MEDITERRANEAN ACTION PLAN

Consultation Meeting on the
Greek participation in the MED POL programme

Athens, 31 May 1993

**REPORT OF THE CONSULTATION MEETING ON THE
GREEK PARTICIPATION IN THE MED POL PROGRAMME**

1. The first Agreement relative to the implementation of the Greek national monitoring programme was signed in 1988. The Agreement included monitoring of sources and of coastal areas in six zones, namely, Saronikos Gulf (GR1), Patraikos Gulf (GR2), Thermaikos Gulf (GR3), Gulf of Kavala (GR4), Gulf of Strymonas (GR5) and Crete (GR6). While monitoring was also carried out in the Aegean and Ionian seas, these areas were not included in the Agreement.

2. The programme included the participation of 20 Laboratories or Institutes, Saronikos Gulf being the responsibility of the National Centre for Marine Research, the Research Centre "Demokritos" and the University of Athens, Patraikos Gulf the responsibility of the University of Patras while Thermaikos, Kavala and Strymonas Gulfs the responsibility of the University of Thessaloniki and Crete is the responsibility of the local University and of the Institute of Marine Biology.

3. Throughout the years, submission of monitoring data to the MED Unit by Greece has not been constant. Recently, a number of individual reports from participating laboratories have been received but much information was missing which made it impossible for the data to be entered into the MEDU data base. Also, many new scientists have joined the MED POL programme many of whom not being aware of structure and organization of the MED POL programme and its on-going activities. It was therefore decided to invite the Greek scientists for a consultation meeting on the Greek participation in the MED POL programme.

4. Invitations were sent out to all the co-ordinators of the groups responsible for the monitoring of the various areas informing them that the meeting was open to all interested members of their group. A total of 15 scientists including the National Co-ordinator for the MED POL, Ms A. Mourmouris, attended the meeting. A list of all participants including MEDU staff appears as Annex I.

5. The meeting took place on 31 May 1993 at the Offices of the Co-ordinating Unit of the Mediterranean Action Plan, Vassileos Konstantinou 48, Athens. It was opened by Professor S. Busuttii who welcomed the participants and expressed the hope that the Greek participation in the MED POL programme would be intensified. Mr. L. Jeftić made a general presentation of the Mediterranean Action Plan and the MED POL programme and then acted as moderator in the discussion which followed. Transparencies shown by Mr. Jeftić are attached as Annex III to this report.

6. The agenda of the meeting (Annex II) basically covered all relevant MED POL components. Mr. Gabrielides presented the agenda item on monitoring objectives pointing out the fact that the designing of a programme depended primarily on the specific objectives. The need of consistency in trend monitoring was also stressed. Mr. Aksel explained the work on the computerisation of the MED POL data giving emphasis on the submission of data and stressing the difficulties encountered when sufficient information is not provided. Mr. Civili gave an overview of the research and assistance components including training and fellowships. Lists of all Greek research projects and assistance given through training and fellowships are attached as Annexes IV, V and VI to this report.

7. Ms Mourmouris expressed satisfaction for the organization of the meeting and hoped that it could be repeated in the future. She gave a presentation of the Greek national monitoring programme explaining the rationale behind it including the difficulties faced in its implementation.

8. During the debate the participants expressed an interest for an in-depth discussion on a great number of subjects. As this was not possible considering the short duration of the meeting, it was decided to organise another meeting on 28-29 June 1993 at the same place which would cover more in detail (a) the redesigning of the national monitoring programme; (b) the different schemes for scientific cooperation and coordination; (c) the preparation of the consolidated national monitoring report. The meeting will be basically among Greek scientists but MEDU staff would be called in to assist when necessary. Mr. Jeftić mentioned that MEDU could cover the travel cost of one participant from each region.

