## **Foreword**

These editions of the *Checklist of CITES species* and of the *Annotated CITES Appendices and reservations* (the latter in the accompanying CD-ROM only) take into account the amendments to the CITES Appendices and the changes in nomenclature adopted at the 13th meeting of the Conference of the Parties to CITES (Bangkok, 2004).

At that meeting, the Conference of the Parties recognized the Checklist and its updates as an official digest of the scientific names of species listed in the CITES Appendices reflecting the names contained in the official standard references. We are most grateful to the UNEP World Conservation Monitoring Centre (UNEP-WCMC) for undertaking the production of this Checklist once again, and particularly to the staff responsible for the meticulous work involved.

The costs of preparation and production of this Checklist have been borne by the European Commission, the Joint Nature Conservation Committee (United Kingdom) and UNEP-WCMC, as well as by the CITES Secretariat, and we wish to thank our partners very much for their important contributions.

We know that this Checklist is widely used and appreciated by Management Authorities, Scientific Authorities, Customs officers and other people involved in the implementation of CITES, as well as by non-governmental organizations, academics, the press and others. We are conscious, however, that we must continue to try to meet the changing needs of the users of this guide. For this reason in particular, we welcome the comments and suggestions of all users on ways to improve it in the future.

CITES Secretariat  
Geneva  
2005

## Acknowledgements

The *Checklist of CITES Species* was prepared on behalf of the CITES Secretariat by the UNEP World Conservation Monitoring Centre (UNEP-WCMC).

UNEP-WCMC is the biodiversity assessment and policy implementation arm of the United Nations Environment Programme, the world's foremost intergovernmental environmental organization. UNEP-WCMC aims to help decision-makers recognize the value of biodiversity to people everywhere, and to apply this knowledge in all that they do. The Centre's challenge is to transform complex data into policy-relevant information, to build tools and systems for analysis and integration of these data, and to support the needs of nations and the international community as they engage in joint programmes of action.

This publication was edited by Tim Inskipp and Harriet Gillett, supported by Joan Field and Sarah Ferriss. Technical support was provided by James O'Carroll. The project was supervised by Gerardo Fragoso. The production team are most grateful to the staff of the CITES Secretariat and to the CITES Nomenclature Committee for their advice and assistance.

UNEP-WCMC also wishes to acknowledge the financial support of the European Commission and of the Joint Nature Conservation Committee of the United Kingdom, which has made possible the production of this book and CD-ROM.

## Illustration credits

The CITES Secretariat is very grateful to the photographers and institutions that have donated their plates and photographs for this publication.

# **Introduction**

## **CITES-listed fauna and flora**

This book and CD-ROM provide a Checklist of the fauna and the flora listed in Appendices I, II and III of CITES as adopted by the Conference of the Parties, valid from 17 February 2005. The CD-ROM also includes the *Annotated CITES Appendices and reservations*, which have an index to family names and common names. It is hoped that these lists will act as an aid to Management and Scientific Authorities, Customs officials, and all others involved in implementing and enforcing the Convention.

### **General note**

The names used in the CITES Appendices are the scientific names approved by the CITES Nomenclature Committee and adopted by the Conference of the Parties to CITES. Common names in the Checklist and Annotated Appendices are included only for reference. If the common name of an animal or plant included in the CITES Appendices is not included, it should be looked for under its scientific name or under another common name.

Species included in the Checklist and Annotated Appendices are referred to:

- a) by the name of the species; or
- b) as being all of the species included in a higher taxon or designated part thereof.

Other references to taxa above the specific level are for the purposes of information or classification only.

Further details relating to each taxon, including distribution and author names, are included in the CITES-species database available on the CITES website ([www.cites.org](http://www.cites.org)).

## **Nomenclature and taxonomy**

The nomenclature and taxonomy followed in this publication are the same as for the CITES Appendices. In most cases where the Appendices list only the name of an order, family or genus, the names of the individual species in that higher taxon have been included in this Checklist. Where a standard reference has been adopted by the Conference of the Parties, the names of the species follow the relevant publications indicated in the *References* section at the end of this publication. These adopted names are in bold in the Checklist. Where no standard reference has been adopted (as noted in the *References*) the names of species in higher taxa are those currently used in the UNEP-WCMC database and have been extracted from a number of publications.

## Checklist

The Checklist of CITES-listed species comprises an alphabetical list of fauna followed by flora. There are three types of entry: scientific name, common name and scientific synonym. The common name and synonym entries serve as indexes to the adopted scientific name entries, where CITES-related information is provided.

### Scientific name

The Checklist contains the scientific names, in alphabetical order, of all animal and plant taxa listed in the CITES Appendices, with the exception of the genera of Appendix-II listed orchids not covered by the three published volumes of the *CITES Orchid Checklist*, for which only the name of the genus is included, e.g. *Aa* spp.

- Format
- 1) The scientific name (in bold for those adopted by the Conference of the Parties);
  - 2) Optional – English (E), French (F) and Spanish (S) common names;
  - 3) Optional – the symbols #1- #10 and superscript numbers (e.g.<sup>1</sup>) (see *Interpretation* below);
  - 4) The Appendix or Appendices in which the species is listed (I, II or III), or 'NC' for taxa that are not, or only partly, covered by CITES listings<sup>1</sup>. Some taxa may be split-listed, that is they may be included partly in one Appendix and partly in another. For a taxon listed in both Appendix I and II, for instance, this would be indicated by 'I/II'. In other cases only certain populations are listed whilst others are not covered by the provisions of the Convention. For a taxon partly listed in Appendix I and partly not listed, for instance, this would be indicated by 'I/NC';
  - 5) For fauna, the family in capital letters and a two-letter code for the class in which the species is included. The following codes are used:

Ac	=	Actinopterygii
Am	=	Amphibia
An	=	Anthozoa
Ar	=	Arachnida
Av	=	Aves
Bi	=	Bivalvia
El	=	Elasmobranchii
Ga	=	Gastropoda
Hi	=	Hirudinoidea
Hy	=	Hydrozoa
In	=	Insecta
Ma	=	Mammalia
Re	=	Reptilia
Sa	=	Sarcopterygii

Examples

- *Abeillia abeillei*: (E) Emerald-chinned Hummingbird, (S) Colibrí barbierosmeralda, (F) Colibri d'Abeillé **II** TROCHILIDAE Av
- *Aa* spp. #8 **II** ORCHIDACEAE

<sup>1</sup> A few species not listed in the CITES Appendices are included for information, namely three species of Psittaciformes: *Agapornis roseicollis*, *Melopsittacus undulatus* and *Nymphicus hollandicus*, and four species of Falconiformes: *Cathartes aura*, *Cathartes burrovianus*, *Cathartes melambrotus* and *Coragyps atratus* – these are the only species in these large orders not covered by CITES provisions. Similarly, *Aloe vera* is the only species of *Aloe* not listed in the Appendices.

## Common name

Where available, English, Spanish and French common names are provided.

Format The common name, either English (E), Spanish (S) or French (F), is followed by the corresponding scientific name. There is only one entry for each common name, e.g. there is an entry for ‘Eagle, Golden’ but not for ‘Golden Eagle’.

### Examples

- Parrots (E): PSITTACIFORMES spp.
- Orchids, slipper (E): *Paphiopedilum* spp. / *Phragmipedium* spp.
- Hummingbird, Emerald-chinned (E): *Abeillia abeillei*

## Scientific synonym

Some synonyms of scientific names are listed, but these are not comprehensive.

Format A scientific synonym is followed by ‘=’ and then the adopted scientific name. The latter name should be looked up alphabetically to find the other relevant information about the species.

