Ministerial declaration for the sixth session
of the United Nations Environment Assembly

“Effective, inclusive, and sustainable multilateral actions
to tackle climate change, biodiversity loss and pollution”

1. We, the world’s ministers for the environment, have gathered in Nairobi, Kenya, from 26 February to 1 March 2024, together with representatives of international organizations, major groups and other stakeholders at the sixth session of the United Nations Environment Assembly, with the urgent aim of taking effective, inclusive and sustainable multilateral action to tackle the [DEL: three] [ADD: triple] crises [ADD: for our common environment] climate change, biodiversity loss and pollution.

Para 1: Regarding reference to the planetary crises, Canada would prefer drawing language from the UNEA 5 Declaration (para 26), which was multilaterally agreed.

2. We reaffirm all the principles of the Rio Declaration on Environment and Development, the 2030 Agenda for Sustainable Development and the Sustainable Development Goals (SDGs) and we welcome the recommendations of the Secretary General in his report Our Common Agenda and the Stockholm+50 International Meeting.

3. We acknowledge with great urgency the systemic threats posed by the [DEL: three] [ADD: triple] planetary [DEL: environmental] crises of climate change, biodiversity loss and pollution to sustainable development and their impacts on human and environmental health, well-being and security.

Para 3: Regarding reference to the planetary crisis, Canada would prefer drawing language from the UNEA 5 Declaration (para 26), which was multilaterally agreed.

4. We emphasize the importance of integrated, science-based approaches, informed by the latest and best available evidence, as well as the knowledge of Indigenous Peoples and [Add: that of] local communities, to strengthen resilience to present and future emerging challenges, promote global solidarity and advance the realization of the UN General Assembly’s resolution 76/300 on the human right to a clean, healthy, and sustainable environment.

Para 4: Indigenous Peoples and local communities remain distinct in UN text as circumstances around Indigenous Peoples and local communities differ considerably.
5. We welcome the important outcomes of the fifteenth session of the Conference of the Parties to the Convention on Biological Diversity including its adoption of the historic Kunming-Montreal Global Biodiversity Framework to halt and reverse biodiversity loss by 2030; the twenty-seventh session of the conference of the Parties to the United Nations Framework Convention on Climate Change (UNFCCC COP27), including commitments to establish new funding arrangements for assisting developing countries which are particularly vulnerable to the adverse impacts of climate change, including with a focus on addressing Loss and Damage as well as the Sharm el-Sheikh Implementation Plan; the twenty eighth session of the Conference of the Parties to the UNFCCC (COP28) including XXX; [DEL: the fifteenth meeting of the Conference of the Parties to the Convention on Biological Diversity (CBD) and its adoption of the historic Kunming-Montreal Global Biodiversity Framework, to halt and reverse biodiversity loss by 2030] and the fifteenth Conference of the Parties to the United Nations Convention to Combat Desertification (UNCCD), and the Abidjan Call to act on drought, desertification and land degradation; [ADD: the adoption of the agreement under the UN Convention of the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction,] as well as the Fifth International Conference on Chemicals Management (ICCM-5) including the [agreement] on a new [DEL: chemicals and waste management] framework [DEL: beyond 2020] [ADD: for the sound management of chemicals and waste].

Para 5:
1) Canada recommends moving CBD COP15/KMGBF reference up to the start of this list. The achievement of the GBF was a very significant outcome.
2) The adoption of the agreement under the UN Convention of the Law of the Sea as a new Treaty fits better within the context of this paragraph than in the Para 6 which is about meetings.
3) The new name of the chemical and waste framework still needs to be negotiated so we recommend a more generic wording.

6. We also welcome with appreciation other recent, important multilateral achievements, including [DEL: the adoption of the agreement under the UN Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction (BBNJ)], the outcomes of 2022 UN Ocean Conference [ADD, of the 2022 meeting of the Conference of the Parties to the Minamata Convention,] [DEL: and] the 2023 UN Water Conference and [ADD: of the [2023] high-level meeting on the mid-term Review of the Sendai Framework for Disaster Risk Reduction [and of the 2023 meetings of the Conferences of the Parties to the Basel, Rotterdam and Stockholm Conventions].

Para 6: Canada recommends moving the BBNJ treaty to Para 5, as previously mentioned, as well as adding a reference to the 2023 meeting of the BRS Convention which achieved significant outcomes for the fight to address the biodiversity and pollution crises.