OBJECTIVES OF MED POL-PHASE I

- **TO FORMULATE AND CARRY OUT A CO-ORDINATED POLLUTION MONITORING AND RESEARCH PROGRAMME TAKING INTO ACCOUNT THE GOALS OF THE MEDITERRANEAN ACTION PLAN AND THE CAPABILITIES OF THE MEDITERRANEAN RESEARCH CENTRES;**
- **TO ASSIST NATIONAL RESEARCH CENTRES IN DEVELOPING THEIR CAPABILITIES TO PARTICIPATE IN THE PROGRAMME;**
- **TO ANALYZE THE SOURCES, AMOUNTS, LEVELS, PATHWAYS, TRENDS AND EFFECTS OF POLLUTANTS IN THE MEDITERRANEAN SEA;**
- **TO PROVIDE THE SCIENTIFIC-TECHNICAL INFORMATION NEEDED BY THE MEDITERRANEAN STATES AND THE EEC FOR NEGOTIATION AND IMPLEMENTATION OF THE CONVENTION FOR THE PROTECTION OF THE MEDITERRANEAN SEA AGAINST POLLUTION AND ITS RELATED PROTOCOLS;**
- **TO BUILD UP CONSISTENT TIME-SERIES ON THE SOURCES, PATHWAYS, LEVELS AND EFFECTS OF POLLUTANTS IN THE MEDITERRANEAN SEA.**

MED POL - PHASE I

MED POL I - MED POL VII

- MED POL I : BASELINE STUDIES AND MONITORING AND OIL AND PETROLEUM HYDROCARBONS IN MARINE WATERS
- MED POL II : BASELINE STUDIES AND MONITORING OF METALS, PARTICULARLY MERCURY AND CADMIUM, IN MARINE ORGANISMS
- MED POL III : BASELINE STUDIES AND MONITORING OF DDT, PCBS, AND OTHER CHLORINATED HYDROCARBONS IN MARINE ORGANISMS
- MED POL IV : RESEARCH ON THE EFFECTS OF POLLUTANTS ON MARINE ORGANISMS AND THEIR POPULATIONS
- MED POL V : RESEARCH ON THE EFFECTS OF POLLUTANTS ON MARINE COMMUNITIES AND ECOSYSTEMS
- MED POL VI : PROBLEMS OF COASTAL TRANSPORT OF POLLUTANTS
- MED POL VII : COASTAL WATER QUALITY CONTROL

MED POL VIII - MED POL XIII

MED POL VIII : BIOGEOCHEMICAL STUDIES OF SELECTED POLLUTANTS
IN THE OPEN WATERS OF THE MEDITERRANEAN

MED POL IX : ROLE OF SEDIMENTATION IN THE POLLUTION OF
THE MEDITERRANEAN SEA

MED POL X : POLLUTANTS FROM LAND-BASED SOURCES IN THE
MEDITERRANEAN

MED POL XI : INTERCALIBRATION OF ANALYTICAL TECHNIQUES
AND COMMON MAINTENANCE SERVICES

MED POL XII : INPUT OF POLLUTANTS INTO THE MEDITERRANEAN
SEA VIA THE ATMOSPHERE

MED POL XIII : MODELLING OF MARINE SYSTEMS

OBJECTIVES OF MED POL-PHASE II

- **INFORMATION REQUIRED FOR THE IMPLEMENTATION OF THE CONVENTION AND THE PROTOCOLS;**
- **INDICATORS AND EVALUATION OF THE EFFECTIVENESS OF THE POLLUTION PREVENTION MEASURES TAKEN UNDER THE CONVENTION AND THE PROTOCOLS;**
- **SCIENTIFIC INFORMATION THAT MAY LEAD TO EVENTUAL REVISIONS AND AMENDMENTS OF THE RELEVANT PROVISIONS OF THE CONVENTION AND THE PROTOCOLS AND FOR THE FORMULATION OF ADDITIONAL PROTOCOLS;**
- **INFORMATION THAT COULD BE USED TO FORMULATE ENVIRONMENTALLY SOUND NATIONAL, BILATERAL AND MULTILATERAL MANAGEMENT DECISIONS ESSENTIAL FOR THE CONTINUOUS SOCIO-ECONOMIC DEVELOPMENT OF THE MEDITERRANEAN REGION ON A SUSTAINABLE BASIS;**
- **PERIODIC ASSESSMENT OF THE STATE OF POLLUTION OF THE MEDITERRANEAN SEA.**

