Towards CLIMATE STABILITY

MTS Target state:

Outcome 1: Decision makers at all levels adopt decarbonization, dematerialization and resilience pathways.

Outcome 2: Countries and stakeholders have increased capacity, finance and access to technologies to deliver on the adaptation and mitigation goals of the Paris Agreement.

Outcome 3: State and non-state actors adopt the enhanced transparency framework arrangements under the Paris Agreement.

Towards LIVING IN HARMONY WITH NATURE

MTS Target state:

Outcome 1: Economically and socially sustainable pathway to halt and reverse the loss of biodiversity and ecosystem integrity established.

Outcome 2: Sustainable management of nature is adopted and implemented in development frameworks.

Outcome 3: Nature conservation and restoration are enhanced.

Towards a POLLUTION FREE PLANET

MTS Target state:

Outcome 1: Human health and environmental outcomes are optimized through enhanced capacity and leadership on the sound management of chemicals and waste.

Outcome 2: Waste management improved including through circular processes, safe recovery of secondary raw materials and progressive reduction of open burning and dump sites.

Outcome 3: Reduced releases of pollutants to air, water, soil and the ocean.

A smiling indigenous woman, likely from a tropical region, is the central figure. She wears a colorful headband with feathers and beads, and a traditional woven garment adorned with multiple necklaces of red and white beads. She holds a large, bundled bundle of green palm fronds. The background is a lush, green forest with a waterfall cascading down a rocky ledge on the left side. The overall scene is vibrant and natural.