7. We note with great concern the main findings of the Synthesis Report of the Intergovernmental Panel on Climate Change’s (IPCC) Sixth Assessment Report (AR6) and recognise that, to limit global warming to 1.5°C, global greenhouse gas emissions must [ADD: peak at the latest before 2025,] and be rapidly and progressively reduced by 43% by 2030, below 2019 levels and to 60% by 2035 before ultimately reaching net zero by 2050. By the current trajectory, it is likely that warming will exceed the 1.5°C target during the 21st century, which calls for significant, rapid and sustained emissions reductions in all sectors, especially those with large share and growth in gross GHG emissions, while ensuring that the level of support provided to developing countries and vulnerable regions to mitigate and adapt to climate change is significantly raised to adequate levels.

Para 7: Canada is recommending the reference to 2025 to reflect the full nature of the findings of the IPCC with regards to 1.5C pathways, alongside the 43% and 60% figures already reflected in the text.
8. We are aware that in order to revitalize the multilateral system and inspire decisive and collective action to tackle the [DEL: three] [ADD: triple] planetary environmental crises of climate change, biodiversity loss and pollution, as well as other related crises of desertification, land degradation and drought, we urgently need to reinforce global inclusiveness and solidarity [ADD: across sectors and jurisdictions so that] [DEL: and to provide new, additional, and] adequate means of implementation [ADD: are available].

Para 8:
1) Regarding reference to the planetary crisis, Canada would prefer drawing language from the UNEA 5 Declaration (para 26), which was multilaterally agreed.

2) Canada recommends highlighting that multisectoral and multijurisdictional approaches are key for ensuring coherence in these efforts.

3) Given that MOI includes both financial and non-financial (e.g. capacity building), Canada suggests a more general language.

9. We are strongly committed to urgently address the challenges before us through effective, inclusive sustainable transformative, intra- and inter-generational and science- and knowledge-based actions together with all relevant actors and partners [ADD: across all relevant sectors] including [ADD: multilateral organizations and fora, civil society, academia and philanthropies [DEL: Indigenous Peoples and local communities], the private and public sectors, [DEL: as well] [ADD: the people and communities at risk of being left furthest behind, including Indigenous Peoples,] [ADD: all] women and girls, children and youth and those at risk of being left furthest behind; and we therefore decide to take the following actions, taking into account [DEL: the principle of Common but Differentiated Responsibilities and Respective Capabilities, as well as] the special needs and circumstances of [ADD: the poorest and most vulnerable] regions and the specific challenges faced by developing countries, including Least Developed Countries (LDCs), Landlocked Developing Countries (LLDCs) and Small Island Developing States (SIDS):

Chapeau of Para 9:
1) Canada deems it important to integrate consideration of multisectoral references as well as references to multilateral given the significant work that occurs in other multilateral fora (e.g. WHO/WHA, FAO and ILO and their Conferences, etc.)

2) The reference to Indigenous Peoples should be alongside that of other groups with specific rights-based considerations (e.g. women’s rights, child rights); we also recommend a reference to the relevant concept of “communities” that are placed at risk or in vulnerable situations.

3) Canada considers the reference to the Rio Declaration Principles included in Paragraph 2 to provide the framing for this Declaration. As such, we would request the deletion of the reference to CBDRRC from the chapeau text of paragraph 9 as it is repetitive. Instead, Canada considers the following reference in 9a) to be sufficient and in the right context: “sustained global efforts to address climate in line with the goals and objectives of the UNFCCC and the Paris Agreement”.

a. Deploy sustained global efforts to address climate change, in line with the goals and objectives of the UNFCCC and the Paris Agreement, towards achieving net zero greenhouse gas emissions by 2050 and keeping a limit of 1.5°C temperature rise within reach, including by addressing the urgent need for scaled up action for mitigation, adaptation and resilience. We will prioritise equity and social justice to achieve more sustainable outcomes and co-benefits and reduce trade-offs while sparing no effort to advance climate resilient development and protect
our communities against disasters induced or exacerbated by climate change, such as drought, heavy rains, heatwaves, famine, and flooding, which undermine the ability of all countries to achieve sustainable development.