MED POL RESEARCH AREAS

(1982 - 1989)

- (a) Development of sampling and analytical techniques for monitoring the sources and levels of pollutants. Testing and harmonization of these methods at the Mediterranean scale and their formulation as reference methods. Substances listed in Dumping and Land-Based Sources Protocol priorities.
- (b) Development of reporting formats required according to the Dumping, Emergency and Land-Based Sources Protocols.
- (c) Formulation of the scientific rationale for the environmental quality criteria to be used in the development of emission standards, standards of use or guidelines for substances listed in annexes I and II of the Land-Based Sources Protocol in accordance with Articles 5, 6 and 7 of that Protocol.
- (d) Epidemiological studies related to the confirmation (or eventual revision) of the proposed environmental quality criteria (standards of use) for bathing waters, shellfish-growing waters and edible marine organisms.
- (e) Development of proposals for guidelines and criteria governing the application of the Land-Based Sources Protocol, as requested in Article 7 of that Protocol.
- (f) Research on oceanographic processes, with particular emphasis on surface circulation and vertical transport. Needed for the understanding of the distribution of pollutants through the Mediterranean and for the development of contingency plans for cases of emergency.
- (g) Research on the toxicity, persistence, bioaccumulation, carcinogenicity and mutagenicity of selected substances listed in annexes of the Land-Based Sources Protocol and the Dumping Protocol.
- (h) Research on eutrophication and concomitant plankton blooms. Needed to assess the feasibility of alleviating the consequences and damage from such recurring blooms.
- (i) Study of ecosystem modifications in areas influenced by pollutants, and in areas where ecosystem modifications are caused by large-scale coastal or inland engineering activity.
- (j) Effects of thermal discharges on marine and coastal ecosystems, including the study of associated effects.
- (k) Biogeochemical cycle of specific pollutants, particularly those relevant to human health (mercury, lead, survival of pathogens in the Mediterranean Sea, etc.).
- (l) Study of pollutant-transfer processes (i) at river/sea and air/sea interface, (ii) by sedimentation and (iii) through the straits linking the Mediterranean with other seas.

MED POL RESEARCH AREAS

(AS FROM 1990)

Research area I - Characterization and measurement

This area will include projects which cover the characterization (identification of chemical or microbiological components) and measurement development and testing of methodologies of specified contaminants.

Research area II - Transport and dispersion

This area will include projects which aim at improving the understanding of the physical, chemical and biological mechanisms that transport potential pollutants from their sources to their ultimate repositories. Typical topics will be atmospheric transport and deposition, water movements and mixing, transport of contaminants by sedimentation and their incorporation in biogeochemical cycles. Priority will be given to the provision of quantitative information ultimately useful for modelling the system and contributing to regional assessments.

Research area III - Effects

This area will include projects relevant to the effects of selected contaminants, listed in annexes I and II of the Land-Based Sources and Dumping Protocols, to marine organisms, communities and ecosystems or man and human populations. Priority will be given to effects and techniques providing information useful for establishing environmental quality criteria.

Research area IV - Fates/Environmental transformation

This area will include projects studying the fate of contaminants (including microorganisms) in the marine environment such as persistence or survival, degradation, transformation, bioaccumulation etc. but excluding transport and dispersion which is dealt in area II.

Research area V - Prevention and control

This area will include projects dealing with the determination of the factors affecting the efficiency of waste treatment and disposal methods under specific local conditions as well as the development of environmental quality criteria and common measures for pollution abatement.

