Original: English

Meeting of the MED POL Focal Points

Rome, Italy, 29-31 May 2017

Agenda item 10: MED POL Programme of Work 2018-2019

Programme of Work 2018-2019: Land Based Pollution Core Theme including its Governance related Aspects

For environmental and economic reasons, this document is printed in a limited number. Delegates are kindly requested to bring their copies to meetings and not to request additional copies.

UNEP/MAP
Athens, 2017

Explanatory Note by the Secretariat

1. According to the Decision IG.22/20 “Programme of Work and Budget 2016-2017”, adopted by the 19th Ordinary Meeting of the Contracting Parties in February 2016 the Secretariat is mandated, “in consultation with the Bureau, to prepare for consideration and approval by COP 20 a result-based Programme of Work and Budget for 2018-2019, explaining the key principles and assumptions on which it is based and taking into account the progress achieved during the implementation of the 2016-2017 Programme of Work, and in full alignment with the MTS”.
2. In that respect, MED POL prepared in consultation with MED POL Focal Points a proposed Programme of Work for the biennium 2018-2019, included in the present document.
3. The proposed activities envisage a substantive contribution of the MED POL Programme to two themes of the Mid-Term Strategy (MTS) 2016-2021, respectively Governance and Pollution.
4. While developing this proposal, MED POL took into consideration the relevant COP decisions, the need to achieve full delivery of the MTS by 2021, and the need to ensure synergies and complementarity with other major initiatives, in particular the UfM Horizon 2020 Initiative including the EU-funded Programme on SEIS and Capacity Building, the global and regional work on marine litter, as well as the most recent developments and progress under the EU MSFD, where appropriate. The two other EU-funded projects, one on Marine Litter, and the relevant parts of the Ecosystem Approach MED II, as well as the Marine Litter related activities under the Bilateral Agreement with Italy, are also fully streamlined.
5. This proposal is presented in a tabular form showing the clear linkages of activities and their deliverable with the MTS outputs. The last column of the table describes the current status for ongoing activities and provides as need be necessary background information on the rationale behind the proposed activities.
6. With regards to the Governance overarching theme, some of the key activities include:
 - a) Delivering a number of pollution-related assessment and contribution to the 2019 State of Environment and Development Report;
 - b) Ensuring coordinated implementation of IMAP, including further review and development of Good Environmental Status (GES), targets, baseline and criteria values based on new data and support to the development of joint and offshore monitoring where appropriate;
 - c) Finalizing the online reporting system for pollution and marine litter cluster to support data flow coming from the IMAP national monitoring programmes as well as reporting of pollutant inventories;
 - d) Mobilizing external resources in designing new projects in line with MTS (new GEF MED Programme);
 - e) Strengthening outreach and partnerships with regional and global actors with a particular focus on marine litter, industrial pollution and waste management.
7. With regards to Pollution core theme, some of the key activities include:
 - a) Assessment of the status of implementation of key measures from the Regional Plans;
 - b) Preparation of key guidelines addressing sources of pollution (Dumping Protocol and PRTR);
 - c) Targeted technical support to countries to implement key NAP measures;
 - d) Continued support to countries to implement their national monitoring programmes as appropriate including data and meta data management, and development of protocols;

- e) Organization of regional meetings to share best practices and training for joint monitoring, assessment and reporting scales; including the organization of CORMON meetings on pollution and marine litter;
- f) Organization of regional meetings to share best practices on implementation of key Regional Plan Measures;
- g) Development of a proposal to update existing/ develop new measures to achieve and/or maintain GES;
- h) Coordination of quality assurance programme and training for contaminants and eutrophication, and the development of quality assurance programme for marine litter;
- i) Continued concrete support to countries on implementing marine litter measures including “adopt a beach” and “fishing for litter” and reduction/prohibition of single use plastic bags.

8. The full proposal of the MED POL Programme of Work is included in the present document for review and feedback by the MED POL Focal Points Meeting in view of its finalization for formal submission to the MAP Focal Points Meeting in September 2017, as contribution to the MAP Programme of Work 2018-2019.