Example *Tirucallia goetzei* = *Euphorbia goetzei*

## Annotated Appendices and reservations (CD-ROM only)

Information is provided on all taxa currently or previously included in the CITES Appendices. The original listing date is given for all taxa (orders, families, genera, species, subspecies) and populations specifically named in the current Appendices, or in earlier versions of the Appendices. All reservations made by Parties are listed, with the dates on which they entered into force and, in the case of past reservations, the dates on which they were withdrawn.

The information is arranged in taxonomic order, with common names provided for higher taxa, e.g. URSIDAE (bears). However the common name of species is only included in this section in cases where only one or a few species are listed in a family, e.g. ESCHRICHTIIDAE (Grey Whale). This means that in most cases species names are only provided in Latin. If users cannot find a species under its common name in the *Annotated Appendices and reservations*, they should therefore first find its scientific equivalent in the *Checklist of CITES species*, and then look up that scientific name in the *Annotated Appendices and reservations*. As an example, to locate the Big-headed Sideneck, first use the Checklist, where the name will be found linked to *Peltocephalus dumeriliana*, then search for *Peltocephalus dumeriliana* in the Annotated Appendices.

Five columns provide information on: Scientific name, CITES Appendix, ISO codes, Dates and Notes, as follows:

## Scientific name

This column contains the scientific names of the taxa that are, or have been, listed in the Appendices. These names may be at various taxonomic levels: order, family, genus, species, subspecies or variety. Orders and families are given in the same taxonomic sequence as that used in the CITES Appendices. Species (and subspecies) are listed in alphabetical sequence within each family. Higher taxon names given in bold are provided for information only.

## CITES Appendix

The next three columns list the Appendix or Appendices in which the taxa are or were listed. Reservations made by Parties are indicated by adding ‘r’ to the Appendix number, to signify the entry into force, and ‘w’ to signify the withdrawal of the reservation. If both Appendix I and Appendix II are applicable to a particular taxon on one date, Appendix I appears first in the list. ‘Del’ in one of the three columns, instead of an Appendix number, indicates that the taxon was deleted from that Appendix on the given date.

## ISO codes

This column provides the ISO code of every Party or territory mentioned in relation to inclusions in Appendix III, to reservations and to species that are split-listed or only partially listed.

## Dates

This column contains the dates when changes to the Appendices in relation to the species concerned came into effect. The dates are listed chronologically (as day/month/year, e.g. 01/07/75 = 1 July 1975), with the earliest date first. The subsequent listing history of the taxon or population can be determined by examining the following lines. Where populations of a taxon are split between Appendix I and Appendix II, both Appendices are indicated against every date when a change has taken place, with notes indicating the status of all populations in each Appendix.

## Notes

The final column contains any extra information. This may relate to the changes and the situation after each change has taken place. Where separate populations are involved the history is provided in a cumulative manner, so that any changes to the listings between the various Appendices can be tracked by reading the lines that refer to each change. References to populations are indicated by the use of

two-letter ISO country or territory codes (see above). Other notes provide further information about the listed taxa, e.g. scientific synonyms. The term 'Included with...' indicates that the taxon concerned was originally listed separately but has subsequently been subsumed in a higher taxon. The term 'Listed under...' indicates that the taxon or population concerned was originally part of a higher taxon listing but has subsequently been treated separately, either through a transfer to another Appendix or a reservation.

As an example, if one looks at the listing history of the population of Malawi of *Crocodylus niloticus*, one will see that the first entry for this species shows that the species (i.e. all populations) was listed in Appendix I on 1 July 1975. Below this are a number of entries referring to transfer of various populations between Appendix I and Appendix II. One of these indicates that the population of Malawi (MW) was transferred to Appendix II on 1 August 1985. A further entry shows that on 18 January 1990 an Appendix-II ranching programme for this species came into effect, and the final entry summarizes the current situation for the species, confirming that the ranned population of Malawi is still in Appendix II.

### Key to annotations

I	=	listed on Appendix I	spp.	=	all species of a higher taxon
II	=	listed on Appendix II	ssp.	=	subspecies
III	=	listed on Appendix III	syn.	=	synonym
Del	=	deleted from Appendices	var.	=	variety
f.	=	forma	w	=	reservation withdrawn by the named Party

popn(s)	=	population(s)	1 to 20	=	superscript numbers refer to <i>Interpretation</i> (see below)
r	=	reservation entered by the named Party			

## Interpretation

In accordance with Article I, paragraph (b), sub-paragraph (iii), of the Convention, the symbol (#) followed by a number placed against the name of a species or higher taxon included in Appendix II or III designates parts or derivatives which are specified in relation thereto for the purposes of the Convention as follows:

- #1 Designates all parts and derivatives, except:
  - a) seeds, spores and pollen (including pollinia);
  - b) seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and
  - c) cut flowers of artificially propagated plants.
- #2 Designates all parts and derivatives, except:
  - a) seeds and pollen;
  - b) seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers;
  - c) cut flowers of artificially propagated plants; and
  - d) chemical derivatives and finished pharmaceutical products.
- #3 Designates whole and sliced roots and parts of roots, excluding manufactured parts or derivatives such as powders, pills, extracts, tonics, teas and confectionery.
- #4 Designates all parts and derivatives, except:
  - a) seeds, except those from Mexican cacti originating in Mexico, and pollen;
  - b) seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers;
  - c) cut flowers of artificially propagated plants;
  - d) fruits and parts and derivatives thereof of naturalized or artificially propagated plants; and
  - e) separate stem joints (pads) and parts and derivatives thereof of naturalized or artificially propagated plants of the genus *Opuntia* subgenus *Opuntia*.
- #5 Designates logs, sawn wood and veneer sheets.
- #6 Designates logs, sawn wood, veneer sheets and plywood.
- #7 Designates logs, wood-chips and unprocessed broken material.
- #8 Designates all parts and derivatives, except:
  - a) seeds and pollen (including pollinia);
  - b) seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers;
  - c) cut flowers of artificially propagated plants; and
  - d) fruits and parts and derivatives thereof of artificially propagated plants of the genus *Vanilla*.
- #9 Designates all parts and derivatives except those bearing the label 'Produced from *Hoodia* spp. material obtained through controlled harvesting and production in collaboration with the CITES Management Authorities of Botswana/Namibia/South Africa under agreement no. BW/NA/ZA xxxxxx'.
- #10 Designates all parts and derivatives, except:
  - a) seeds and pollen; and
  - b) finished pharmaceutical products.

## **Additional notes**

The Conference of the Parties has added conditions to the inclusion of some taxa in the Appendices. These conditions are indicated in a footnote on the relevant page wherever possible or only as endnotes when their length did not allow for such presentation. The notes are all reproduced below.

### **Fauna**

<sup>1</sup> *Acinonyx jubatus* Annual export quotas for live specimens and hunting trophies are granted as follows: Botswana: 5; Namibia: 150; Zimbabwe: 50. The trade in such specimens is subject to the provisions of Article III of the Convention.

<sup>2</sup> *Ceratotherium simum simum* For the exclusive purpose of allowing international trade in live animals to appropriate and acceptable destinations and hunting trophies. All other specimens shall be deemed to be specimens of species included in Appendix I and the trade in them shall be regulated accordingly.

<sup>3</sup> *Cetacea* spp. A zero annual export quota has been established for live specimens from the Black Sea population of *Tursiops truncatus* removed from the wild and traded for primarily commercial purposes.

<sup>4</sup> *Chaetophractus nationi* A zero annual export quota has been established. All specimens shall be deemed to be specimens of species included in Appendix I and the trade in them shall be regulated accordingly.