b. **Halt and reverse** biodiversity loss by 2030 in line with the Kunming-Montreal Global Biodiversity Framework, [ADD: including through the full, swift and effective implementation of the Framework, and that addresses all five direct drivers of biodiversity loss including land- and sea-use change, overexploitation of species, invasive alien species, pollution, and climate change, and commits the global community to conserving at least 30% of terrestrial and inland water areas and marine coastal areas, and ensuring that at least 30% of the world’s degraded ecosystems are under restoration. We are committed to [DEL:by] urgently reversing ecosystem decline, conserving at least 30% of terrestrial and inland water areas and marine coastal areas and ensuring that at least 30% of the world’s degraded ecosystems are under restoration. We will do so by accelerating the implementation of strengthened national biodiversity strategies and action plans and the alignment of national targets with the GBF, whilst driving a transition to nature-positive economies which mainstreams biodiversity in all sectors. We will promote nature-based solutions and ecosystem-based approaches, support the sustainable use of biodiversity while ensuring the fair and equitable sharing of benefits arising out of the utilization of genetic resources, including traditional knowledge, .

<table>
<thead>
<tr>
<th>Para 9b)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1) Canada advocates for emphasizing the full &amp; swift implementation of the GBF and to reflect the direct drivers of biodiversity loss as identified by the IPBES since acting on those will really have a positive impact.</td>
</tr>
<tr>
<td>2) Canada thanks the Presidency for including new language on accelerating the implementation of strengthened national biodiversity strategies and action plans.</td>
</tr>
</tbody>
</table>

c. **[ADD: Foster] [DEL: Cooperate for a]** just and sustainable energy transition [Add: s] that seeks to achieve an energy-secure [ADD: and low-carbon/net-zero] future for all, while respecting national needs and priorities, and define clear actions to address climate change, maximizing [DEL: on] the social and economic opportunities of climate action and promoting effective dialogue and cooperation among all stakeholders.

| Para 9c) Canada recommends text edit to use of the term ‘foster’ in order to emphasizes domestic action on a just transition. Social dialogue is the term used under the ILO guidelines on just transition. |

d. Develop an international legally binding instrument to end plastic pollution, as resolved in UNEA resolution 5/14. We call on all Member States to continue to engage constructively in the ongoing negotiations with a sense of urgency and seek to reach common ground for a fair, effective and ambitious legally binding outcome of the INC by the end of 2024.

e. **[Enhance broader cooperation on air pollution, recognizing that air pollution is the leading environmental risk factor for human health, contributes to negative impacts on ecosystems, does not stop at national borders and can impact regions in different ways and that addressing air pollution results in multiple benefits to the economy, ecosystems, climate and human health.]**

| Para 9e) Canada appreciates the inclusion of this paragraph on air pollution. |
f. Deploy greater efforts, including mobilizing and allocating adequate resources, for the sound management of chemicals and waste to reduce negative health and environmental impacts, [ADD: advance the implementation of relevant Multilateral Environmental Agreements] and [ADD: support] the [implementation] [adoption] [progress toward adoption] [other relevant language to be inserted subject to outcome of ICCM5] of [a new chemicals and waste management framework] [name of new framework to be inserted] following the Fifth International Conference on Chemicals Management (ICCM-5) held in September 2023. We also strongly support the process to establish a new Science-Policy Panel to contribute further to the sound management of chemicals and waste and to prevent pollution, as per UNEA Resolution 5/8, and we call on Member States to engage constructively in its ongoing negotiations towards completion by the end of 2024.

Para 9f) Canada appreciates the inclusion of the reference to the SPP as we suggested last time. While we would like to see a reference to the outcomes of the meetings of the BRS Convention, we recommend a short reference to the importance of the MEAs relevant to the sound management of chemicals and waste, changing the existing text as little as possible. Note that we may provide additional input pending the outcome of the final negotiations at ICCM5.

g. Incorporate climate, biodiversity and pollution considerations into disaster risk management policies and actions to mitigate and prevent the adverse impacts of natural and human-made hazards on human health and the environment, strengthen the resilience to global risks and shocks and promote a sustainable and inclusive recovery to accelerate the achievement of the 2030 Agenda for Sustainable Development.

h. Promote gender [DEL: equity] [ADD: equality] and the empowerment of all women and girls, in line with existing international commitments and obligations, to ensure the full, equal, effective and meaningful participation, representation and leadership of women at all levels of environmental decision-making, and promote the collection and use of gender-disaggregated data and statistics across all policies and actions, in our pursuit of inclusive solutions for the three environmental planetary crises to leave no one behind.