MTS. Number	Key Outputs	Proposed activities	Means of Implementation	Lead Component	Partners	Expected Deliverables	Remarks	MTF			EXTERNAL	
								2018	2019	TOTAL	2018-2019 Secured	2018-2019 non secured
Theme I: Governance								2018	2019	TOTAL	2018-2019 Secured	2018-2019 non secured
1.1.1	Ratification of the Barcelona Convention and its Protocols by all Contracting Parties supported.	Provide technical support to enhance the ratification by the remaining CP of the amendments to the Dumping Protocol and of the Offshore Protocol	In house expertise, technical advise to CPs	MED POL, CU	CPs	a) Amendments to the Dumping Protocol enters into effect by 2019; b) A larger number of CPs become bound to/by the Offshore Protocol obligations						
1.1.2	Effective legal, policy, and logistic support provided to MAP decision-making process including advisory bodies meetings.	Organize the MED POL Focal Points Meeting	Meeting organisation, Preparation of working and Information documents, Travel, Conference services,	MED POL, CU	CU, other MAP components	FP Meeting well attended to review <i>inter alia</i> draft guidelines, assessment products, marine pollution monitoring protocols and proposed policy papers for further review by higher MAP relevant bodies						
1.2.1	Compliance mechanisms effectively functioning and technical and legal advice provided to Contracting Parties, including technical assistance to enhance implementation of the Convention and its Protocols including reporting	Assess the status of the implementation of the Pollution related Protocols as well as of the Regional Plan and the NAPs for the period 2016-2017	In house expertise, technical advise to Compliance Committee	MED POL, CU	CPs, Compliance Committee	Progress of implementation assessed, General and specific issues at stake highlighted and brought to the attention of MED POL FP						

1.3.1	Regional cooperation activities promoting dialogue and active engagement of global and regional organizations and partners, including on SAP BIO, Marine Litter, SCP, ICZM, MSP and Climate Change (e.g. regional conference, donor meetings)	1. Co-organize with Co-Chairs the UfM H2020 Review and Monitoring and Capacity Building Sub Groups annual meetings	Meeting organisation, Preparation of working and Information documents, Travel, Conference services,	MED POL	CU, UfM H2020, EEA, PPRG	a) Strengthened cooperation with EEA, EIB and UfM in the framework of H2020 ; b) Work Programme of the three H2020 Components followed up in a continuous manner and their synergies with UN Environment/MAP-MED POL activities enhanced, joint activities developed and implemented as appropriate						
		2. Coordinate with key partners in supporting the implementation of the Regional Plan on Marine Litter; 3. Strengthen and expand the Regional Collaboration Platform for Marine Litter in the Mediterranean established in September 2016; 6. Enhance collaboration with European Regional Seas on marine litter and other issues of common concern.	Joint activities, regional meetings, exchange of information, SSFA, consultancies,	MED POL	CU, other MAP components, REMPEC, SCP RAC, RAC/SPA, Collaboration Platform Partners	a) Third and fourth meetings the Regional Collaboration Platform for Marine Litter in the Mediterranean with over 20 regional organizations held and annual joint workplans prepared, agreed and implemented in line with their mandates ; b) Exchange of best practices facilitated, roster of experts, established, public and decision maker awareness raised ; c) Relevant existing global guidelines and capacity building tools and methodologies identified and joint activities implemented as appropriate.						
		4. Further develop and maintain/update the Mediterranean Marine Litter Regional Node with inputs of all Partners to the Collaboration Platform as well as CP;	Joint activities, regional meetings, exchange of information, SSFA, consultancies,	MED POL	GPA, INFO/RAC, Plan/Bleu,SCP/RAC	Regional Node designed and operational, Best practices and roster of experts uploaded, links with GMLP established, Links with Clean Sea Campaign and Plastic Coalition established						
		5. Coordinate with Basel, Stockholm, Minamata Conventions and London Dumping Protocol to maximize synergies in supporting the implementation of respective BC and its Protocols provisions;		MED POL	SCP/RAC, Pollution related MEA	Joint activities identified and implemented						