<sup>5</sup> *Crocodylus niloticus* Except the populations of Botswana, Ethiopia, Kenya, Madagascar, Malawi, Mozambique, Namibia, South Africa, Uganda, the United Republic of Tanzania (subject to an annual export quota of no more than 1,600 wild specimens including hunting trophies, in addition to ranned specimens), Zambia and Zimbabwe, which are included in Appendix II.

<sup>6</sup> *Felidae* spp. Specimens of the domesticated form are not subject to the provisions of the Convention.

<sup>7</sup> *Geochelone sulcata* A zero annual export quota has been established for *Geochelone sulcata* for specimens removed from the wild and traded for primarily commercial purposes.

<sup>8</sup> *Helioporidae* spp., *Milleporidae* spp., *Scleractinia* spp. *Stylerasteridae* spp. *Tubiporidae* spp. Fossils are not subject to the provisions of the Convention.

### **<sup>9</sup> *Loxodonta africana***

#### **Populations of Botswana, Namibia and South Africa (listed in Appendix II):**

For the exclusive purpose of allowing:

- 1) trade in hunting trophies for non-commercial purposes;
- 2) trade in live animals for *in situ* conservation programmes;
- 3) trade in hides;
- 4) trade in leather goods: for non-commercial purposes for Botswana; for commercial or non-commercial purposes for Namibia and South Africa;
- 5) trade in hair for commercial or non-commercial purposes for Namibia;
- 6) trade in individually marked and certified ekipas incorporated in finished jewellery for non-commercial purposes for Namibia; and
- 7) trade in registered raw ivory (for Botswana and Namibia, whole tusks and pieces; for South Africa, whole tusks and cut pieces of ivory that are both 20 cm or more in length and 1 kg or more in weight) subject to the following:
  - i) only registered government-owned stocks, originating in the State (excluding seized ivory and ivory of unknown origin) and, in the case of South Africa, only ivory originating from the Kruger National Park);
  - ii) only to trading partners that have been verified by the Secretariat, in consultation with the Standing Committee, to have sufficient national legislation and domestic trade controls to ensure that the imported ivory will not be re-exported and will be managed in accordance with all requirements of Resolution Conf. 10.10 (Rev. CoP12) concerning domestic manufacturing and trade;

- iii) not before the Secretariat has verified the prospective importing countries, and the MIKE programme has reported to the Secretariat on the baseline information (e.g. elephant population numbers, incidence of illegal killing);
- iv) a maximum of 20,000 kg (Botswana), 10,000 kg (Namibia) and 30,000 kg (South Africa) of ivory may be traded, and despatched in a single shipment under strict supervision of the Secretariat;
- v) the proceeds of the trade are used exclusively for elephant conservation and community conservation and development programmes within or adjacent to the elephant range; and
- vi) only after the Standing Committee has agreed that the above conditions have been met.

On a proposal from the Secretariat, the Standing Committee can decide to cause this trade to cease partially or completely in the event of non-compliance by exporting or importing countries, or in the case of proven detrimental impacts of the trade on other elephant populations.

All other specimens shall be deemed to be specimens of species included in Appendix I and the trade in them shall be regulated accordingly.

**Population of Zimbabwe (listed in Appendix II):**

For the exclusive purpose of allowing:

- 1) export of hunting trophies for non-commercial purposes;
- 2) export of live animals to appropriate and acceptable destinations;
- 3) export of hides; and
- 4) export of leather goods and ivory carvings for non-commercial purposes.

All other specimens shall be deemed to be specimens of species included in Appendix I and the trade in them shall be regulated accordingly. To ensure that where a) destinations for live animals are to be appropriate and acceptable and/or b) the purpose of the import is to be non-commercial, export permits and re-export certificates may be issued only after the issuing Management Authority has received, from the Management Authority of the State of import, a certification to the effect that: in case a), in analogy to Article III, paragraph 3 (b) of the Convention, the holding facility has been reviewed by the competent Scientific Authority, and the proposed recipient has been found to be suitably equipped to house and care for the animals; and/or in case b), in analogy to Article III, paragraph 3 (c), the Management Authority is satisfied that the specimens will not be used for primarily commercial purposes.

<sup>10</sup> *Manis spp.* A zero annual export quota has been established for *Manis crassicaudata*, *M. javanica* and *M. pentadactyla* for specimens removed from the wild and traded for primarily commercial purposes.

<sup>11</sup> *Melanosuchus niger* Subject to a zero annual export quota until an annual export quota has been approved by the CITES Secretariat and IUCN/SSC Crocodile Specialist Group.

**<sup>12</sup> *Vicugna vicugna***

**Population of Argentina (listed in Appendix II):** For the exclusive purpose of allowing international trade in wool sheared from live vicuñas, in cloth, and in derived manufactured products and other handicraft artefacts. The reverse side of the cloth must bear the logotype adopted by the range States of the species, which are signatories to the *Convenio para la Conservación y Manejo de la Vicuña*, and the selvages the words 'VICUÑA-ARGENTINA'. Other products must bear a label including the logotype and the designation 'VICUÑA-ARGENTINA-ARTESANÍA'. All other specimens shall be deemed to be specimens of species included in Appendix I and the trade in them shall be regulated accordingly.

**Population of Bolivia (listed in Appendix II):** For the exclusive purpose of allowing international trade in: a) wool and products derived therefrom sheared from live animals of the populations of the Conservation Units of Mauri-Desaguadero, Ulla Ulla and Lípez-Chichas; and b) products made from wool sheared from live animals of the rest of the population of Bolivia. The reverse side of the cloth must bear the logotype adopted by the range States of the species, which are signatories to the *Convenio para la Conservación y Manejo de la Vicuña*, and the selvages the words 'VICUÑA-BOLIVIA'. Other products must bear a label including the logotype and the designation 'VICUÑA-BOLIVIA-ARTESANÍA'. All other specimens shall be deemed to be specimens of species included in Appendix I and the trade in them shall be regulated accordingly.

**Population of Chile (listed in Appendix II):** For the exclusive purpose of allowing international trade in wool sheared from live vicuñas, and in cloth and items made thereof, including luxury handicrafts and knitted articles. The reverse side of the cloth must bear the logotype adopted by the range States of the species, which are signatories to the *Convenio para la Conservación y Manejo de la Vicuña*, and the selvages the words 'VICUÑA-CHILE'. Other products must bear a label including the logotype and the designation 'VICUÑA-CHILE-ARTESANÍA'. All other specimens shall be deemed to be specimens of species included in Appendix I and the trade in them shall be regulated accordingly.

**Population of Peru (listed in Appendix II):** For the exclusive purpose of allowing international trade in wool sheared from live vicuñas and in the stock extant at the time of the ninth meeting of the Conference of the Parties (November 1994) of 3249 kg of wool, and in cloth and items made thereof, including luxury handicrafts and knitted articles. The reverse side of the cloth must bear the logotype adopted by the range States of the species, which are signatories to the *Convenio para la Conservación y Manejo de la Vicuña*, and the selvages the words 'VICUÑA-PERÚ'. Other products must bear a label including the logotype and the designation 'VICUÑA-PERÚ-ARTESANÍA'. All other specimens shall be deemed to be specimens of species included in Appendix I and the trade in them shall be regulated accordingly.

## Flora

<sup>13</sup> *Cactaceae* spp. Artificially propagated specimens of the following hybrids and/or cultivars are not subject to the provisions of the Convention: *Hatiora* x *graeseri*; *Schlumbergera* x *buckleyi*; *S. russelliana* x *S. truncata*; *S. orssichiana* x *S. truncata*; *S. opuntioides* x *S. truncata*; *S. truncata* (cultivars); *Cactaceae* spp. colour mutants lacking chlorophyll, grafted on the following grafting stocks: *Harrisia* 'Jusbertii'/*Hylocereus trigonus* or *H. undatus*; *Opuntia microdasys* (cultivars).