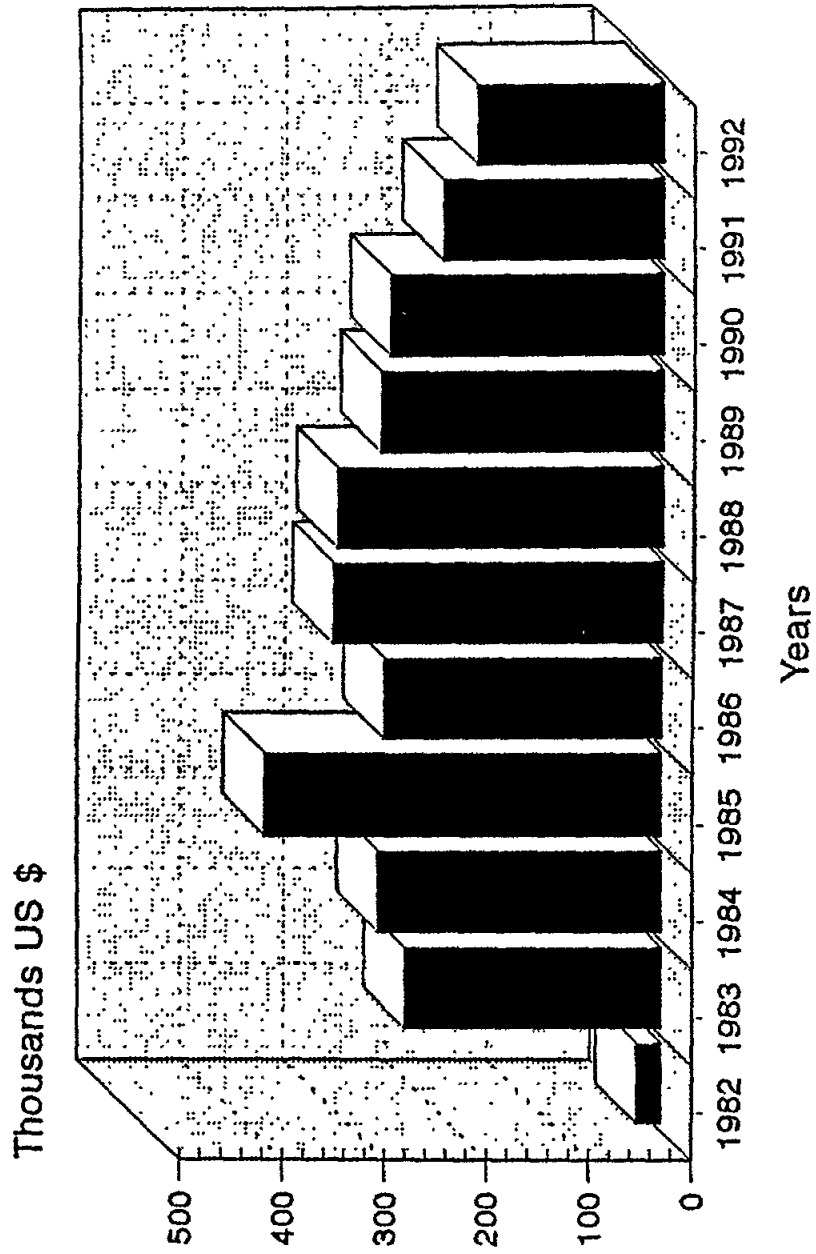

MED POL RESEARCH AREAS

(AS FROM 1992)

Research area VI - Eutrophication and Plankton Blooms

This area will include "case studies" related to eutrophication and plankton blooms. The studies will cover the physical and biological aspects of this phenomenon including modelling and will be concentrated in specific limited areas.

**FINANCIAL CONTRIBUTION TO RESEARCH PROJECTS PER YEAR
1982 - 1992**

MARINE POLLUTION ASSESSMENTS

- I. Are we asking the right questions?
- II. Are we getting the right answers?

The Pilot Monitoring Programme

- **Objective:** To evaluate the presence and effects of contamination in an area with quantifiable land-based sources and which is representative of similar areas within the region of interest.
- **Inputs required:**
 - A land-based source survey of the contaminants studied.
 - Basic studies of the dynamics and biology of the area.
 - Information on land and sea use, sensitive ecosystems, etc.
 - Background info. on the contaminants and their effects.
- **Studies made:**
 - Presence and spatial and temporal distribution of target contaminants in appropriate phases in order to establish contamination gradients from the source to "background" levels.
 - Biological effects studies along the observed gradient(s)

The Pilot Monitoring Programme

- **Results expected:** With careful site selection, contaminant gradients can be measured relating to identified principal sources (domestic, single industrial activity, major agricultural practice etc.). These can then be related to biological effects, though considerable care is required in data interpretation.
- **The assessment:** Careful analysis of the data should reveal:
 - The presence or absence of marine pollution associated with specific coastal-zone activities.
 - The potential impact of the marine pollution on marine resources, sensitive ecosystems, etc.
- **Application:** Decision of whether or not to start a wider monitoring programme in areas similar to that of the pilot study. Decision whether to take remedial/preventative measures. Evidence for requesting support for follow-up.