1.4.1	<p>Periodic assessments based on DPSIR approach and published addressing inter alia status quality of marine and coastal environment, interaction between environment and development as well as scenarios and prospective development analysis in the long run. These assessments include climate change-related vulnerabilities and risks on the marine and coastal zone in their analysis, as well as knowledge gaps on marine pollution, ecosystem services, coastal degradation, cumulative impacts and impacts of consumption and production</p>	<p>1. Develop a Roadmap /action plan to address the main information gaps identified during the QSR2017, for Pollution and Litter ;</p>	<p>In house expertise</p>	<p>MED POL</p>	<p>CU and other MAP components</p>	<p>a) Actions identified to fill the knowledge gaps on litter and pollution monitoring and assessment ;</p>						
		<p>2. Deliver pollution-related thematic assessments (as outlined in Output 2.4.3) to feed into the preparation of SoED 2019 ;</p>	<p>In house expertise, consultancies, expert meetings</p>	<p>MED POL</p>	<p>CPs, Plan Bleu, EEA</p>	<p>b) Pollution-related chapters of the SoED timely delivered based on DPSIR approach and in consultation with MED POL Focal Points ;</p>						
		<p>3. Contribute to the preparation of the 2019 Joint EEA/UN Environment-MAP report on the implementation of the H2020</p>		<p>MED POL</p>		<p>c) Contribution provided across the board on all chapters of the joint EEA/MAP 2019 report; Chapters on two Indicators delivered by MED POL</p>						
1.4.3	<p>Implementation of IMAP (the EcAp-based integrated monitoring and assessment programme) coordinated, including GES common indicators fact sheets, and supported by a data information center to be integrated into Info/MAP platform</p>	<p>Ensure the coordinated implementation of IMAP at national, sub regional and regional levels</p>	<p>Internal coordination, internal meetings and communication through electronic means, consultancies where appropriate, joint planning of CorMon meetings</p>	<p>MED POL</p>	<p>CU, MAP Components,</p>	<ul style="list-style-type: none"> - Guidance fact sheets for IMAP Common indicators further developed and updated ; - Guidance fact sheets for Candidate indicators developed ; - Quality assurance programmes for data reporting to support monitoring designed in a coordinated manner ; - Coordinated methodological support provided to extend the geographical scope of IMAP implementation to offshore areas ; - Monitoring protocols updated and developed in an integrated manner for different aspects of IMAP implementation ; - Coordinated approach followed to support and organize CORMON - Meetings ; Integrated monitoring programmes developed by a number of countries ; - Agreement, as appropriate, on piloting the monitoring of offshore sites. 						

1.4.4	Interface between science and policy-making strengthened through enhanced cooperation with global and regional scientific institutions, knowledge sharing platforms, dialogues, exchange of good practices and publications	1. Feed with updated information the Marine Litter Node in collaboration with GPML and the Regional cooperation platform on marine litter in the Mediterranean ;	In house expertise	MED POL	SCP/RAC, REMPEC, ML Collaboration Platform	a) Marine Litter best practices shared, a roster of experts is established, and awareness on marine litter actions is enhancing in the region and at global level ;						
		2. Contribute to strengthen Science Policy Interface in the Mediterranean with regards to IMAP implementation and feeling the knowledge gap to promote effective measures to achieve GES	In house expertise	MED POL	CU, Plan Bleu, MAP components, EEA, Existing Projects	b) Roster of experts build, best practices on IMAP implementation science policy interface shared with regards to pollution and litter cluster						
1.4.5	Educational programmes, including e-learning platforms and college level degrees, on governance and thematic topics of MAP relevance organized in cooperation with competent institutions	Promote and disseminate available pollution and marine litter training and e-courses with focal points and through the Marine Litter node (i.e. the e course on marine litter and ecosystem based management developed at global level by UN Environment and GMLP) and the Marine Litter Watch Programme developed by the EEA	In house expertise, communication	MED POL	GPA, CPs	Capacities of national and regional stakeholders enhanced with regards to pollution and marine litter management and prevention including pollution and litter monitoring						
1.5.1	Info/MAP platform and platform for the implementation of IMAP fully operative and further developed, connected to MAP components' information systems and other relevant regional knowledge platforms, to facilitate access to knowledge for managers and decision-makers, as well as stakeholders and the general public	Within the overall INFO MAP Infosystem, maintain and upgrade the MED POL Infosystem to support online data submission related to pollution monitoring (in line with IMAP), inventories of pollutants loads, marine litter and related geo referenced assessments including a guidance document to CP's and capacity building for the MEDPOL Information system including QA reporting.	SSFA, Consultany, in house expertise	MED POL	INFO/RAC, EEA, (SEIS Project), CPs	a) NBB/PRTR information system online operational, database updated with new data ; b) MEDPOL monitoring database updated and operational including IMAP Pollution and Marine Litter indicators and countries reporting new QA data; c) User manual and training for the MEDPOL Information system including QA reporting ; d) Information system on NAP/H2020 indicators fully operational and updated with QA data.						

