

Side event 4 at INC-3

Monitoring the situation and monitoring progress of the future instrument: objectives/targets and their associated baselines, indicators and timelines

Venue: UNON HQ, United Nations Avenue, Gigiri

15 November 2023 : Time: 13:30 - 14:45 EAT Room CR 9

Background

This session will explore the how measurement and monitoring of progress of a future treaty could be addressed from the perspectives of Government, Multilateral Environmental Conventions and Business. The session will explore the issue from three perspectives: Who should be involved in measurement and monitoring; What should be measured and monitored and thirdly how should it be done.

The session will build on the experience from action being taken by Governments and Business and also highlight the links to other Multilateral Environmental Agreements. The format of the session will be short interventions highlighting the key points by the panel followed by a facilitated discussion and an opportunity for participants questions to be answered.
