**Second meeting of the Bureau of the
Global Framework on Chemicals –
For a Planet Free of Harm from Chemicals and Waste**
Tuesday, 5 December 2023, from 12:00 – 13:30 (CET)

**Item 4 (d) of the provisional agenda¹
Implementation of the Framework and ICCM5 Resolutions. Next steps**

Measurability structure

Note by the secretariat

1. The International Conference on Chemicals Management at its fifth session (ICCM5) decided, in its resolution on the measurability structure, to establish an open-ended ad hoc group on measurability and indicators.
2. The open-ended ad hoc group is expected to work by electronic means with the aim of preparing recommendations for the finalizing of the measurability structure and a proposal for a set of indicators for annex to the Global Framework on Chemicals – For a Planet Free of Harm from Chemicals and Waste, to be considered at the first session of the Conference in 2026.
3. The Secretariat was requested to support the work of this open-ended ad hoc group.
4. The following way forward is proposed for the consideration of the Bureau and agreement to support the operationalization of the work of the open-ended ad hoc group.

Next steps

5. It is therefore proposed that:
 - a. Noting the expression of interest to lead the work on the measurability structure during ICCM5, the Bureau welcomes those interested stakeholders to consider to co-chair the work of the open-ended ad hoc group on measurability and indicators;
 - b. The secretariat work with the co-chairs to prepare a timeframe and expected outputs of the group, as well as initial arrangements for the meetings of the open-ended ad hoc group.
