

UNEP Global Mercury Partnership
1st Mercury Waste Management Area Meeting 2021
Thursday, 8th July 2021, 13:00-15:30 (CEST)

Annotated Agenda

Opening

- Opening remarks by the WMA leads
- Recap of the 2nd WMA Meeting 2020 and adoption of the agenda

Session1: WMA Activity Plan

- The WMA Secretariat will share the development of the Activity Plan and explains Response List (RL), which indicates existing resources responding to the needs identified by the survey. Purpose of the RL is to help Partners recognize missing elements in currently available supporting means for mercury waste management, and consider prospective activities they will carry out. Based on the RL, the WMA Secretariat will present the areas of potential WMA activities, taking collaborations with other GMP Areas into account.
- For effectively implementing WMA activities, setting up Working Groups is suggested. The WMA Secretariat will share the idea of Working Groups to seek feedback from Partners.

Session 2: Factsheet on Mercury Waste

- ISWA, WMA Partner, will introduce the outline of factsheet they are developing. Partners may want to ask questions and consider whether there is an area that each Partner can work together and/or contribute to the Factsheet.

Session3: Information Request and Update of the WMA Catalogue

- List of Mercury Waste Treatment Facilities is to be created as was proposed. One way to do so may be to incorporate the list into the WMA Catalogue. The WMA Secretariat will share the idea of restructuring the Catalogue. Partners will be invited to bring their ideas how to present the list in the Catalogue or in other ways.

Session 4: Moving Forward

- Timeline of for future WMA activities will be announced.