FULL SCALE MONITORING

-Repeated measurements in time and/or space-

- **OBJECTIVE:** To provide data upon which to base objective decisions for environmental management.
- **AIMS:** Four main reasons for monitoring:
 - (i) Contaminant levels in edible marine organisms for the protection of public health.
 - (ii) Identification of heavily contaminated areas of the marine environment ("hot spots") where adverse biological effects are evident or the integrity of sensitive communities is threatened.
 - (iii) The establishment of present levels of contamination (a "baseline").
 - (iv) Assessment of concentration changes of contaminants in time ("trends").

FULL-SCALE MONITORING (2)

Basic Requirements

- Antecedents
 - Previous studies including research, background information on sampling sites and target contaminants, and a survey of sources, land-based, atmospheric and marine
 - A Pilot monitoring study
- A viable network of committed laboratories with suitable instrumentation and qualified personnel.
- Widely applicable methodology with suitable precision and accuracy.
- A strong quality assurance programme which includes intercomparison exercises, continuous quality control using reference materials, training and equipment maintenance.
- Good planning and sufficient funds

Selecting contaminants for assessment

- Conduct a land based sources survey in the region
 - Map the sources and coastal-zone (land and marine) useage
 - List major components of discharges and volumes (where known) for point sources (industrial and domestic)
 - List agricultural activities and major products applied in the case of diffuse sources
- For each potential contaminant and residue gather existing information on:
 - Persistence
 - Environmental chemistry (partition, reactivity, fate)
 - Environmental biology (toxicity, biomagnification)
- Based on the above, establish priority ratings for the listed contaminants also considering national development criteria and legislation (pollutants restricted to the coastal zone) or international criteria where contaminant gradients may extend beyond national jurisdiction.

MANAGEMENT ACTIONS

MED POL - PHASE II

MONITORING

1. MONITORING OF SOURCES OF POLLUTION PROVIDING INFORMATION ON THE TYPE AND AMOUNT OF POLLUTANTS RELEASED DIRECTLY INTO THE ENVIRONMENT
2. MONITORING OF NEARSHORE AREAS, INCLUDING ESTUARIES, UNDER THE DIRECT INFLUENCE OF POLLUTANTS FROM IDENTIFIABLE PRIMARY (OUTFALLS DISCHARGE AND COASTAL DUMPING POINTS) OR SECONDARY (RIVER) SOURCES
3. MONITORING OF OFFSHORE AREAS (REFERENCE AREAS) PROVIDING INFORMATION ON THE GENERAL TRENDS IN THE LEVEL OF POLLUTION IN THE MEDITERRANEAN.
4. MONITORING OF THE TRANSPORT OF POLLUTANTS TO THE MEDITERRANEAN THROUGH THE ATMOSPHERE, PROVIDING ADDITIONAL INFORMATION ON THE POLLUTION LOAD REACHING THE MEDITERRANEAN SEA

SELECTED PARAMETERS

A. MONITORING OF EFFLUENTS

CATEGORY I PARAMETERS:

VOLUME AND CHARACTERISTICS OF DISCHARGE (E.G. PH,
TEMPERATURE, GENERAL COMPOSITION)

- TOTAL MERCURY
- TOTAL CADMIUM
- TOTAL SUSPENDED SOLIDS
- TOTAL PHOSPHORUS
- TOTAL NITROGEN
- FAECAL COLIFORMS
- BOD/COD
- HIGH MOLECULAR WEIGHT HALOGENATED HYDROCARBONS