<sup>14</sup> *Cyclamen* spp. Artificially propagated specimens of cultivars of *Cyclamen persicum* are not subject to the provisions of the Convention. However, the exemption does not apply to such specimens traded as dormant tubers.

<sup>15</sup> *Orchidaceae* spp. Artificially propagated specimens of hybrids of *Cymbidium*, *Dendrobium*, *Phalaenopsis* and *Vanda* are not subject to the provisions of the Convention when:

- 1) the specimens are traded in shipments consisting of individual containers (i.e. cartons, boxes or crates) each containing 20 or more plants of the same hybrid;
- 2) the plants within each container can be readily recognized as artificially propagated specimens by exhibiting a high degree of uniformity and healthiness; and
- 3) the shipments are accompanied by documentation, such as an invoice, which clearly states the number of plants of each hybrid.

Artificially propagated specimens of the following hybrids:

- *Cymbidium*: Interspecific hybrids within the genus and intergeneric hybrids;
- *Dendrobium*: Interspecific hybrids within the genus known in horticulture as "nobile-types" and "phalaenopsis-types";
- *Phalaenopsis*: Interspecific hybrids within the genus and intergeneric hybrids;
- *Vanda*: Interspecific hybrids within the genus and intergeneric hybrids

are not subject to the provisions of the Convention when:

- 1) they are traded in flowering state, i.e. with at least one open flower per specimen, with reflexed petals;
- 2) they are professionally processed for commercial retail sale, e.g. labelled with printed labels and packaged with printed packages;
- 3) they can be readily recognized as artificially propagated specimens by exhibiting a high degree of cleanliness, undamaged inflorescences, intact root systems and a general absence of damage or injury that could be attributable to plants originating in the wild;
- 4) the plants do not exhibit characteristics of wild origin, such as damage by insects or other animals, fungi or algae adhering to leaves, or mechanical damage to inflorescences, roots, leaves or other parts resulting from collection; and
- 5) the labels or packages indicate the trade name of the specimen, the country of artificial propagation or, in the case of international trade during the production process, the country where the specimen was labelled and packaged; and the labels or packages show a photograph of the flower, or demonstrate by other means the appropriate use of labels and packages in an easily verifiable way.

Plants not clearly qualifying for the exemption must be accompanied by appropriate CITES documents.

<sup>16</sup> *Dicksonia* spp. Only the population of the Americas.

<sup>17</sup> *Euphorbia* spp. Artificially propagated specimens of cultivars of *Euphorbia trigona*, artificially propagated specimens of crested, fan-shaped or colour mutants of *Euphorbia lactea*, when grafted on artificially propagated root stock of *Euphorbia neriifolia*, and artificially propagated specimens of cultivars of *Euphorbia* 'Milii' when they are traded in shipments of 100 or more plants and readily recognizable as artificially propagated specimens, are not subject to the provisions of the Convention.

<sup>18</sup> *Panax ginseng* Only the population of the Russian Federation.

<sup>19</sup> *Swietenia macrophylla* Populations of the Neotropics.

<sup>20</sup> *Taxus chinensis*, *T. cuspidata*, *T. fuana*, *T. sumatrana*, *T. wallichiana* Whole artificially propagated plants in pots or other small containers, each consignment being accompanied by a label or document stating the name of the taxon or taxa and the text 'artificially propagated', are not subject to the provisions of the Convention.

## Prefacio

En estas ediciones de la *Lista de Especies CITES y de los Apéndices y Reservas Anotados de la CITES* (esta última solo en el CD-ROM adjunto) se han tomado en consideración las enmiendas a los Apéndices de la CITES y las modificaciones en la nomenclatura aprobadas en la 13<sup>a</sup> reunión de la Conferencia de las Partes en la CITES (Bangkok, 2004).

En esa reunión, la Conferencia de las Partes reconoció la Lista y sus actualizaciones como una recopilación oficial de los nombres científicos de las especies incluidas en los Apéndices de la CITES, que refleja los nombres utilizados en las referencias normalizadas oficiales. Expresamos nuestro agradecimiento al PNUMA-Centro de Monitoreo de la Conservación Mundial (PNUMA-CMCM) por haber producido nuevamente esta Lista y, en particular, al personal encargado de esta meticulosa labor.

Los gastos de preparación y producción de esta Lista fueron sufragados por la Comisión Europea, el *Joint Nature Conservation Committee* (Reino Unido) y el PNUMA-CMCM, así como por la Secretaría de la CITES. Deseamos dar las gracias a nuestros colaboradores por sus importantes contribuciones.

Sabemos que esta Lista es ampliamente utilizada y apreciada por las Autoridades Administrativas y Científicas, los funcionarios de aduanas y otras personas interesadas en la aplicación de la CITES, así como por las organizaciones no gubernamentales, los medios académicos, la prensa y otras entidades. Somos conscientes, sin embargo, de que debemos seguir tratando de satisfacer las necesidades cambiantes de los usuarios de esta guía. Por esta razón, acogemos con beneplácito los comentarios y sugerencias de todos los usuarios sobre la forma de mejorarla en el futuro.

Secretaría de la CITES  
Ginebra  
2005

## Agradecimientos

La *Lista de Especies CITES* fue preparada en nombre de la Secretaría de la CITES por el PNUMA Centro de Monitoreo de la Conservación Mundial (PNUMA-CMCM).

El PNUMA-CMCM es el brazo del Programa de las Naciones Unidas del Medio Ambiente, la principal organización intergubernamental ambiental en el mundo, encargado de evaluar la biodiversidad y la implementación de políticas ambientales. El PNUMA-CMCM aspira a ayudar a los responsables de adoptar decisiones a reconocer el valor de la biodiversidad para la gente de todo el mundo, y a poner en práctica este conocimiento en todo lo que hacen. El desafío del Centro es transformar datos complejos en información relevante para la formulación de políticas de gestión, desarrollar instrumentos y sistemas para el análisis y la integración de estos datos, y apoyar las necesidades de las naciones y de la comunidad internacional en general en sus esfuerzos por desarrollar programas de acción conjunta.

Esta publicación fue editada por Tim Inskipp y Harriet Gillett, con el apoyo Joan Field y Sarah Ferriss. James O'Carroll prestó apoyo técnico. Gerardo Fragoso se encargó de la supervisión de este proyecto. El equipo de producción expresa su agradecimiento al personal de la Secretaría de la CITES y al Comité de Nomenclatura de la CITES por su asesoramiento y asistencia.

El PNUMA-CMCM desea dar asimismo las gracias a la Comisión Europea y al *Joint Nature Conservation Committee* del Reino Unido por su concurso financiero, que ha hecho posible la producción de esta publicación y del CD-ROM.

## Créditos de las ilustraciones

La Secretaría de la CITES expresa su agradecimiento a los fotógrafos e instituciones que han donado graciosamente su láminas y fotografías para esta publicación.

## **Introducción**

### **Especies de fauna y flora incluidas en los Apéndices de la CITES**

En esta publicación y CD-ROM se presenta una Lista de especies de fauna y de flora incluidas en los Apéndices I, II y III de la CITES, tal como fue aprobada por la Conferencia de las Partes, válida a partir del 17 de febrero de 2005. En el CD-ROM se incluyen también los *Apéndices y Reservas Anotados de la CITES*, con un índice de los nombres de las familias y los nombres comunes. Se alberga la esperanza de que sea útil para las Autoridades Administrativas y Científicas, los funcionarios de aduanas y otras personas interesadas en la aplicación y observancia de la Convención.