1.6.1	The UN Environment/MAP communication strategy updated and implemented	1. Deliver periodic briefings and news on emerging pollution issues and issues at state for the general public and decision makers ;	In house expertise	MED POL	CU, Plan Bleu, INFO/RAC,	a) Public and decision makers awareness raised on key issues related to pollution and marine litter in the Mediterranean ;					
		2. Publish MEDPOL assessments and reports as Mediterranean Technical Series (MTS) ;	In house expertise, Publications	MED POL	CU, INFO/RAC	b) Knowledge on marine pollution and its impacts on marine and coastal environment expanded ;					
		3. Support participation to national , regional and international campaigns on Pollution and Marine Litter	SSFA, travel, publication	MED POL	MAP Components, MAP Partners, CPs	c) Issues at stake and emerging issues identified and disseminated to respective targets groups.					
Theme II : LAND AND SEA-BASED POLLUTION											
2.1.1	Targeted measures of the regional plans/strategies facilitated and implemented	1. Prepare reports on the implementation of the existing regional Plans/Measures: (i.e. Mercury and WWTP) including socio economic analysis ;	In house expertise, consultancies, expert meetings	MED POL	Plan Bleu, SWIM&H2020	a) Status and related socio economic aspects of implementation of key regional measures (i.e. Regional Plans on Mercury and WWTP) assessed for MED POL FP meeting review in 2019 ; b) Regional meetings held to share best practices on the implementation of the Regional Plans and other common measures.					
		2. Promote the use of relevant instruments and incentives to reduce/forbid the single-use of plastic bags ;	In house expertise, SSFA, Regional meetings, consultancies	MED POL	Plan Bleu, SWIM&H2020, CPs	Best practicess idnetified, collected and shared with the CPs, technical cpapacities of the CPs enhanced to facilitate the implementation of key legally binding measures.					
		3. Promote the application of fishing for litter and adopt a beach measures ;	SSFA, awareness campaing,consultancies, in house expertise, regional/sub regional meetings	MED POL	Plan Bleu, SWIM&H2020, CPs						
		4. Promote sharing of best practices related to WWTP sludge and storm water management.		MED POL	Plan Bleu, SWIM&H2020, CPs						

2.2.1	Guidelines, decision-support tools, common standards and criteria provided for in the Protocols and the Regional Plans developed and/or updated for key priority substances or sectors	1. Prepare a proposal to update the annexes to the [LBS], [HW] Protocols to enhance synergies with the relevant regional and global developments	In house expertise, SSFA, Regional meetings, consultancies	MED POL	CU	Updated annexes to better take into account GES and recent related developments at regional and global levels (Basel Convention, list of priority and emerging pollutants, EU MSFD, EU WFD as appropriate) developed and submitted for review by MED POL FP Meeting in 2019						
		2. Prepare Regional Guidelines on Fishing for Litter and Adopt a beach	Consultancies, regional Meetings, in house expertise	MED POL	RSP, GPA	Draft Guidelines prepared and reviewed by expert meetings for consideration by the MED POL FP meeting in 2019						
		3. Finalize PRTR guidelines and common emission factors to assess the load of pollutants to the Mediterranean Sea, and support the Contracting Parties in their implementation	In house expertise, SSFA, Regional meetings, consultancies	MED POL	EEA, SEIS Project, INFO/RAC	PRTR guidelines and common emission factors developed in consultation with the CP and implemented them as appropriate and upon request to support NBB reporting						
		4. Finalize, validate and apply a common risk assessment tool to identify marine litter accumulation/hotspots (incl. ghost nets)	In house expertise, SSFA, Regional meetings, consultancies	MED POL	ML Regional Collaboration Platform, RSP, GPA	Tool developed and used for Identifying and assessing Marine Litter Hotspots						
2.2.2	Regional programmes of measures identified and negotiated for pollutants/categories (sectors) showing increasing trends, including the revision of existing regional plans and areas of consumption and production	Undertake feasibility studies on the need for preparing legally binding measures/guidelines to achieve and/ or maintain GES for selected sectors/activities including: a) aquaculture b) non single-use of plastic bags c) prohibition of plastics landfilling, d) storm water management and e) WWTP sludge management, f) prevention of micro-plastics generation	Consultancies, Regional Meetings	MED POL	SCP/RAC, Plan Bleu, ML Regional Colaboration Platform	a) Concrete proposal to MED POL FP and ECAP Coordination Group meeting in 2019 on the need for new/updated regional measures in the relevant sectors to achieve/maintain GES ; b) Socioeconomic assessment of selected new/updated regional measures						