CATEGORY II PARAMETERS:

- PETROLEUM HYDROCARBONS
- DETERGENTS
- PHENOLS
- TOTAL CHROMIUM
- SELECTED RADIONUCLIDES
- OTHER POLLUTANTS KNOWN TO BE DISCHARGED IN
SIGNIFICANT QUANTITIES

NOTE: IN THE SPECIFIC CASE OF MONITORING INDUSTRIAL EFFLUENTS,
THE PARAMETERS LISTED ABOVE AND/OR OTHER PARAMETERS
SHOULD BE SELECTED IN ACCORDANCE WITH THE SPECIFIC
COMPOSITION OF THE WASTEWATER DISCHARGED

SELECTED PARAMETERS

B. MONITORING OF ESTUARIES INCLUDING THE AREAS DEFINED IN ARTICLE 3(B) OF THE LAND-BASED SOURCES PROTOCOL

CATEGORY I PARAMETERS:

- TOTAL MERCURY IN ORGANISMS AND SEDIMENTS
- ORGANIC MERCURY IN ORGANISMS
- TOTAL CADMIUM IN ORGANISMS AND SEDIMENTS
- HIGH MOLECULAR WEIGHT HALOGENATED HYDROCARBONS IN ORGANISMS AND SEDIMENTS
- FAECAL COLIFORMS IN WATER AND BIVALVES
- TOTAL PHOSPHORUS IN WATER AND SUSPENDED MATTER
- TOTAL NITROGEN IN WATER AND SUSPENDED MATTER
- TOTAL SUSPENDED MATTER
- COD
- BASIC OCEANOGRAPHICAL AND METEOROLOGICAL PARAMETERS (SALINITY, OXYGEN, TEMPERATURE, CHLOROPHYLL)

CATEGORY II PARAMETERS:

- RADIONUCLIDES IN ORGANISMS
- POLYNUCLEAR AROMATIC HYDROCARBONS IN ORGANISMS
- PHENOLS IN WATER

LAND-BASED SOURCES PROTOCOL

ANNEX I

A

THE FOLLOWING SUBSTANCES, FAMILIES AND GROUPS OF SUBSTANCES ARE LISTED, NOT IN ORDER OF PRIORITY, FOR THE PURPOSES OF ARTICLE 5 OF THIS PROTOCOL. THEY HAVE BEEN SELECTED MAINLY ON THE BASIS OF THEIR

TOXICITY;
PERSISTENCE;
BIOACCUMULATION.

1. ORGANOHALOGEN COMPOUNDS AND SUBSTANCES WHICH MAY FORM SUCH COMPOUNDS IN THE MARINE ENVIRONMENT.^{1/}
2. ORGANOSPHORUS COMPOUNDS AND SUBSTANCES WHICH MAY FORM SUCH COMPOUNDS IN THE MARINE ENVIRONMENT.^{1/}
3. ORGANOTIN COMPOUNDS AND SUBSTANCES WHICH MAY FORM SUCH COMPOUNDS IN THE MARINE ENVIRONMENT.^{1/}
4. MERCURY AND MERCURY COMPOUNDS.

¹ WITH THE EXCEPTION OF THOSE WHICH ARE BIOLOGICALLY HARMLESS OR WHICH ARE RAPIDLY CONVERTED INTO BIOLOGICALLY HARMLESS SUBSTANCES.

LAND-BASED SOURCES PROTOCOL

ANNEX I

A

5. CADMIUM AND CADMIUM COMPOUNDS.
6. USED LUBRICATING OILS.
7. PERSISTENT SYNTHETIC MATERIALS WHICH MAY FLOAT, SINK OR REMAIN IN SUSPENSION AND WHICH MAY INTERFERE WITH ANY LEGITIMATE USE OF THE SEA.
8. SUBSTANCES HAVING PROVEN CARCINOGENIC, TERATOGENIC OR MUTAGENIC PROPERTIES IN OR THROUGH THE MARINE ENVIRONMENT.
9. RADIOACTIVE SUBSTANCES, INCLUDING THEIR WASTES, WHEN THEIR DISCHARGES DO NOT COMPLY WITH THE PRINCIPLES OF RADIATION PROTECTION AS DEFINED BY THE COMPETENT INTERNATIONAL ORGANIZATIONS, TAKING INTO ACCOUNT THE PROTECTION OF THE MARINE ENVIRONMENT.

