Mapping of international/regional coordination and cooperation (UNEP) (5 min)

Forum on the Multi-stakeholder Platform on Marine Litter and Microplastics

13 July

Various Initiatives

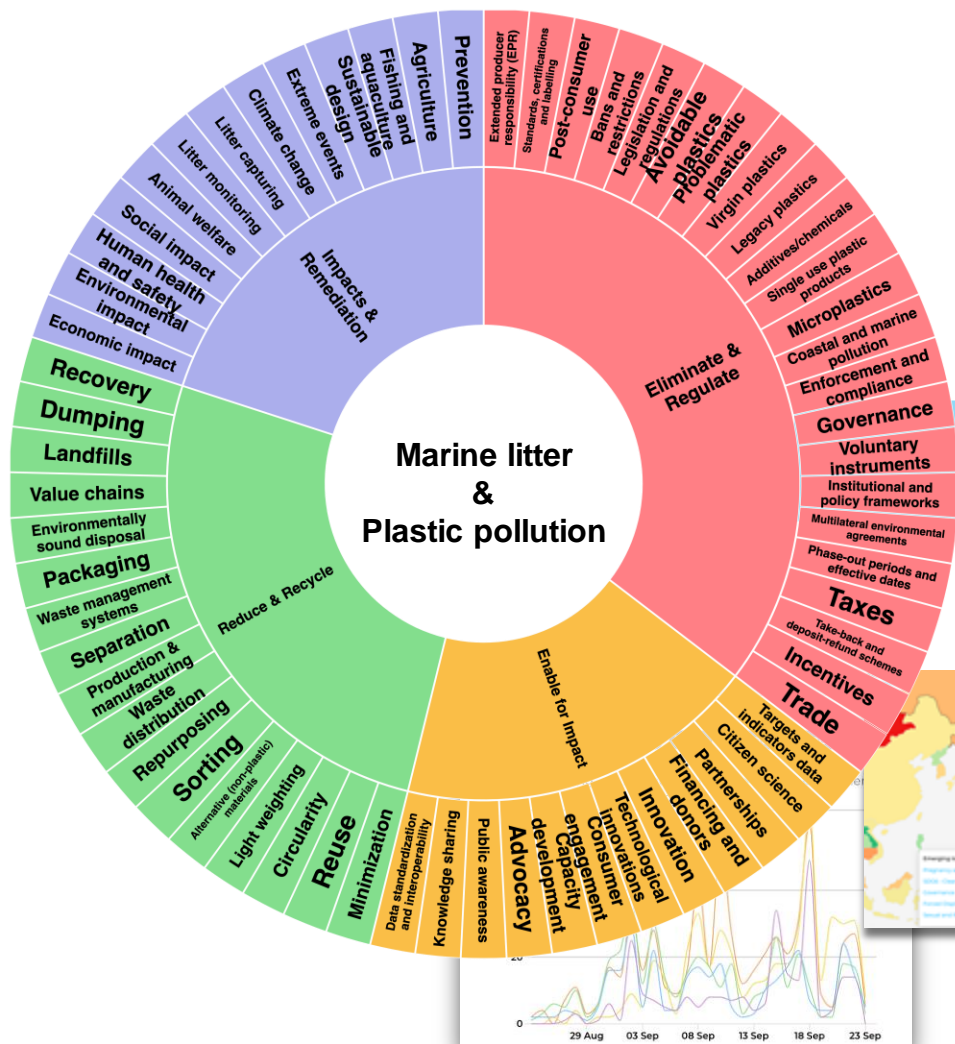

Progress of actions under existing frameworks such as G20, G7, the Basel Convention, IMO, Regional Seas Conventions and Action Plans, ASEAN, APEC and other related developments

