

# Operating Principles Governing the Work of the Panel

## Request for Written Submissions from Member States and Relevant Stakeholders

Member states, during the resumed first session of the Open-ended Working Group (OEWG1.2), requested the Secretariat of the OEWG to solicit written submissions from Member States and relevant stakeholders regarding the operating principles governing the work of the panel.

In support of this request, the Secretariat conducted a webinar (on 26 April 2023) dedicated to the issue of operating principles. In advance of the webinar, the Secretariat released a background document which provides a comparative overview of operating principles of relevant, existing science-policy panels (IPCC, IPBES, IRP and GEO). The recording of the webinar can be found on [this website](#), when available, and the background document is available at [this link](#).

A variety of potential operating principles are presented below, based on the analysis performed for this [background document](#). The following questions in no way attempt to rank or preclude consideration of the operating principles of the future SPP, rather, they draw from the agreed text of Resolution 5/8 and other existing, relevant science-policy bodies, as well as the discussions at the OEWG. You may also suggest relevant potential operating principles that have not been identified yet.

Member States are invited to provide submissions through their respective national focal points (list of focal points available [at this link](#)). Non-government stakeholders are invited to submit their submissions on behalf of their organization or group. You are invited to respond to all or some of the questions below. Once complete, please submit this filled document to [SPP-CWP@un.org](mailto:SPP-CWP@un.org). All submissions will be uploaded online and will inform a working document to be considered at OEWG 2.

Yemen expresses its happiness with Resolution 5/8 and hopes to start implementing it, as it is considered an independent international entity that contributes to providing scientific advice to reduce the effects of mismanagement of chemicals. We see the involvement of all stakeholders and stakeholders, stressing that when establishing the team, the possibility of political aspects that may prevent the implementation of the procedures, Consideration may also be given to focusing on information collecting , scientific analyses, and response evaluation; and addressing legacy issues that continue to plague the lives and environments of communities around the world

Yemen believes that it is necessary to focus on supporting developing countries in overcoming the obstacles of technical capabilities and technology for the sound management of chemicals and wastes