B

THE PRESENT ANNEX DOES NOT APPLY TO DISCHARGES WHICH CONTAIN SUBSTANCES LISTED IN SECTION A THAT ARE BELOW THE LIMITS DEFINED JOINTLY BY THE PARTIES.

LAND-BASED SOURCES PROTOCOL

ANNEX II

A

THE FOLLOWING SUBSTANCES, FAMILIES AND GROUPS OF SUBSTANCES, OR SOURCES OF POLLUTION, LISTED NOT IN ORDER OF PRIORITY FOR THE PURPOSES OF ARTICLE 6 OF THIS PROTOCOL, HAVE BEEN SELECTED MAINLY ON THE BASIS OF CRITERIA USED FOR ANNEX I, WHILE TAKING INTO ACCOUNT THE FACT THAT THEY ARE GENERALLY LESS NOXIOUS OR ARE MORE READILY RENDERED HARMLESS BY NATURAL PROCESSES AND THEREFORE GENERALLY AFFECT MORE LIMITED COASTAL AREAS.

1. THE FOLLOWING ELEMENTS AND THEIR COMPOUNDS:

- | | | |

OBJECTIVES OF SITE SPECIFIC CASE STUDIES

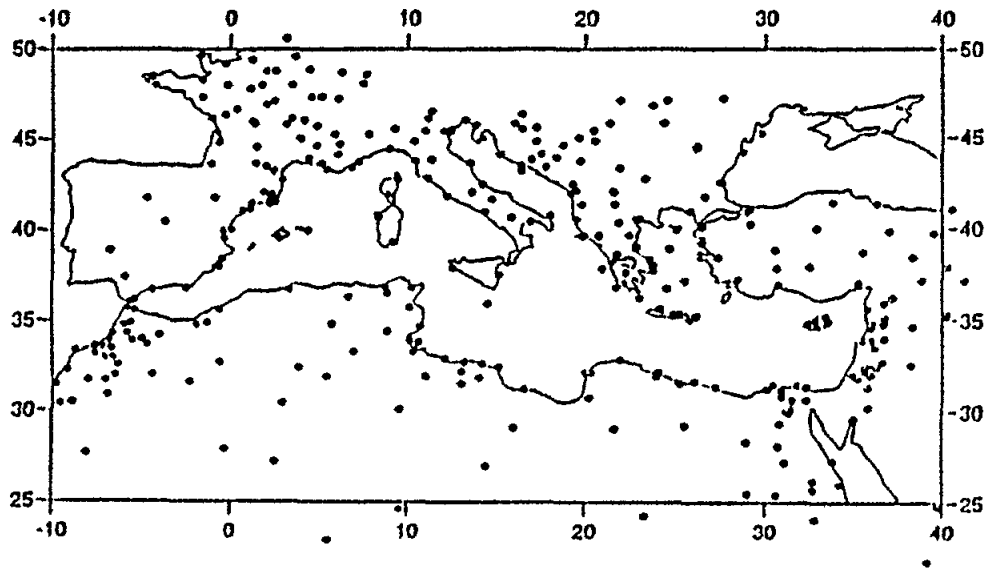

OBJECTIVES OF THE CASE STUDY ARE:

- **TO IDENTIFY AND ASSESS POSSIBLE IMPLICATIONS OF EXPECTED CLIMATE CHANGE ON THE TERRESTRIAL, AQUATIC AND MARINE ECOSYSTEMS, POPULATIONS, LAND-USE AND SEA-USE PRACTICES AND OTHER HUMAN ACTIVITIES;**
- **TO DETERMINE AREAS OR SYSTEMS WHICH APPEAR TO BE MOST VULNERABLE TO THE EXPECTED CLIMATE CHANGE; AND**
- **TO IDENTIFY OPTIONS AND GIVE RECOMMENDATIONS FOR PLANNING AND MANAGEMENT OF COASTAL AREAS AND RESOURCES, AS WELL AS FOR PLANNING AND DESIGN OF MAJOR INFRASTRUCTURE AND OTHER SYSTEMS.**

