

MALAYSIA'S WRITTEN STATEMENT FOR AHEG4
11 November 2020

Statement at AHEG for Agenda Item 4 (a) Taking stock of existing activities and action (UNEA resolution 4/6, para 7(a))

Malaysia would like to thank the Secretariat and consultant team for the substantive work on stock taking the existing activities and action.

There are many efforts taken at national and regional level, but most activities are at the downstream segment (waste management). Malaysia is of the opinion that it is also important to give attention to the upstream segment, for example redesigning of plastic to increase its recyclability and reusability.