2.3.1	Adopted NAPs (Art. 15, LBS Protocol) implemented and targeted outputs timely delivered	1. Support streamlining NAP measures in the national regulatory systems and their implementation in 5 countries (focus ELV&EQS/GES) including Permitting and Inspection based on the most recent MAP technical guidelines (PCB, Lube oil, lead batteries), with the view to enhance marine pollution prevention & control tools in key sectors and contaminants;	SSFA, Consultancies, National/Regional meetings	MED POL	CPs, IMPEL, H2020, Pollution related MEA	a) National regulations/guidelines developed/updated to promote use of BAT and BEP as well as setting common standards and GES for different contaminants/pollutants of national and or regional priority ;						
		2. Undertake an indicator-based midterm evaluation of the NAPs implementation based on the existing reporting system and in close collaboration with the Contracting Parties	In house expertise, consultancies, expert meetings	MED POL	CPs	c) An indicator-based midterm evaluation of NAPs implementation is initiated., NAP indicators populated with data						
2.4.1	National pollution and litter monitoring programmes updated to include the relevant pollution and litter IMAP indicators, implemented and supported by data quality assurance and control	1. Continue supporting of updated national monitoring programmes on marine litter, contaminants and eutrophication in line with IMAP, the LBS Protocol and the Regional Plan on ML.	SSFA, Consultancies, In house expertise, Regional meetings, CORMON	MED POL	AIEA, Quasimeme, Alessandria University, National MED POL Designated Laboratories, EU MSFD TGML, MEDITIS, JRC, other relevant Scientific Institutions	a) Number of countries (3-4) provided with technical and financial support to implement their updated national monitoring programme and submit quality assured data, (according to agreed reporting templates) ;						
		2. Consolidate a common metadata and data reporting template for all related indicators and associated parameters and a QA scheme and checklist				b) Metadata and data reporting template finalized for each indicator, taking into account multiple parameters and integrated into INFOMap system for review by CorMon Pollution and Litter ;						

2.4.1 (cont.)		3. Organize specific training of national monitoring experts on best practices and data reporting and joint monitoring programmes				c) Min 15 CP's: Report on quality assurance of the implementation of national monitoring programmes for contaminants in biota and sediment; biological effects methods; and eutrophication (nutrient and chlorophyll) in seawater to be reviewed in regional/sub-regional meetings (CORMON);						
		4. Undertake coordinated quality assurance and training programmes (eutrophication, contaminant at regional and national levels				d) National experts trained (min 15) on quality assurance programmes for contaminants in biota and sediment; and eutrophication (nutrient and chlorophyll) in seawater ;						
		5. Design a QA programme for marine litter and biomarkers based on existing best practices and systems.				e) QA programme for Marine litter and biomarkers presented for review by CORMON Pollution and Litter.						
		6. Further develop the IMAP Guidance and related factsheets for key Pollution indicators and categories:				a) List of existing monitoring protocols in pollution and marine litter and methodological gaps finalized with a particular focus, on offshore areas monitoring, update of the IMAP Guidance factsheets on Pollution and Marine Litter ; b) Monitoring protocols developed for Marine Litter (e.g. riverine litter, inputs from WWT); c) Minimum four protocols developed and published on Contaminants and Eutrophication (e.g. Offshore and coastal sediment sampling, emerging contaminants in biota, and emerging contaminants in sediments, eutrophication analytical methods); d) Analysis report on bio effects-based methods ; These deliverables will be reviewed annually or on 2 year basis by the CorMon Meetings on Pollution and Litter Litter clusters						

