1. We, the world’s Ministers for the Environment, have gathered in Nairobi, Kenya, together with international organisations, major groups and stakeholders at the fifth session of the United Nations Environment Assembly, under exceptional circumstances created by the COVID-19 pandemic, with the aim to strengthen actions for nature to achieve the Sustainable Development Goals.

3. We are deeply concerned about the devastating impacts of the COVID-19 pandemic on human lives and health, economies and societies, further threatening our ability to achieve the 2030 Agenda for Sustainable Development and the Sustainable Development Goals and are aware that we face heightened risks of future emergence of diseases of zoonotic origin pandemics, and other health threats if we maintain the current patterns of interaction with nature and do not take a One Health approach moving forwards.

4. We recognize that a healthy nature environment is required for sustainable development in all its dimensions, and that the wellbeing of humanity depends on nature and on ecosystems, and the services it provides, are fundamental for the wellbeing of humanity, for human well-being, poverty eradication and economic development are necessary to ensure the long-term conservation of ecosystems and the services they provide, resilience, our health, economy and ultimately our existence.

5. We note therefore with profound concern that nature is facing severe pressures from human activities, and stress the urgent need to halt the global decline and fragmentation of biodiversity and habitats, which is unprecedented in human history, its main indirect and direct drivers being changes in land and sea use, direct exploitation of organisms, unsustainable consumption and production patterns, climate change, invasive alien species and pollution of ocean and fresh water, air, and soil.

6. We note with further grave concern that the 2020 goal for the sound management of chemicals, agreed under the Strategic Approach to International Chemicals Management...
has not been achieved with pollution and adverse effects of chemicals and waste thus remaining a threat to the environment and our health.

7. We recognize the need of ensuring the provision of sufficient, predictable and adequate means of implementation from developed countries to developing countries to fulfill commitments under relevant MEAs, for transformative and systemic changes and for policies that address several environmental, social and economic and societal challenges simultaneously, rechanneling financial flows through innovative holistic approaches that truly value nature, could complement such efforts.

8. We are encouraged by the strength of innovation, knowledge building, and investment in green and sustainable technologies currently taking place which indicate that solutions exist or can be found that can benefit all countries.

9. We welcome the outcomes of COP 26, including adoption of the Glasgow Climate Pact, that recognized the critical role of nature in delivering benefits for climate adaptation and mitigation.

10. We welcome outcomes of Kunming Declaration from the High-Level Segment of the UN Biodiversity Conference 2020 (part 1) under the theme “Ecological Civilization: Building a Shared Future for All Life on Earth”.

11. We welcome and express our support for the upcoming Special Session of the United Nations Environment Assembly [PLACEHOLDER under the theme...] to commemorate the 50th anniversary of the creation of UNEP by the United Nations Conference on the Human Environment, to be held in Nairobi, Kenya on 3-4 March 2022.

12. We commit to supporting an inclusive and sustainable recovery, promoting a sustainable green and just transition, with the goal of revitalizing our economies and livelihoods, contribute poverty eradication, by mainstreaming environmental, economic and social biodiversity, climate and pollution concerns into all policies and tools; making use of sustainable green-economy pathways that emphasize ecosystem and knowledge-based management and by reducing carbon and non-carbon greenhouse gas emissions while adapting to climate change in line with the UNFCCC and its Paris Agreement.

13. We commit to working across sectors and levels of government, and between governments, to halt the loss, degradation, and fragmentation of ecosystems, focusing on areas of particular importance for biodiversity; sustainable land, sea and water use, effectively managing and designating protected areas, safeguarding especially vulnerable habitats, types of nature and eco-
systems, and addressing deforestation, wildlife trafficking, illegal mining, illegal, unreported and unregulated fishing, and other unsustainable activities, crimes and conflicts that have serious impacts on the environment.

14. We commit to promoting conservation and sustainable use and management of nature and its natural resources, to advance sustainable consumption and production patterns, including through resource efficiency and circular economy policy approaches, and by applying considering appropriate valuation diverse values of nature biodiversity and the assessment methods of nature-related risks in policymaking.

15. We commit to promoting and strengthening ecosystem based approaches, including or and nature-based solutions, including by actively reducing deforestation and forest degradation, and by protecting, actively conserving sustainably managing, and restoring degraded land and ecosystems, including those that provide us with food, water, and energy, are habitats for biodiversity and provide carbon storage and sequestration, climate change adaptation and disaster risk reduction, for example natural native forests, wetlands, peatlands, mangroves and coral reefs, thus underpinning our efforts to achieve the Sustainable Development Goals.