### **Observación general**

En los Apéndices de la CITES se utilizan los nombres científicos aprobados por el Comité de Nomenclatura de la CITES y adoptados por la Conferencia de las Partes en la CITES. En esta Lista y en los Apéndices anotados, se incluyen los nombres comunes a título de referencia. Si no aparece el nombre común de un animal o planta incluido en los Apéndices de la CITES, debería buscarse bajo su nombre científico o bajo otro nombre común.

Las especies que figuran en la Lista y en los Apéndices anotados se clasifican:

- a) con arreglo al nombre de las especies; o
- b) como si todas las especies estuviesen incluidas en un taxón superior o en una parte designada del mismo.

Otras referencias a los taxa superiores de la especie se indican únicamente a título de información o de clasificación.

En la base de datos de las especies CITES, disponible en el sitio web de la CITES ([www.cites.org](http://www.cites.org)), se presenta mayor información sobre cada taxón, incluida la distribución y los nombres de los autores.

### **Nomenclatura y taxonomía**

La nomenclatura y la taxonomía seguidas en esta publicación son las utilizadas en los Apéndices de la CITES. En la mayoría de los casos en que en los Apéndices se cita únicamente el nombre de un orden, familia o género, los nombres de las especies en ese taxón superior se han incluido en esta Lista. Cuando la Conferencia de las Partes ha adoptado una referencia normalizada, los nombres de esas especies son los utilizados en las correspondientes publicaciones a que se hace alusión en la sección Referencias al final de la presente publicación. Esos nombres adoptados aparecen en negritas en la Lista. Cuando no se haya adoptado una referencia normalizada (como se indica en las Referencias) los nombres de las especies de un taxón superior son los utilizados normalmente en la base de datos del PNUMA-CMCM, que se han extraído de diversas publicaciones.

## Lista de especies CITES

La Lista de especies CITES consta de una lista alfabética de la fauna, seguida por la flora. Hay tres tipos de entradas: el nombre científico, el nombre común y el sinónimo científico. Los nombres comunes y los sinónimos remiten a los nombres científicos adoptados, donde se porporciona la información conexa CITES.

### Nombre científico

La Lista contiene los nombres científicos, por orden alfabético, de todos los taxa animales y vegetales incluidos en los Apéndices de la CITES, a la excepción de los géneros de orquídeas incluidos en el Apéndice II que no aparecen en los tres volúmenes publicados de la *Lista de orquídeas CITES*, para las que solamente se incluye el nombre del género, por ejemplo, *Aa* spp.

- |         |    |   |
|---------|----|---|
| Formato | 1) | Nombre científico (los nombres en negritas son los adoptados por la Conferencia de las Partes);   |
|         | 2) | Optativo - nombres comunes en español (S), francés (F) e inglés (E);  |
|         | 3) | Optativo – el símbolo #1-#10 y los números sobreescritos (p. ej. <sup>1</sup> ) (véase la <i>Interpretación infra</i> );  |
|         | 4) | Los Apéndices I, II o III en que está incluida la especie, o 'NC' para taxa que no están, o están parcialmente, incluidos en los Apéndices de la CITES <sup>1</sup> . Algunos taxa son objeto de inclusión dividida, lo que significa que pueden estar parcialmente incluidas en un Apéndice y parcialmente en otro. Cuando un taxón está incluido en el Apéndice I y II, por ejemplo, se indicará mediante 'I/II'. En ocasiones, solo están incluidas ciertas poblaciones, mientras que otras no están amparadas por la Convención. Para un taxón parcialmente incluido en el Apéndice I y parcialmente no incluido en otro Apéndice, se indicará mediante 'I/NC'; y |
|         | 5) | Para la fauna, la familia en letras mayúsculas y un código de dos letras para la clase en que está incluida la especie. Se utilizan los siguientes códigos:   |

- Ac = Actinopterygii  
Am = Amphibia  
An = Anthozoa  
Ar = Arachnida  
Av = Aves  
Bi = Bivalvia  
El = Elasmobranchii  
Ga = Gastropoda  
Hi = Hirudinoidea  
Hy = Hydrozoa  
In = Insecta  
Ma = Mammalia  
Re = Reptilia  
Sa = Sarcopterygii

<sup>1</sup> A título informativo, se incluyen algunas especies que no figuran en los Apéndices de la CITES, concretamente tres especies de Psittaciformes: *Agapornis roseicollis*, *Melopsittacus undulatus* y *Nymphicus hollandicus*, y cuatro especies de Falconiformes: *Cathartes aura*, *Cathartes burrovianus*, *Cathartes melambrotus* y *Coragyps atratus*. Son las únicas especies de estos amplios órdenes que no están amparadas por la CITES. De igual modo, *Aloe vera* es la única especie de *Aloe* que no está incluida en los Apéndices.

- Ejemplos
- *Abeillia abeillei*: (E) Emerald-chinned Hummingbird, (S) Colibrí barbiesmeralda, (F) Colibri d’Abeillé **II** TROCHILIDAE Av
  - *Aa* spp. #8 **II** Orchidaceae

## Nombre común

En la medida de lo posible, se indican los nombres comunes en español, francés e inglés.

- Formato
- El nombre común, ya sea en inglés (E), español (S) o francés (F), va seguido por el correspondiente nombre científico. Solo hay una entrada para cada nombre común, así, pues, solo hay una entrada para ‘Águila real’, pero no para ‘Real, Águila’.

- Ejemplos
- Loros (S): PSITTACIFORMES spp.
  - Orchids, slipper (E): *Paphiopedilum* spp. / *Phragmipedium* spp.
  - Colibrí barbiesmeralda (S): *Abeillia abeillei*

## Sinónimos científicos

Se incluyen algunos sinónimos de los nombres científicos, pero la lista no es exhaustiva.

- Formato
- Un sinónimo científico va seguido por ‘=’ y por el nombre científico aceptado. Para acceder a mayor información sobre la especie, debe consultarse este último, por orden alfabético.

- Ejemplo
- Tirucallia goetzei* = *Euphorbia goetzei*

## Apéndices y Reservas Anotados de la CITES (únicamente el CD-ROM)

Se incluye información sobre todos los taxa incluidos actual o anteriormente en los Apéndices de la CITES. Se indica la fecha de inclusión de todos los taxa (orden, familia, género, especie, subespecie) y las poblaciones citadas en los Apéndices en vigor, o en anteriores versiones de los Apéndices. Se indican también todas las reservas formuladas por las Partes, con la fecha en que entraron en vigor y, en el caso de antiguas reservas, la fecha en que se retiraron.

La información se presenta por orden taxonómico, con los nombres comunes para los taxa superiores, p.ej. URSIDAE (osos). Sin embargo, en esta sección sólo se incluye el nombre común de una especie en casos en que solo una o varias especies están incluidas en una familia, p.ej. ESCHRICHTIIDAE (ballena gris). Esto significa que en la mayoría de los casos los nombres de las especies se indican únicamente en latín. Si los usuarios no pueden encontrar una especie por su nombre común en los *Apéndices y Reservas Anotados de la CITES*, deberían buscar su nombre científico equivalente en la *Lista de Especies CITES*, y consultar el nombre científico en los *Apéndices y Reservas Anotados*. Por ejemplo, para encontrar la especie cabezón, consulte primero la Lista, donde ese nombre aparece asociado a *Peltoccephalus dumeriliana*. Busque luego *Peltoccephalus dumeriliana* en los Apéndices anotados.