Para 9h) Canada prefers the term “equality” as it aligns with SDG5 on the promotion of gender.

10. We will leverage digital transformations as an enabling tool to support sustainable economies and societies through bridging existing digital divides, improving equal access to environmental information and harnessing emerging technologies for environmental sustainability, while ensuring that digitalization remains inclusive, equitable and sustainable.

11. We commit to continue to advocate for a whole-of-society approach that can effectively empower societies at large, and particularly vulnerable and low-income populations, to accelerate research, innovation, education and behavioural change, facilitate their just transition to sustainable consumption and production [ADD: and sustainable lifestyles] and move towards the implementation of circular economy models along value chains [DEL: and sustainable lifestyles], in line with the 10 YFP Global Strategy for Sustainable Consumption and Production 2023-2030.

Para 11: editorial change for word flow.
12. We call upon Member States, **international financial institutions**, **international development banks**, **private foundations and funds** and other actors to promote further synergies and coherence in financing action to address the three environmental planetary crises of climate change, biodiversity loss and pollution, aligning relevant policy and regulatory measures with international goals and targets. We will engage domestic, international, and private sector actors towards a rapid mobilization of accessible means of implementation, in line with the Addis Ababa Action Agenda of the Third International Conference on Financing for Development, while welcoming ongoing efforts to reform the international financial architecture, **including reshaping economic governance models and decision-making to better account for the environment in measuring progress beyond GDP**.

13. We reiterate our recognition of UNEP’s role in strengthening the science-policy interface [ADD: in collaboration with partners and stakeholders across all relevant sectors including health, labour, food and agriculture, industry and others,] and to undertake strategic foresight and horizon scanning, in collaboration with existing science-policy platforms to improve the capacities of Member States and stakeholders at all levels to prioritize scientific research and stimulate and encourage decision making and actions that can anticipate trends and risks, and prevent and respond to emerging and future environmental issues.

Para 13: Canada recommends adding some clarification. UNEP can not be alone in undertaking efforts to strengthen science-policy related work on climate change, biodiversity loss and pollution given the complexity of the drivers, interactions and effects of the triple planetary crisis.

14. We note the increasing necessity and catalytic role of UNEP and its Regional Offices in strengthening regional cooperation, including through the Regional Ministerial fora, to tackle context-specific environmental challenges. We also recognize the increasing demand for environmental support at the country level and UNEP’s engagement with Resident Coordinators and UN Country Teams to support the environmental dimension of sustainable development in Common Country Analyses and UN Sustainable Development Cooperation Frameworks, and invite the strengthening of UNEP’s role within the UN Development System at the regional and country level, with an increase in resources, including from the Regular Budget.

15. We call on UNEP, as the leading environmental authority within the United Nations, and echoing the UNEP@50 Ministerial Declaration, to intensify its support and assistance to Member States, including at the country level, in the implementation of the Multilateral Environmental Agreements (MEAs), the environmental dimension of the 2030 Agenda and the Sustainable Development Goals as well as the UNEA outcomes.

16. We look forward to the [DEL: adoption of a Pact for the Future at the] Summit of the Future in September 2024, as an opportunity to further advance our collective environmental commitments, urge all Member States as well as relevant NGOs, Major Groups and stakeholders, UNEP, MEAs and other relevant international organisations to advocate [DEL: for the implementation of the relevant actions set out in this statement during the consultation process, and to ensure] an ambitious outcome that will reinvigorate environmental multilateralism, stimulate the implementation of existing commitments, strengthen synergies between the work and implementation of the MEAs and agree on concrete solutions for a better tomorrow with greater effectiveness, inclusiveness and confidence. **We therefore request the President of the UN Environment Assembly to transmit this statement as the UN Environment Assembly’s contribution to the General Assembly for the Summit of the Future.**

Para 16) Delete references to Pact for the Future and its implementation: it is premature to look forward to the adoption of an undefined outcome of the Summit at this stage and the scope of the Summit is much broader than the environmental sphere. Regarding the 2nd proposed deletion: it is unclear what ‘this statement’ refers to.
17. We invite the governing bodies of multilateral environmental agreements to work with the United Nations Environment Assembly, as appropriate, to promote effective implementation of the commitments contained in this Declaration.
