

Operating Principles Governing the Work of the Panel

Request for Written Submissions from Member States and Relevant Stakeholders

Member states, during the resumed first session of the Open-ended Working Group (OEWG1.2), requested the Secretariat of the OEWG to solicit written submissions from Member States and relevant stakeholders regarding the operating principles governing the work of the panel.

In support of this request, the Secretariat conducted a webinar (on 26 April 2023) dedicated to the issue of operating principles. In advance of the webinar, the Secretariat released a background document which provides a comparative overview of operating principles of relevant, existing science-policy panels (IPCC, IPBES, IRP and GEO-7). The recording of the webinar can be found on [this website](#), when available, and the background document is available at [this link](#).

A variety of potential operating principles are presented below, based on the analysis performed for this [background document](#). The following questions in no way attempt to rank or preclude consideration of the operating principles of the future SPP, rather, they draw from the agreed text of Resolution 5/8 and other existing, relevant science-policy bodies, as well as the discussions at the OEWG. You may also suggest relevant potential operating principles that have not been identified yet.

Member States are invited to provide submissions through their respective national focal points (list of focal points available [at this link](#)). Non-government stakeholders are invited to submit their submissions on behalf of their organization or group. You are invited to respond to all or some of the questions below. Once complete, please submit this filled document to SPP-CWP@un.org. All submissions will be uploaded online and will inform a working document to be considered at OEWG 2.
