The Environment Fund provides for the science work on the state of global environment, including through publications like, UN-REDD’s, Raising Ambition, Accelerating Action: Towards Enhanced NDCs for Forests. It highlights a significant gap in forest protection within current Nationally Determined Contributions (NDCs), which outline plans to mitigate and adapt to climate change. This report reveals that NDC pledges from 2017-2023 fall short of the global goal to halt and reverse deforestation by 2030.

* Amounts based on pledges, to be confirmed at the time of payment including possible effect of exchange rate fluctuation
** Based on percentage increase from previous year’s contribution
*** full share as per the Environment Fund Voluntary Indicative Scale of Contributions (VISC)

USA does not participate in VISC and is not a member of any regional group. However, since USA attends Western Europe & Other Group meetings as an observer, their contributions are reported as part of the WEOG summary.
