

Name of Member State	ARGENTINA
Date	September 15 <sup>th</sup> 2023

First draft, August 2023

**Ministerial declaration for the sixth session  
of the United Nations Environment Assembly**

**“Effective, inclusive, and sustainable multilateral actions to tackle climate change, biodiversity loss, and pollution, land degradation, desertification and drought”**

1. We, the world’s ministers for the environment, have gathered in Nairobi, Kenya, **from 26 February to 1 March 2024**, together with representatives of international organizations, major groups and other stakeholders at the sixth session of the United Nations Environment Assembly, with the urgent aim of taking effective, inclusive and sustainable multilateral action to tackle **the three planetary environmental crises** of climate change, biodiversity loss, ~~and~~ pollution, ~~land degradation, desertification and drought, among others.~~
2. We reaffirm all the principles of the Rio **Declaration** on Environment and Development, the 2030 **Agenda** for Sustainable Development and the Sustainable Development Goals (SDGs) ~~and we welcome the recommendations of the Secretary-General in his report Our Common Agenda and the Stockholm+50 International Meeting.~~
3. We acknowledge with great urgency the systemic threats posed by the ~~three~~ planetary **environmental crises** of climate change, biodiversity loss ~~and pollution~~ ~~pollution, land degradation and desertification, among others,~~ to sustainable development **and their impacts on human and environmental health, and well-being and security.**
4. We emphasize the importance of ~~integrated,~~ science-based approaches, **informed by the latest and best available evidence**, as well as, ~~as appropriate, by~~ the knowledge of Indigenous Peoples and local communities, ~~to strengthen resilience to present and future emerging challenges, promote global solidarity and advance the realization of the UN General Assembly’s resolution 76/300 on the human right to a clean, healthy, and sustainable environment.~~
5. We welcome the important outcomes of the twenty-seventh **session** of the conference of the Parties to the United Nations Framework Convention on Climate Change (UNFCCC COP27), including commitments to establish **new funding arrangements for assisting developing countries which are particularly vulnerable to the adverse impacts of climate change, including with a focus on addressing Loss and Damage** as well as the Sharm el-Sheikh Implementation Plan; the twenty eighth session of the Conference of the Parties to the UNFCCC (**COP 28**) including XXX; the fifteenth meeting of the Conference of the Parties to the Convention on Biological Diversity (CBD) and its adoption of the ~~historic Kunming-Montreal Global Biodiversity Framework, to halt and reverse biodiversity loss by 2030~~ and the fifteenth Conference of the Parties to the United Nations Convention to Combat Desertification (UNCCD), and the ~~Abidjan Call~~ to act on drought, desertification and land degradation; **as well as the Fifth International Conference on Chemicals Management (ICCM-5) including the [agreement] on a new chemicals and waste management framework beyond 2020, the sixteenth meeting of the Conference of the Parties to the Basel Convention (BC COP-16), the eleventh meeting of the Conference of the Parties to the Rotterdam Convention (RC COP-11) and the eleventh meeting of the Conference of the Parties to the Stockholm Convention (SC COP-11) which were held back-to-back and resulted in the adoption of updated technical guidelines on the environmentally sound management of plastic wastes, Persistent Organic Pollutants (POPs) wastes and e-wastes, and listing of hazardous substances;**

**Comentado [ARG1]:** The broad mandate given to UNEA by the General Assembly should not be limited to climate change, biodiversity loss and pollution. There is a wide range of environmental challenges that should have been consistently identified as major issues and they deserved to be mentioned by name in the declaration.

**Comentado [ARG2]:** It is not appropriate to recognize at the same level two historic intergovernmental outcomes such as the Rio Declaration and the SDGs with documents that have not been negotiated by member states.

**Comentado [ARG3]:** Security issues are not within the mandate of UNEA

**Comentado [ARG4]:** It is unclear what “integrated” approaches mean. In addition, science-based approaches should be at the basis of all environmental policies informed, as appropriate, by other types of knowledge.

**Comentado [ARG5]:** It is unclear why the adoption of the GBF should be considered historic and not the adoption of the loss and damage fund. This question may be valid for many other sections of this document. It is therefore recommend deleting the adjective “historic”.