Global Partnership
on Marine Litter

Global alignment

Identify who's involved on what topics, where

Multi-stakeholder engagement

Understand their specific expertise and needs

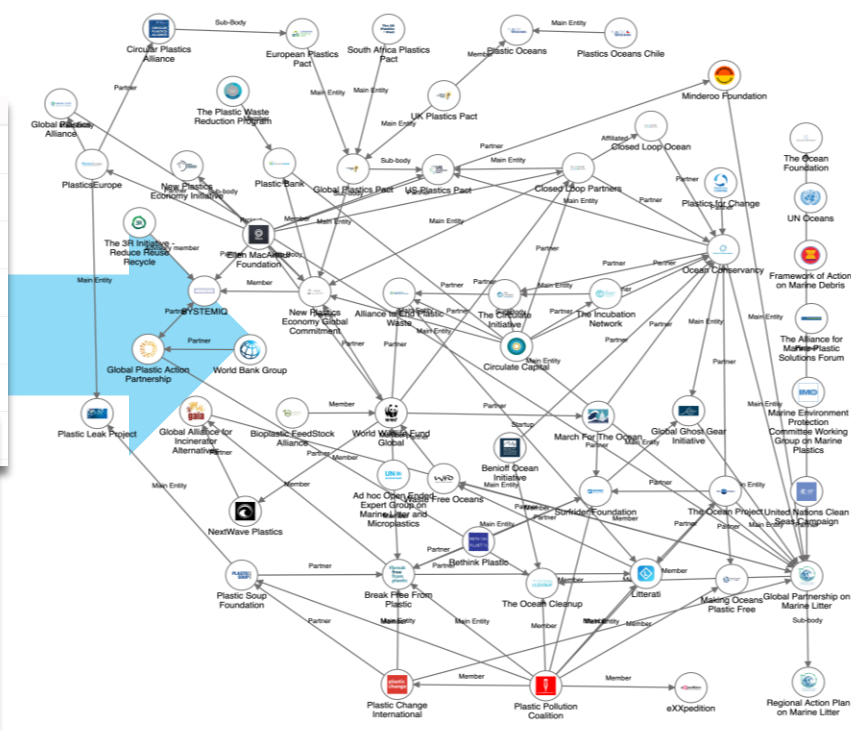

| Stakeholder Group | Name | Organization |
|------------------------|--------------------------|---|
| Global View | Jenna Romness J ambeck | University of Georgia |
| Stakeholder Attributes | Sabine Pahl | University of Vienna |
| Engagement Activities | Peter Ryan | FitzPatrick Institute of African Ornithology, University of Cape Town |
| Custom Fields | Alfonso Navarro Carvallo | Elite SDGs Consultoria |
| Stakeholder type | Steve Morrison | National Oceanic and Atmospheric Administration |
| Sector | Ellen Martin | The Circulate Initiative |
| Seeking | Trang Ng | Seeking |

Offering

- Knowledge management
- Legal services
- Marine litter consultancy

Cross-sectoral mobilization

Break down complex networks, identify synergies and gaps to deliver meaningful impact