2.4.2	Inventories of pollutant loads (NBB, PRTR from land-based sources, and from offshore and shipping) regularly updated, reported and assessed	Ensure efficient NBB/PRTR reporting and provide support to up to 10 CP including quality assurance control of data	SSFA, Consultancies, Regional Meetings, National Meetings	MED POL	EEA (SEIS Project), INFO/RAC	Updated quality assured data provided by all CPs through PRTR/NBB system													
2.4.3	Marine pollution assessment tools (in depth thematic assessment, maps and indicator factsheets) developed and updated for key pollutants and sectors within EcAp	1. Update the pollution assessment maps with new data up to 2019 at national, sub regional and regional levels with new data including the updated list of hotspots.	Consulancies, SSFA, In house expertise	MED POL	Plan Bleu, CPs	Maps update, hot spots map, inventories map, part of SoED Report and the Joint EEA/MAP H2020 Report													
		2. Further develop the list of H2020/NAP Indicators and related fact sheets including data set dictionaries	SSFA, National and regional consultants, Regional Meeting		Plan Bleu, INFO/RAC, CPs	Fact sheets on core NAP indicators developed and populated with data and used for assessing NAP implementation, H2020 implementation and the LBS Protocol of the Barcelona Convention , Data set dictionnaires developed and updated for the selected indicators													
		4. Update thematic assessments for SoED with new data where applicable (Pollution and Marine Litter)	In house expertise, consultancies, expert meetings		Plan Bleu, EEA (SEIS Project), INFO/RAC	a. Assessment of the effects of marine litter on marine organisms mainly targeting on ingestion of ML from Sea turtles (joint with SPA/RAC) ; b. Identification and initial analysis of ML hotspots in the Mediterranean ; c. Assessment on status of GES in the Mediterranean for Contaminants and Eutrophication taking into account the assessments undertaken during the last biennia on pollution trends, EAC and BAC as well as ML baseline values and targets													
2.5.1	Training programmes and workshops in areas such as pollution monitoring, pollutant inventories, policy implementation, common technical guidelines, authorization and inspections bodies, compliance with national legislation	1. Undertake training to support countries in the implementation of IMAP with a particular focus on scale of assessment, offshore monitoring, integration of indicators towards GES and joint monitoring	Regional/Sub regional Meetings, Consultancies, SSFA	MED POL	CU, SPA/RAC, Plan Bleu/PAP/RAC, CPs	Capacity building offered to national and local experts as appropriate													

2.5.1 (cont.)		2. Promote sharing of best practices on “Adopt-a-beach” and “Fishing-for-Litter” measures; on waste management with particular focus on plastic prevention and e waste; as well as on environmental inspection and law enforcement with a focus on Dumping and offshore Protocols as well as one the newly updated Dumping Protocol Guidelines.	Regional/Sub regional Meetings, Consultancies, SSFA		CPs, ML Collaboration Platform Partners, SCP/RAC, GFCM, IMO, London Dumping Protocol, REMPEC	a) National experts trained on best practices, and awareness raised among local actors and industries ; b) Capacities enhanced on meeting compliance with national regulations							
2.5.2.	Pilot projects implemented on marine litter, POPs, mercury, and illicit discharges reduced, including through SCP solutions for alternatives to POPs and toxic chemicals and the reduction of upstream sources of marine litter for businesses, entrepreneurs, financial institutions and civil society	1. Conclude the Pilots on FfL and Adopt a beach in at least 7 countries removal/reduction and ML prevention (SCP) pilot projects with support from the EU funded ML Project and Cooperation Agreement with Italy	SSFA, Consultancies, In house Expertise	MED POL	CPs	- COP 19 Marine litter reduction targets met in pilot areas; - Assessment report based on the results of the pilot projects in the framework of the ML MED project.							
		2. Design in details pilot projects on PCB, Mercury and decontamination on site based on NAP hotspots	Consultancies, Regional Meetings, Mission to countries	MED POL	CU, CPs, SCP/RAC, UNIDO, GEF	Reduction and disposal of POPs and contaminated areas identified for remediation under the new Med Programme							
2.5.3	Marine pollution prevention and control measures and assessments integrated in ICZM Protocol implementation projects, CAMPs and related Strategic Environment Impact Assessments	Contribute to new CAMPs to consider litter and pollution prevention and reduction Measures (including Offshore activities)	Consultancies, Mission to Countries, National Workshops, in house expertise	MED POL	PAP/RAC, CPs	NAP Measures and tagets streamlined in the CAMP Project							
												TOTAL MTF	TOTAL EXTERNAL