6. We also welcome with appreciation other **recent**, important multilateral achievements, including the adoption of the agreement under the UN Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction (BBNJ), the outcomes of [2022 UN Ocean Conference](#) and the 2023 UN Water Conference **and the high-level meeting on the mid-term Review of the Sendai Framework for Disaster Risk Reduction**.
7. We note with great concern the main findings of the Synthesis Report of the Intergovernmental Panel on Climate Change's (IPCC) [Sixth Assessment Report \(AR6\)](#) and recognise that, **to limit global warming to 1.5°C, global greenhouse gas emissions must be rapidly and progressively reduced by 43% by 2030, below 2019 levels and to 60% by 2035 before ultimately reaching net zero by 2050**. By the current trajectory, it is likely that warming will exceed the 1.5°C target during the 21st century, which calls for significant, rapid and sustained emissions reductions in all sectors, especially **those with large share and growth in gross GHG emissions**, while ensuring that the level of support provided to developing countries ~~and vulnerable regions~~ to mitigate and adapt to climate change **is significantly raised to adequate levels**.
8. We are aware that in order to revitalize the multilateral system and inspire decisive and collective action to tackle the ~~three planetary environmental crises~~ of climate change, biodiversity loss, ~~and~~ pollution, ~~land degradation, desertification and drought, among others, as well as other related crises of desertification, land degradation and drought,~~ we urgently need to reinforce global inclusiveness, ~~and~~ solidarity ~~and efforts to eradicate poverty~~ **and to provide new, additional, timely and adequate means of implementation**.
9. We are strongly committed to urgently address the challenges before us through effective, inclusive sustainable ~~and~~ transformative, **intra- and inter-generational** and science- ~~and knowledge~~-based actions together with all relevant actors and partners including civil society, academia ~~and philanthropies~~ Indigenous Peoples and local communities, the private and public sectors, ~~workers and trade unions,~~ as well **women and girls, children and youth and those at risk of being left furthest behind**; and we therefore decide to take the following actions, taking into account the **principle of Common but Differentiated Responsibilities and Respective Capabilities, as well as the special needs and circumstances of vulnerable regions** and the specific challenges faced by developing countries, ~~including Least Developed Countries (LDCs), Landlocked Developing Countries (LLDCs) and Small Island Developing States (SIDS):~~
- Deploy sustained global efforts to address climate change, in line with the goals and **objectives** of the UNFCCC and **the Paris Agreement**, towards achieving net zero greenhouse gas emissions by 2050 and keeping a limit of 1.5°C temperature rise ~~within reach~~, including by addressing the urgent need for scaled up action for mitigation, adaptation and resilience. We will prioritise equity and social justice to achieve more sustainable outcomes and co-benefits and reduce trade-offs while sparing no effort to advance climate resilient ~~and low emissions~~ development and protect our communities against disasters induced or exacerbated by climate change, such as **drought, heavy rains, heatwaves**, famine, and flooding, which undermine the ability of all countries to achieve sustainable development.
  - Halt and reverse biodiversity loss by 2030** in line with the Kunming-Montreal Global Biodiversity Framework ~~to put nature on a path to recovery for the benefit of people and the planet by conserving and sustainably using biodiversity and by ensuring the fair and equitable sharing of benefits from the use of genetic resources, while providing the necessary means of implementation, by urgently reversing ecosystem decline, conserving at least 30% of terrestrial and inland water areas and marine coastal areas and ensuring that at least 30% of the world's degraded ecosystems are under restoration.~~ We will do so by accelerating the implementation of strengthened national biodiversity strategies and action plans and the alignment of national targets with the GBF, ~~whilst driving a transition to nature-positive economies which mainstreams biodiversity in all sectors. We will promote nature-based solutions and ecosystem-based approaches, support the sustainable use of biodiversity while ensuring the fair and equitable sharing of benefits arising out of the utilization of genetic resources, including traditional knowledge,~~
  - Cooperate for a just and sustainable energy transition in all sectors, in particular in the energy sector,** ~~that seeks~~ to achieve an energy- secure future for all, while

**Comentado [ARG6]:** It is recommended to mention here the need to eradicate poverty, given that several MEAs mention this as the main priority of developing countries.