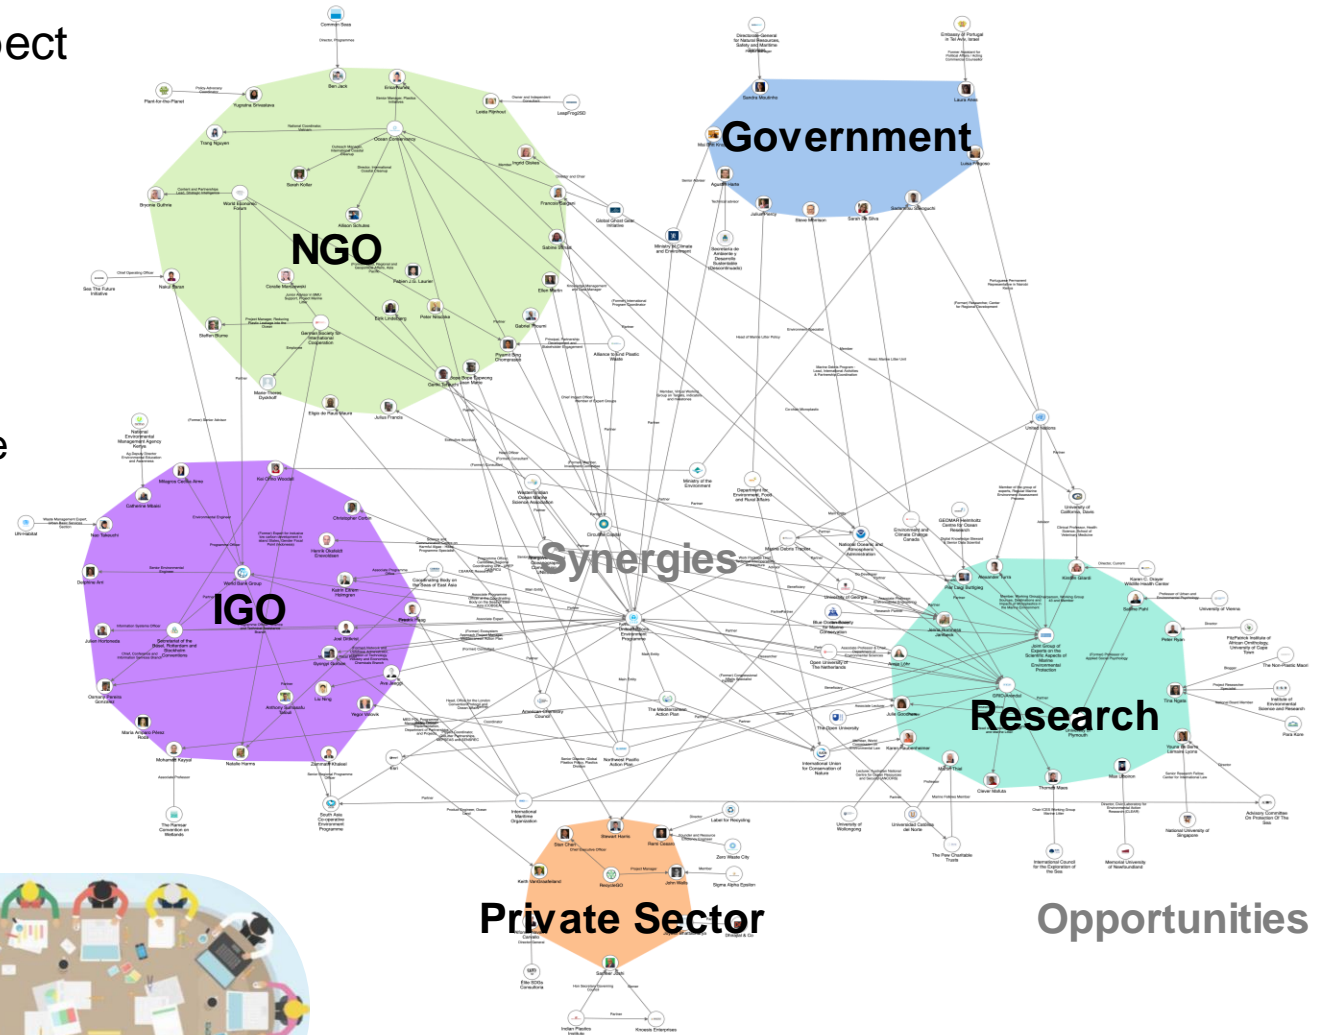

GPML Digital Platform - Connect Stakeholders Pilot

Progress so far:

Initial build of the GPML 'connect stakeholder' aspect on TSC's Atium software, currently tested by 88 registered users from different sectors

- **User Consultations: Input and feedback workshops**
- **Use cases for registered stakeholders in the Stakeholder Connect Pilot:**

- Get a better sense of the GPML ecosystem by exploring the dynamic mappings (who's who, what are they involved in and how are they connected)
- Strengthen the stakeholder data with expertise and requirements to enable more accurate matchmaking
- Next: Identify 'matches' with potential partners in the interactive database of marine litter and plastic pollution

Global Partnership
on Marine Litter

GPML Digital Platform - Connect Stakeholders

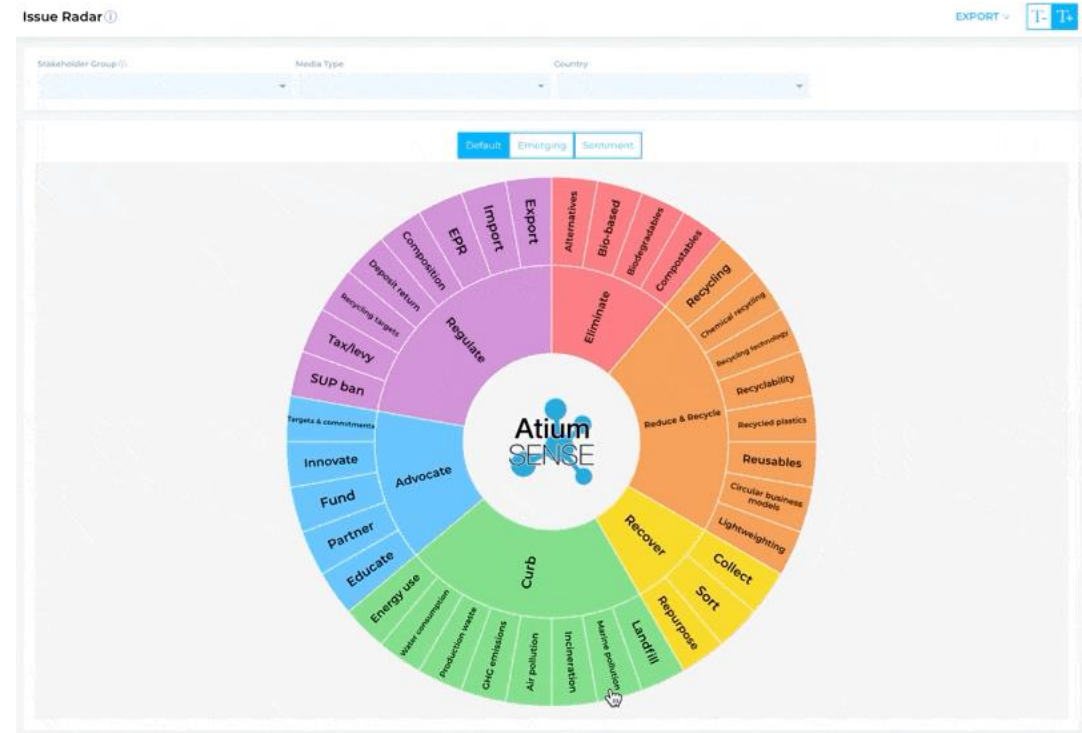

Our approach:

Digitally transform the way GPML registered users interact with each other to effectively partner for impact

- **Stakeholder and issue intelligence within the GPML Digital Platform**
- **Use cases for registered stakeholders on the GPML Digital Platform:**
 - Dynamic, interactive database of marine litter and plastic pollution experts
 - Matchmaking between marine litter and plastic pollution experts and interested stakeholders
 - Connect, share and collaborate

The Pilot vision:

Enable governments, industry, academia, civil society and other stakeholders to share experiences and coordinate action towards the long-term elimination, through a life-cycle approach, of discharges of litter and microplastics into the oceans.