16. We recognize the importance of the best available science for effective climate action and policymaking and stress the urgency of enhancing ambition and action in relation to mitigation, adaptation and finance in this critical decade.

17. We will promote comprehensive land and water use planning backed up by robust national enforcement as an invaluable tool for sustainable development and encourage international cooperation to help create a conducive business environment that stimulates investments in sustainable production and value chains.

18. We commit to safeguarding life under water, and restoring a clean, healthy, resilient and productive ocean capable of providing food, sustainable livelihoods, and storing carbon, through strengthening efforts to protect, conserve, and sustainably manage our ocean, seas and coastal ecosystems, while acting to prevent pollution, including nitrogen pollution, and increase resilience to climate change, and prevent marine temperature rise, sea level rise and ocean acidification, by keeping our efforts in line the Agenda 2030, SDG 14 and, as relevant, with the UNFCCC and the its Paris agreement and the Agenda 2030.

19. We maintain our dedication to act in line with the implementation plan towards a pollution-free planet to protect nature the environment and human health from adverse impacts from chemicals and waste and support an ambitious framework for the sound management of chemicals and waste beyond 2020.

20. [Placeholder for text with reference to recent developments and outcomes on Marine Litter]
21. We commit to pursuing and joining new and innovative partnerships across sectors, and engaging with all relevant stakeholders, working with youth, women, Indigenous Peoples and local communities, business, finance and science sectors to develop actions that are nature positive and reverse the persistently negative long-term trend for the environment described by recent scientific reports from the Intergovernmental Science Policy Platform on Biodiversity and Ecosystem Services (IPBES), the Intergovernmental Panel on Climate Change (IPCC), the International Resource Panel (IPR) and the United Nations Environment Programme (UNEP).

22. We commit to cooperating across sectors and levels of governments, in partnership with other governments and local actors and the private sector, to transition to promote sustainable food systems, in line with the 2030 Agenda for Sustainable Development, and which inspired by the UN Food Systems Summit vision while promoting of sustainable food systems that deliver enhanced food security and resilience while reducing emissions, biodiversity loss and freshwater use, as an essential solution to accelerate actions on all the Sustainable Development Goals, and we welcome the UNEP’s strong engagement by UNEP in the Summit follow-up processes (placeholder to include the results of ongoing discussions regarding whether there will be a follow-up process and what it will consist of).

23. We reaffirm the continued need to strengthen actions for nature and our commitment towards the UN Decade on Ecosystem Restoration, and call for an effective, ambitious and transformational post-2020 global biodiversity framework for adoption at the 15th Conference of Parties of the UN Convention on Biological Diversity [that inter alia includes a set of clear and robust goals and targets to address the direct and indirect drivers of biodiversity loss, and the provision of new, additional and predictable financial resources for its implementation in developing countries] as a key instrument to reach the Sustainable Development Goals, and the 2050 vision of the Convention of Biological Diversity of living in harmony with nature.

24. We call for the urgent, adequate and coherent implementation of the actions, commitments and resolutions adopted by the fifth United Nations Environment Assembly as well as previous UNEA outcomes addressing the triple planetary crises—challenges of climate change, biodiversity loss and pollution, and further recognize our role, as Ministers of the Environment, in following up on these commitments within our own governments, contributing to coordinated action across sectors and levels of government and promoting effective implementation.

25. We further recognize that the effective implementation of these actions requires enabling and coherent legal and policy frameworks at all levels, good governance and law enforcement to be supported by effective and urgently mobilized means of implementation, in particular, means of implementation agreed upon under MEAs and from all other sources of finance, including domestic, international, private sector and innovative sources in line with the Addis Ababa Action Agenda and the principles enshrined in the Rio Declaration on Environment and Development, as well as from relevant international environmental agreements, and by further...
capacity-building, environmentally sound technologies, dedicated development partnerships, and a renewed and strong commitment to multilateralism and **international solidarity**.

26. We further welcome and express our support for the upcoming international meeting Stockholm+50: a healthy planet for the prosperity of all – our responsibility, our opportunity, to be held in Stockholm, Sweden, on 2-3 June 2022, to further accelerate the transformation to a sustainable future, and regard this UNEA5 declaration as our input to Stockholm +50 [ref UNGA resolution A/RES/75/280].