**Comentado [ARG7]:** It is unclear to what knowledge is this sentence referring to.

**Comentado [ARG8]:** It is recommended to use the broad and overarching reference to developing countries.

**Comentado [A9]:** Although Argentina has such a goal, this is not an objective of the UNFCCC or the Paris Agreement. Article 4.1 of the Paris Agreement also mentions "in the second half of this century", not 2050.

**Comentado [A10]:** We suggest mentioning 2 °C besides 1.5 °C, in line with the Paris Agreement's goals (Article 2.1.a).

**Comentado [ARG11]:** It is important to properly reflect what was agreed in the Kunming Montreal GBF and not pick and choosing sections of a very long, complex and interrelated document. Given that it is impossible to summarize all goals and targets in a single paragraph, it is recommended to reflect the mission of the GBF in this paragraph, a statement that is already agreed and it encompasses all the content of the GBF.

respecting **local, national and regional** needs and priorities, and define clear actions to address climate change, maximizing on the social and economic opportunities of climate action and promoting effective dialogue and cooperation among all stakeholders.

- d. Develop an international legally binding instrument ~~on to end~~ plastic pollution, as resolved in UNEA resolution 5/14. We call on all Member States to continue to engage constructively in the ongoing negotiations, ~~with the aim to complete the work with a sense of urgency and seek to reach common ground for a fair, effective and ambitious legally binding outcome of the INC~~ by the end of 2024
- ~~e. [Enhance broader cooperation on air pollution, recognizing that air pollution is the leading environmental risk factor for human health, contributes to negative impacts on ecosystems, does not stop at national borders and can impact regions in different ways and that addressing air pollution results in multiple benefits to the economy, ecosystems, climate and human health.]~~
- e. Deploy greater efforts, including mobilizing and allocating adequate resources, for the sound management of chemicals and waste to reduce negative health and environmental impacts, and the [implementation] [adoption] [progress toward adoption] [other relevant language to be inserted subject to outcome of ICCM5] of [a new chemicals and waste management framework] [name of new framework to be inserted] following the Fifth International Conference on Chemicals Management (ICCM-5) held in September 2023. We also strongly support the process to establish a new Science-Policy Panel to contribute further to the sound management of chemicals and waste and to prevent pollution, **as per UNEA Resolution 5/8**, and we call on Member States to engage constructively in its ongoing negotiations towards completion by the end of 2024 .
- f. Strengthen actions to address substances identified by UNEP Assessment Report on Issues of Concern, by the Global Chemicals Outlook-II and by the Strategic Approach to International Chemicals Management (SAICM) throughout its life cycle, including hazardous chemicals, such as POPs, in articles of high exposure
- f.g. Strive for more effective partnerships, financing, and cooperation at all levels, among the Rio Conventions and other relevant mechanisms and processes, including exploring ways to catalyze more synergies and boost investments and technological and technical support, for the implementation of the Convention to Combat Desertification and the achievement of land degradation neutrality
- g-h. Incorporate climate, biodiversity, ~~and~~ pollution, land neutrality, desertification and drought considerations into disaster risk management policies and actions to mitigate and prevent the adverse impacts of natural and human-made hazards on human health and the environment, strengthen the resilience to global risks **and shocks and promote a sustainable and inclusive recovery to accelerate the achievement of the 2030 Agenda for Sustainable Development...**
- h-i. Promote gender equity and the empowerment of all women and girls, in line with existing international commitments and obligations, to ensure the full, equal, effective and meaningful participation, representation and leadership of women at all levels of environmental decision-making, and promote the collection and use of gender-disaggregated data and statistics across all policies and actions, ~~in our pursuit of inclusive solutions for the three environmental planetary crises to leaving~~ no one behind.
10. We will leverage digital transformations as an enabling tool to support sustainable economies and societies through bridging existing digital divides, improving equal access to environmental information and harnessing emerging technologies for environmental sustainability, while ensuring that digitalization remains inclusive, equitable and sustainable.
11. We commit to continue to advocate for a whole-of-society approach that can effectively empower societies at large, and particularly ~~vulnerable and low-income populations people in vulnerable situations~~, to accelerate research, innovation, ~~and education and behavioural change~~, **facilitate their just transition to sustainable consumption and production, including through circular economy, resource efficiency and other approaches such as sustainable and circular bioeconomy** ~~and move towards the implementation of circular economy models along value chains~~

