

**U.S. Intervention Regarding Agenda item 5b presented at the 11th Annual Subcommittee of the Committee of Permanent Representatives to the UN Environment Programme (UNEP) in Nairobi, Kenya
July 11, 2024**

- We are continuing to assess the proposed themes in the Secretariat's note provided, and we welcome feedback other member states might have.
- We recognize how these themes were informed by the robust UN schedule this year, and emphasize the importance of considering how the environmental dimensions of the outcomes of the HLPF and, especially, Summit of the Future might be incorporated into a theme for UNEA-7. UNEA provided inputs into both of these processes, and we expect this could be reflected in specific recommendations for UNEA and UNEP. This will be critically important to ensure a consistent, coherent approach to addressing shared environmental challenges across the UN.
- Thank you.