En cinco columnas se ofrece información sobre: el nombre científico, el Apéndice de la CITES, el código ISO, las fechas y las notas, como sigue:

## Nombre científico

En la primera columna figuran los nombres científicos de los taxa que están incluidos o han estado incluidos en los Apéndices. Estos nombres pueden referirse a diversos niveles taxonómicos: orden, familia, género, especie, subespecie o variedad. Los órdenes y las familias figuran en el mismo orden de

sucesión taxonómica que la utilizada en los Apéndices de la CITES. Las especies (y las subspecies) se indican por orden de sucesión alfabética dentro de cada familia. Obsérvese que los nombres del taxón superior que aparecen en negrita se indican únicamente a título informativo.

## Apéndice de la CITES

En las tres columnas siguientes figuran los Apéndices en los que están o estaban incluidos los taxa. Las reservas formuladas por las Partes se indican añadiendo ‘r’ al número del Apéndice, para señalar la fecha de entrada en vigor y ‘w’ para indicar que la reserva fue retirada. Si el Apéndice I y el Apéndice II se aplican a un taxón determinado en una fecha, se indica en primer lugar el Apéndice I. Cuando aparece la letra ‘Del’ en una de las tres columnas, en vez del número del Apéndice, significa que el taxón se suprimió de dicho Apéndice en la fecha señalada.

## Códigos ISO

En esta columna se presenta el código ISO de cada Parte o territorio mencionado en relación con una inclusión en el Apéndice III, las reservas y las especies objeto de inclusión dividida o parcial.

## Fechas

En esta columna aparecen las fechas en que entraron en vigor los cambios en los Apéndices en relación con las especies. La fechas aparecen por orden cronológico (día/mes/año, es decir, 01/07/75 = 1 de julio de 1975), indicándose en primer lugar la fecha más antigua. La evolución de la inclusión de un taxón/población puede determinarse examinando las líneas siguientes. Cuando las poblaciones de un taxón están divididas entre el Apéndice I y el Apéndice II, ambos Apéndices figuran al lado de cada fecha cuando se produjo un cambio, con notas en las que se indica el estado de todas las poblaciones en cada uno de los Apéndices.

## Notas

La última columna contiene toda la información complementaria sobre los cambios y la situación después de cada cambio. Cuando se trata de poblaciones separadas, se muestra la evolución de modo que cualquier cambio en la inclusión entre varios Apéndices pueda determinarse leyendo las dos líneas que se refieren a cada cambio. Las referencias a las poblaciones se indican utilizando el código ISO de dos letras de cada país (véase *supra*). En otras notas se ofrece información complementaria sobre los taxa incluidos, por ejemplo, los sinónimos científicos. El término 'Incluido con....' significa que el taxón en cuestión fue inicialmente incluido de forma separada pero fue posteriormente incluido en un taxón superior. El término 'Incluido bajo ...' significa que el taxón en cuestión formaba parte inicialmente de un taxón superior pero fue posteriormente tratado por separado, bien sea transferido a otro Apéndice o sujeto a una reserva.

A modo de ejemplo, si se examina la historia de la inclusión en los Apéndices de la población de *Crocodylus niloticus* de Malawi, puede observarse que en la primera entrada para esta especie se indica que la especie (es decir, todas las poblaciones) se incluyó en el Apéndice I el 1 de julio de 1975. A continuación hay un número de entradas que se refieren a la transferencia de diversas poblaciones entre el Apéndice I y el Apéndice II. En una de ellas se indica que la población de Malawi (MW) fue transferida al Apéndice II el 1 de agosto de 1985. En otra entrada se indica que el 18 de enero de 1990 entró en vigor un programa de cría en granjas para esta especie y en la última entrada se resume la situación actual de esta especie, donde se confirma que la población de especímenes criados en granjas de Malawi sigue estando en el Apéndice II.

## Explicación de las anotaciones

I	=	incluida en el Apéndice I	spp.	=	todas las especies de un taxón
II	=	incluida en el Apéndice II			superior
III	=	incluida en el Apéndice III	ssp.	=	subspecies
Del	=	suprimida de los Apéndices	syn.	=	sinónimo
f	=	forma	var.	=	variedad
NC	=	no CITES	w	=	reserva retirada por la Parte correspondiente
popn(s)	=	población(es)	#1–#10	=	se refiere a la <i>Interpretación</i> (véase <i>infra</i> )
r	=	reserva formulada por la Parte correspondiente	1 a 20	=	los números sobreescritos se refieren a la <i>Interpretación</i> (véase <i>infra</i> )

## Interpretación

De conformidad con las disposiciones del párrafo b(iii) del Artículo I de la Convención, el signo (#) seguido de un número colocado junto al nombre de una especie o de un taxón superior incluido en el Apéndice II o III designa las partes o derivados provenientes de esa especie o de ese taxón y se indican como sigue a los efectos de la Convención:

- #1 designa todas las partes y derivados, excepto:
  - a) las semillas, las esporas y el polen (inclusive las polinias);
  - b) los cultivos de plántulas o de tejidos obtenidos *in vitro*, en medios sólidos o líquidos, que se transportan en envases estériles; y
  - c) las flores cortadas de plantas reproducidas artificialmente;
- #2 designa todas las partes y derivados, excepto:
  - a) las semillas y el polen;
  - b) los cultivos de plántulas o de tejidos obtenidos *in vitro*, en medios sólidos o líquidos, que se transportan en envases estériles;
  - c) las flores cortadas de plantas reproducidas artificialmente; y
  - d) los derivados químicos y productos farmacéuticos acabados;
- #3 designa las raíces enteras o en rodajas o partes de las raíces, excluidas las partes o derivados manufacturados, tales como polvos, pastillas, extractos, tónicos, té y otros preparados;
- #4 designa todas las partes y derivados, excepto:
  - a) las semillas, excepto las de las cactáceas mexicanas originarias de México, y el polen;
  - b) los cultivos de plántulas o de tejidos obtenidos *in vitro*, en medios sólidos o líquidos, que se transportan en envases estériles;
  - c) las flores cortadas de plantas reproducidas artificialmente;
  - d) los frutos, y sus partes y derivados, de plantas aclimatadas o reproducidas artificialmente; y
  - e) los elementos del tallo (ramificaciones), y sus partes y derivados, de plantas del género *Opuntia* subgénero *Opuntia* aclimatadas o reproducidas artificialmente;
- #5 designa trozas, madera aserrada y láminas de chapa de madera;
- #6 designa trozas, madera aserrada, láminas de chapa de madera y madera contrachapada;
- #7 designa trozas, troceados de madera y material fragmentado no elaborado;
- #8 designa todas las partes y derivados, excepto:
  - a) las semillas y el polen (inclusive las polinias);
  - b) los cultivos de plántulas o de tejidos obtenidos *in vitro*, en medios sólidos o líquidos, que se transportan en envases estériles;
  - c) las flores cortadas de ejemplares reproducidos artificialmente; y
  - d) los frutos, y sus partes y derivados, de plantas del género *Vanilla* reproducidas artificialmente;
- #9 designa todas las partes y derivados, excepto los que lleven una etiqueta en la que se indique: ‘Produced from *Hoodia* spp. material obtained through controlled harvesting and production in collaboration with the CITES Management Authorities of Botswana/Namibia/South Africa under agreement no. BW/NA/ZA xxxxxx’ (Producido a partir de material de *Hoodia* spp. obtenido mediante recolección y producción controlada en colaboración con las Autoridades Administrativas CITES de Botswana/Namibia/Sudáfrica con arreglo al acuerdo No. BW/NA/ZA xxxxxx);
- #10 designa todas las partes y derivados, excepto:
  - a) las semillas y el polen; y
  - b) productos farmacéuticos acabados.

## **Observaciones complementarias**

La Conferencia de las Partes ha añadido condiciones para la inclusión de algunas especies en los Apéndices. Esas condiciones se indican en una nota al pie de página en la página correspondiente, en la medida de lo posible, o solo como notas al final de la publicación cuando su tamaño no hizo posible esa presentación. A continuación se reproducen todas las notas.

