As climate impacts intensify and hit the world's poorest, the **Adaptation Gap Report 2024: Come hell and high water** calls for urgent action to boost climate adaptation, with a focus on increased financial commitments, stronger adaptation components in climate pledges, and innovative financing. The report financed by the Environment Fund, emphasizes the need for more strategic, anticipatory investments and highlights the importance of capacity building and technology transfer to improve adaptation effectiveness.

* Amounts based on pledges, to be confirmed at the time of payment including possible effect of exchange rate fluctuation
 ** Based on percentage increase from previous year's contribution
 *** full share as per the Environment Fund Voluntary Indicative Scale of Contributions (VISC)
 USA does not participate in VISC and is not a member of any regional group. However, since USA attends Western Europe & Other Group meetings as an observer, their contributions are reported as part of the WEOG summary.
