 1990 and being carried out in 1991, including the list of the participating Institutes)
- 4) Maintenance  
(as for 3) plus attach full list of visits made in 1990 and being carried out in 1991)
- 5) MED POL data processing  
(In addition to a paragraph by UNEP, include the list of reference methods prepared in 1990 and those planned for 1991)
- 6) Research and study topics  
Prepare a paragraph for each activity (cover only activities A, F, H, I, J, K and L) (and new research areas I, II and IV) according to the following scheme:
  - a) Projects completed in 1990: (number)
  - b) Projects ongoing in 1990: (number)
  - c) Total 1990 contribution: US\$.....
  - d) Paragraph on subjects dealt with, related meetings held in 1990 and planned for 1991)

- 7) Climatic changes  
(by UNEP)
  - 8) Training and fellowships  
(in addition to a paragraph by UNEP, Intercalibration and Data Quality Assurance training courses held in 1990 and planned for 1991 should be covered with description of subject dealt with and number of participants from how many countries).
  - 9) Coordination  
(by UNEP)
  - 10) Plankton blooms and eutrophication  
(by UNEP)
- B. Implementation of LBS protocol
- 1) Implementation of protocol  
(by UNEP)
  - 2) Implementation of LBS workplan activities  
(all activities from the workplan carried out in 1990 or being implemented in 1991 should be described including the preparation of all pollution assessment documents.)
  - 3) The work carried out for the preparation of annex IV to the LBS protocol should be described.
  - 4) Pilot monitoring surveys  
(The activities related to the 1990 ongoing pilot projects should be described as well as the ones planned for 1991).
  - 5) Research and study topics  
Prepare a paragraph for each activity (cover only activities B, C, D, E and G and new research areas III and V) as indicated under A.6 above.

E. ENVIRONMENTALLY SOUND MANAGEMENT OF THE MEDITERRANEAN COASTAL ZONES

9. ENVIRONMENTALLY SOUND MANAGEMENT OF THE MEDITERRANEAN  
COASTAL ZONES

c) Coastal Zones Pilot Projects

Objective

To integrate environmental and resource management policies in coastal zones proposed and accepted by Contracting Parties. Such integrated management programmes will include, as appropriate, findings and knowhow of all components of MAP such as development of coastal zones (including development scenarios), particular PAP actions, monitoring, implementation of common measures adopted by Contracting Parties, implementation of Barcelona Convention and related protocols, contingency plans, and specially protected areas.

At present the following four Pilot country projects are on-going:  
Kastela Bay (Yugoslavia), Izmir Bay (Turkey), island of Rhodes  
(Greece) and Syrian coast.

<u>Activities</u>	<u>1990</u>	<u>1991</u>	<u>1992</u>	<u>1993</u>
	(in thousands of US \$)			
- Consultants to assist in preparation and implementation of documents and activities resulting in the implementation of coastal zones pilot projects and preparatory activities for follow-up	110	110	110	
- Assistance to institutions participating in coastal zone pilot projects approved by the Contracting Parties (sub-contracts)	182	188	188

Note: The above programme is broken down as follows:  
PAP 150; Med. Pol. 40; Scenaria 30; ROCC 15; SPA 10; Data 20; Co-ordinating Unit 67 (1990)  
and 73 (1991)

It is expected that the four host countries of the pilot projects will contribute matching funds for the implementation of the projects.

E. ENVIRONMENTALLY SOUND MANAGEMENT OF THE MEDITERRANEAN COASTAL ZONES

9. ENVIRONMENTALLY SOUND MANAGEMENT OF THE MEDITERRANEAN  
COASTAL ZONES

c) Coastal Zones Pilot Projects

Objective

To integrate environmental and resource management policies in coastal zones proposed and accepted by Contracting Parties. Such integrated management programmes will include, as appropriate, findings and knowhow of all components of MAP such as development of coastal zones (including development scenarios), particular PAP actions, monitoring, implementation of common measures adopted by Contracting Parties, implementation of Barcelona Convention and related protocols, contingency plans, and specially protected areas.

At present the following four pilot country projects are on-going:  
Kastela Bay (Yugoslavia), Izmir Bay (Turkey), island of Rhodes (Greece) and Syrian coast.

<u>Activities</u>	<u>1990</u>	<u>1991</u> (in thousands of US \$)	<u>1992</u>	<u>1993</u>
- Consultants to assist in preparation and implementation of documents and activities resulting in the implementation of coastal zones pilot projects and preparatory activities for follow-up	110	110		
- Assistance to institutions participating in coastal zone pilot projects approved by the Contracting Parties (Sub-contracts)	182		188	

	<u>1990</u>	<u>1991</u> (in thousands of US \$)	<u>1992</u>	<u>1993</u>
- Consultation meetings relevant to each pilot coastal zones	40	40

Note: The above programme is broken down as follows:  
PAP 150; Med Pol 40; Scenaria 30; ROCC 15; SPA 10; Data 20; Co-ordinating Unit 67 (1990)  
and 73 (1991)

It is expected that the four host countries of the pilot projects will contribute matching funds for the implementation of the projects.