### **Fauna**

<sup>1</sup> *Acinonyx jubatus* Se conceden los siguientes cupos de exportación anual para especímenes vivos y trofeos de caza: Botswana: 5; Namibia: 150; Zimbabwe: 50. El comercio de estos especímenes está sujeto a las disposiciones del Artículo III de la Convención

<sup>2</sup> *Ceratotherium simum simum* Con el exclusivo propósito de autorizar el comercio internacional de animales vivos a destinatarios apropiados y aceptables y de trofeos de caza. Los demás especímenes se considerarán como especímenes de especies incluidas en el Apéndice I y su comercio se reglamentará en consecuencia.

<sup>3</sup> *Cetacea spp.* Se ha establecido un cupo de exportación anual nulo para especímenes vivos de la población de *Tursiops truncatus* del mar Negro capturados en el medio silvestre y comercializados con fines primordialmente comerciales.

<sup>4</sup> *Chaetophractus nationi* Se ha establecido un cupo de exportación anual nulo. Se considerará que todos los especímenes pertenecen a especies incluidas en el Apéndice I y su comercio se reglamentará en consecuencia.

<sup>5</sup> *Crocodylus niloticus* Excepto las poblaciones de Botswana, Etiopía, Kenya, Madagascar, Malawi, Mozambique, Namibia, República Unida de Tanzania, Sudáfrica, Uganda, (sujetas a un cupo de exportación anual de no más de 1.600 especímenes silvestres, incluidos los trofeos de caza, además de los especímenes criados en granjas), Zambia y Zimbabwe; que están incluidas en el Apéndice II.

<sup>6</sup> *Felidae spp.* Los especímenes de la forma domesticada no están sujetos a las disposiciones de la Convención.

<sup>7</sup> *Geochelone sulcata* Se ha establecido un cupo de exportación anual nulo para *Geochelone sulcata*, para los especímenes capturados en el medio silvestres y comercializados con fines promordialmente comerciales

<sup>8</sup> *Helioporidae spp., Milleporidae spp., Scleractinia spp. Stylasteridae spp. Tubiporidae spp.* Los fósiles no están sujetos a las disposiciones de la Convención.

<sup>9</sup> *Loxodonta africana*

**Poblaciones de Botswana, Namibia y Sudáfrica (incluidas en el Apéndice II):**

Con el exclusivo propósito de autorizar:

- 1) el comercio de trofeos de caza con fines no comerciales;
- 2) el comercio de animales vivos para programas de conservación *in situ*;
- 3) el comercio de pieles;
- 4) el comercio de artículos de cuero: con fines no comerciales para Botswana; con fines comerciales o no comerciales para Namibia y Sudáfrica;
- 5) el comercio de pelo con fines comerciales o no comerciales para Namibia;
- 6) el comercio de ekipas marcadas y certificadas individualmente integradas en artículos acabados de joyería con fines no comerciales para Namibia; y
- 7) el comercio de marfil en bruto registrado (para Botswana y Namibia, colmillos enteros y piezas; para Sudáfrica, cornillos enteros y piezas cortadas de marfil de una longitud superior a 20 cm y un peso superior a un kilogramo) sujeto a lo siguiente:
  - i) solamente las existencias registradas propiedad del gobierno, originarias del Estado (excluido el marfil confiscado y el marfil de origen desconocido y, en el caso de Sudáfrica, únicamente el marfil procedente del Parque Nacional Kruger);
  - ii) solamente con asociados comerciales verificados por la Secretaría, en consulta con el Comité Permanente, que cuenten con legislación nacional adecuada y controles comerciales nacionales para garantizar que el marfil importado no se reexportará y se administrará de conformidad con lo dispuesto

- en la Resolución Conf. 10.10 (Rev. CoP12), en lo que respecta a la manufactura y el comercio interno;
- iii) no antes de que la Secretaría haya verificado los posibles países importadores y MIKE haya presentado a la Secretaría la información de referencia (por ejemplo, número de la población de elefantes, incidencia de las matanzas ilegales);
  - iv) la comercialización de una cantidad máxima de marfil de 20.000 kg (Botswana), 10.000 kg (Namibia) y 30.000 kg (Sudáfrica), que se despachará en un solo envío bajo estricta supervisión de la Secretaría;
  - v) los ingresos obtenidos de este comercio se utilizarán exclusivamente para la conservación del elefante y en programas comunitarios de desarrollo y conservación en zonas adyacentes y dentro del área de distribución del elefante; y
  - vi) solo después que el Comité Permanente haya acordado que se han reunido las condiciones precitadas. A propuesta de la Secretaría, el Comité Permanente puede decidir poner fin parcial o completamente a este comercio en el caso de incumplimiento de los países importadores o exportadores, o en caso de probados efectos perjudiciales del comercio sobre otras poblaciones de elefantes.

Todos los demás especímenes se considerarán especímenes de especies incluidas en el Apéndice I y su comercio se reglamentará en consecuencia.

#### **Población de Zimbabwe (incluida en el Apéndice II):**

Con el exclusivo propósito de autorizar:

- 1) la exportación de trofeos de caza con fines no comerciales;
- 2) la exportación de animales vivos a destinatarios apropiados y aceptables;
- 3) la exportación de pieles; y
- 4) la exportación de artículos de cuero y tallas de marfil con fines no comerciales.

Todos los especímenes cuyo comercio no esté autorizado en virtud de las precitadas disposiciones se considerarán especímenes de especies incluidas en el Apéndice I y su comercio se reglamentará en consecuencia. A fin de garantizar que: a) los destinatarios de los animales vivos son apropiados y aceptables y/o b) el propósito de la importación es no comercial, sólo se expedirán permisos de exportación y certificados de reexportación una vez que la Autoridad Administrativa expedidora haya recibido, de la Autoridad Administrativa del Estado de importación, un certificado en el sentido de que: en el caso a), en analogía con el párrafo 3 (b) del Artículo III de la Convención, la Autoridad Científica competente haya visitado el centro de acogida y dictamine que el destinatario propuesto está debidamente equipado para albergar y cuidar los animales; y/o en el caso b), en analogía con el párrafo 3 c) del Artículo III, la Autoridad Administrativa haya verificado que los especímenes no serán utilizados con fines primordialmente comerciales.

<sup>10</sup> *Manis spp.* Se ha establecido un cupo de exportación anual nulo para especímenes de *Manis crassicaudata*, *M. javanica* y *M. pentadactyla* capturados en el medio silvestre y comercializados con fines primordialmente comerciales.

<sup>11</sup> *Melanosuchus niger* Sujeta a un cupo de exportación anual nulo hasta que la Secretaría CITES y el Grupo de Especialistas en Cocodrilidos de la CSE/UICN hayan aprobado un cupo de exportación anual.

#### <sup>12</sup> *Vicugna vicugna*

**Población de Argentina (incluida en el Apéndice II):** Con el exclusivo propósito de autorizar el comercio internacional de lana esquilada de vicuñas vivas, de telas, de productos manufacturados derivados y de artesanías. En el revés de las telas debe figurar el logotipo adoptado por los Estados del área de distribución de la especie, signatarios del Convenio para la Conservación y Manejo de la Vicuña, y en los orillos la expresión “VICUÑA-ARGENTINA”. Otros productos deben llevar una etiqueta con el logotipo y las palabras “VICUÑA-ARGENTINA-ARTESANÍA”. Todos los demás especímenes deben considerarse como especímenes de especies incluidas en el Apéndice I y su comercio deberá reglamentarse en consecuencia.