**Comentado [ARG12]:** A new paragraph on UNCCD is recommended

**Comentado [ARG13]:** It is recommend to use the language use in the Human Rights Council that refers to people in vulnerable situations

**Comentado [ARG14]:** Behavioural change is not within the mandate of UNEA

**Comentado [A15]:** Source: paragraph 6 of the 10 YFP Global Strategy for Sustainable Consumption and Production.

and sustainable lifestyles, in line with the 10 YFP Global Strategy for Sustainable Consumption and Production 2023-2030.

12. We call upon Member States, ~~international financial institutions, international development banks, private foundations and funds and other actors~~ to promote ~~further synergies and complementarities and~~ coherence in financing action to address ~~the three environmental planetary crises of climate change, biodiversity loss and pollution~~ **environmental challenges**, aligning relevant policy and regulatory measures with international goals and targets. We will engage domestic, international, **public** and private sector actors towards a rapid mobilization of accessible means of implementation, in line with the Addis Ababa Action Agenda of the Third International Conference on Financing for Development ~~and the resource mobilization strategies of the respective multilateral environmental agreements~~, while welcoming ongoing efforts to reform the international financial architecture, ~~including reshaping economic governance models and decision-making to better account for the environment in measuring progress beyond GDP.~~
13. ~~We reiterate our recognition of UNEP's role in strengthening the science-policy interface and to undertake strategic foresight and horizon scanning, in collaboration with existing science-policy platforms to improve the capacities of Member States and stakeholders at all levels to prioritize scientific research and stimulate and encourage decision-making and actions that can anticipate trends and risks, and prevent and respond to emerging and future environmental issues.~~
14. We note the **increasing necessity and catalytic** role of UNEP and its Regional Offices in strengthening regional cooperation, including through the Regional Ministerial fora, to tackle context-specific environmental challenges. ~~We also recognize the increasing demand for environmental support at the country level and UNEP's engagement with Resident Coordinators and UN Country Teams to support the environmental dimension of sustainable development in Common Country Analyses and UN Sustainable Development Cooperation Frameworks, and invite the strengthening of UNEP's role within the UN Development System at the regional and country level, with an increase in resources, including from the Regular Budget.~~
15. ~~14.~~ We call on UNEP, as the leading environmental authority within the United Nations, and echoing the UNEP@50 Ministerial Declaration, to intensify its support and assistance to Member States, including at the country level, in the implementation of the Multilateral Environmental Agreements (MEAs), the environmental dimension of the 2030 Agenda and the Sustainable Development Goals as well as the UNEA outcomes.
16. ~~We look forward to the adoption of a Pact for the Future at the Summit of the Future in September 2024, as an opportunity to further advance our collective environmental commitments, urge all Member States as well as relevant NGOs, Major Groups and stakeholders, UNEP, MEAs and other relevant international organisations to advocate for the implementation of the relevant actions set out in this statement during the consultation process, and to ensure an ambitious outcome that will reinvigorate environmental multilateralism, stimulate the implementation of existing commitments, strengthen synergies between the work and implementation of the MEAs and agree on concrete solutions for a better tomorrow with greater effectiveness, inclusiveness and confidence. We therefore request the President of the UN Environment Assembly to transmit this statement as the UN Environment Assembly's contribution to the General Assembly for the Summit of the Future.~~
17. ~~15.~~ We invite the governing bodies of multilateral environmental agreements to work with the United Nations Environment Assembly, as appropriate, to promote effective implementation of the commitments contained in this Declaration.

**Comentado [ARG16]:** This is not seen as a role of UNEP to be endorsed by UNEA

**Comentado [ARG17]:** This is seen as too specific for a UNEA declaration

**Comentado [ARG18]:** The General Assembly has not yet define the way forward regarding the idea of the pact of the future. Any mention of it on this declaration is premature at this stage.