MED POL RESEARCH AREAS

(1982 - 1989)

- (a) Development of sampling and analytical techniques for monitoring the sources and levels of pollutants. Testing and harmonization of these methods at the Mediterranean scale and their formulation as reference methods. Substances listed in Dumping and Land-Based Sources Protocol priorities.
- (b) Development of reporting formats required according to the Dumping, Emergency and Land-Based Sources Protocols.
- (c) Formulation of the scientific rationale for the environmental quality criteria to be used in the development of emission standards, standards of use or guidelines for substances listed in annexes I and II of the Land-Based Sources Protocol in accordance with Articles 5, 6 and 7 of that Protocol.
- (d) Epidemiological studies related to the confirmation (or eventual revision) of the proposed environmental quality criteria (standards of use) for bathing waters, shellfish-growing waters and edible marine organisms.
- (e) Development of proposals for guidelines and criteria governing the application of the Land-Based Sources Protocol, as requested in Article 7 of that Protocol.
- (f) Research on oceanographic processes, with particular emphasis on surface circulation and vertical transport. Needed for the understanding of the distribution of pollutants through the Mediterranean and for the development of contingency plans for cases of emergency.
- (g) Research on the toxicity, persistence, bioaccumulation, carcinogenicity and mutagenicity of selected substances listed in annexes of the Land-Based Sources Protocol and the Dumping Protocol.
- (h) Research on eutrophication and concomitant plankton blooms. Needed to assess the feasibility of alleviating the consequences and damage from such recurring blooms.
- (i) Study of ecosystem modifications in areas influenced by pollutants, and in areas where ecosystem modifications are caused by large-scale coastal or inland engineering activity.
- (j) Effects of thermal discharges on marine and coastal ecosystems, including the study of associated effects.
- (k) Biogeochemical cycle of specific pollutants, particularly those relevant to human health (mercury, lead, survival of pathogens in the Mediterranean Sea, etc.).
- (l) Study of pollutant-transfer processes (i) at river/sea and air/sea interface, (ii) by sedimentation and (iii) through the straits linking the Mediterranean with other seas.

MED POL RESEARCH AREAS

(AS FROM 1990)

Research area I - Characterization and measurement

This area will include projects which cover the characterization (identification of chemical or microbiological components) and measurement development and testing of methodologies of specified contaminants.

Research area II - Transport and dispersion

This area will include projects which aim at improving the understanding of the physical, chemical and biological mechanisms that transport potential pollutants from their sources to their ultimate repositories. Typical topics will be atmospheric transport and deposition, water movements and mixing, transport of contaminants by sedimentation and their incorporation in biogeochemical cycles. Priority will be given to the provision of quantitative information ultimately useful for modelling the system and contributing to regional assessments.

Research area III - Effects

This area will include projects relevant to the effects of selected contaminants, listed in annexes I and II of the Land-Based Sources and Dumping Protocols, to marine organisms, communities and ecosystems or man and human populations. Priority will be given to effects and techniques providing information useful for establishing environmental quality criteria.

Research area IV - Fates/Environmental transformation

This area will include projects studying the fate of contaminants (including microorganisms) in the marine environment such as persistence or survival, degradation, transformation, bioaccumulation etc. but excluding transport and dispersion which is dealt in area II.

Research area V - Prevention and control

This area will include projects dealing with the determination of the factors affecting the efficiency of waste treatment and disposal methods under specific local conditions as well as the development of environmental quality criteria and common measures for pollution abatement.

MED POL RESEARCH AREAS

(AS FROM 1992)

Research area VI - Eutrophication and Plankton Blooms

This area will include "case studies" related to eutrophication and plankton blooms. The studies will cover the physical and biological aspects of this phenomenon including modelling and will be concentrated in specific limited areas.
