

## **Written Statement at AHEG4 on Agenda item 3on Multi-Stakeholder Platform**

**2020/11/9**

**Japan**

- Multi-stakeholder platform is deeply related to what AHEG has discussed under agenda or response options, although it is not directly placed in our mandate. We are glad to hear the latest development of Multi-stakeholder platform, while there have been numerous references about multi-stakeholder involvement in the submissions from participants including Japan.
- Since this document only became available a day before this meeting, we have not had enough time to digest the details.
- Based on today's presentation and discussion, we would like to refer to this platform when we discuss multi-stakeholder involvement as one of the potential response options.
