

Q&A Discussions Summary

Session 3.1: Multi-stakeholder engagement for global actions (to be chaired by US)

Q1: What collaboration among different types of stakeholders could most effectively address marine plastic litter and plastic pollution?

Q2: What functions and roles (that should be added or strengthened) of the Multi-stakeholder Platform do you expect, based on the presentations?

Session 3.2: Product design (to be chaired by EU)

Q1: Regarding the upstream part of plastic life cycle, and product design in particular, what actions stakeholders do you, from your perspective, consider as key to enable sustainable production and consumption at the global level, including reduced marine plastic litter?

Q2: What functions and roles (that should be added or strengthened) of the Multi-stakeholder Platform do you expect, based on the presentations, and how can the platform and its activities supplement and support other actions at the global level?

Session 3.3: Environmentally sound waste management (to be chaired by Japan)

Q1: What are important aspects of environmentally sound waste management in order to achieve a circular economy?

Q2: What functions and roles (that should be added or strengthened) of the Multi-stakeholder Platform do you expect, based on the presentations?