**Población de Bolivia (incluida en el Apéndice II):** Con el exclusivo propósito de autorizar el comercio internacional de: a) fibra esquilada de animales vivos y productos derivados de la misma de las poblaciones de las unidades de conservación de Mauri-Desaguadero, Ulla Ulla y Lípez-Chichas; y b) productos elaborados con fibra esquilada de animales vivos del resto de la población de Bolivia. En el revés de las telas debe figurar el logotipo adoptado por los Estados del área de distribución de la especie, signatarios del Convenio para la Conservación y Manejo de la Vicuña, y en los orillos la expresión “VICUÑA-BOLIVIA”. Otros productos deben llevar una etiqueta con el logotipo y las palabras “VICUÑA-BOLIVIA-ARTESANÍA”. Todos los demás especímenes deben considerarse como especímenes de especies incluidas en el Apéndice I y su comercio deberá

reglamentarse en consecuencia.

**Población de Chile (incluida en el Apéndice II):** Con el exclusivo propósito de autorizar el comercio internacional de fibra esquilada de vicuñas vivas y de telas y artículos hechas de la misma, inclusive los artículos artesanales suntuarios y tejidos de punto. En el revés de las telas debe figurar el logotipo adoptado por los Estados del área de distribución de la especie, signatarios del Convenio para la Conservación y Manejo de la Vicuña, y en los orillos la expresión "VICUÑA-CHILE". Otros productos deben llevar una etiqueta con el logotipo y las palabras "VICUÑA-CHILE-ARTESANÍA". Todos los demás especímenes deben considerarse como especímenes de especies incluidas en el Apéndice I y su comercio deberá reglamentarse en consecuencia.

**Población de Perú (incluida en el Apéndice II):** Con el exclusivo propósito de autorizar el comercio internacional de lana esquilada de vicuñas vivas y de las existencias registradas en la novena reunión de la Conferencia de las Partes (noviembre de 1994) de 3.249 kg de lana, y de telas y artículos derivados, inclusive los artículos artesanales suntuarios y tejidos de punto fabricados. En el revés de las telas debe figurar el logotipo adoptado por los Estados del área de distribución de la especie, signatarios del Convenio para la Conservación y Manejo de la Vicuña, y en los orillos la expresión "VICUÑA-PERÚ". Otros productos deben llevar una etiqueta con el logotipo y las palabras "VICUÑA-PERÚ-ARTESANÍA". Todos los demás especímenes deben considerarse como especímenes de especies incluidas en el Apéndice I y su comercio deberá reglamentarse en consecuencia.

## Flora

<sup>13</sup> *Cactaceae* spp. Los especímenes reproducidos artificialmente de los siguientes híbridos y/o cultivares no están sujetos a las disposiciones de la Convención: *Hatiora* x *graeseri*; *Schlumbergera* x *buckleyi*; *S. russelliana* x *S. truncata*; *S. orssichiana* x *S. truncata*; *S. opuntioides* x *S. truncata*; *S. truncata* (cultivars); *Cactaceae* spp. (cultivares) formas de color mutante que carecen de clorofila, injertadas en los siguientes patrones: *Harrisia* 'Jusbertii'/*Hylocereus trigonus* o *H. undatus*; *Opuntia microdasys* (cultivars).

<sup>14</sup> *Cyclamen* spp. Los especímenes reproducidos artificialmente de cultivares de *Cyclamen persicum* no están sujetos a las disposiciones de la Convención. No obstante, esta exoneración no se aplica a los especímenes comercializados como tubérculos latentes.

<sup>15</sup> *Orchidaceae* spp. Los especímenes reproducidos artificialmente de híbridos de los géneros *Cymbidium*, *Dendrobium*, *Phalaenopsis* y *Vanda* no están sujetos a las disposiciones de la Convención cuando:

- 1) los especímenes se comercialicen en envíos compuestos por contenedores individuales (por ejemplo, cartones, cajas o cajones) que contengan 20 o más plantas del mismo híbrido cada uno;
- 2) las plantas en cada contenedor puedan reconocerse fácilmente como especímenes reproducidos artificialmente, al mostrar un elevado grado de uniformidad y un aspecto saludable; y
- 3) los envíos vayan acompañados de documentación, como una factura, en la que se indique claramente el número de plantas de cada híbrido.

Los especímenes reproducidos artificialmente de los siguientes híbridos:

- *Cymbidium*: Híbridos interespecíficos dentro del género e híbridos intergenéricos
- *Dendrobium*: Híbridos interespecíficos dentro del género, conocidos en horticultura como "tipos *nobile*" y "tipos *phalaenopsis*"
- *Phalaenopsis*: Híbridos interespecíficos dentro del género e híbridos intergenéricos
- *Vanda*: Híbridos interespecíficos dentro del género e híbridos intergenéricos

no están sujetos a las disposiciones de la Convención cuando:

- 1) se comercialicen en floración, es decir, con al menos una flor abierta por espécimen, con pétalos recurvados;
- 2) se procesen profesionalmente para la venta al por menor, es decir, etiquetados con etiquetas impresas y empaquetados con paquetes impresos;
- 3) puedan reconocerse fácilmente como especímenes reproducidos artificialmente al mostrar un elevado grado de limpieza, inflorescencias sin daños, sistemas radiculares intactos y ausencia general de daños o heridas que podrían atribuirse a las plantas procedentes del medio silvestre;
- 4) las plantas no muestren características de origen silvestre, como daños ocasionados por insectos u otros animales, hongos o algas adheridas a las hojas o daños mecánicos producidos en las inflorescencias, raíces, hojas u otras partes debido a la recolección; y
- 5) en las etiquetas o los paquetes se indique el nombre comercial del espécimen, el país de

reproducción artificial o, en caso de comercio internacional durante el proceso de producción, el país en que el espécimen fue etiquetado y empaquetado; y en las etiquetas o paquetes se muestre una fotografía de la flor o se demuestre por otros medios el uso apropiado de etiquetas y paquetes de un modo fácil de verificar.

Las plantas que no reúnan claramente los requisitos exigidos para obtener la exención deben ir acompañadas de los documentos CITES apropiados.

<sup>16</sup> *Dicksonia* spp. Sólo la población de las Américas.

<sup>17</sup> *Euphorbia* spp. Los especímenes reproducidos artificialmente de cultivares de *Euphorbia trigona*, los especímenes reproducidos artificialmente, que tengan las ramas crestadas o en forma de abanico o sean mutantes cromáticos de *Euphorbia lactea*, cuando estén injertados en rizomas de *Euphorbia neriifolia* reproducidos artificialmente, y los especímenes reproducidos artificialmente de cultivares de *Euphorbia* "Milii" cuando se comercialicen en envíos de 100 o más plantas y se reconozcan fácilmente como especímenes reproducidos artificialmente, no están sujetos a las disposiciones de la Convención.

<sup>18</sup> *Panax ginseng* Sólo la población de la Federación de Rusia.

<sup>19</sup> *Swietenia macrophylla* Las poblaciones de los neotrópicos.

<sup>20</sup> *Taxus chinensis*, *T. cuspidata*, *T. fuana*, *T. sumatrana*, *T. wallichiana* Las plantas enteras reproducidas artificialmente en macetas u otros contenedores pequeños, acompañándose cada envío con una etiqueta o documento, en el que se indique el nombre del taxón o de los taxa y el texto: "reproducida artificialmente", no están sujetos a las disposiciones de la Convención.

## Avant-propos

La présente édition de la *Liste des espèces CITES* et celle des *Annexes et réserves CITES annotées* (cette dernière uniquement sur le CD-ROM qui accompagne le livre) intègrent les amendements aux annexes CITES et les changements de nomenclature adoptés à la 13<sup>e</sup> session de la Conférence des Parties à la CITES (Bangkok, 2004).

A cette session, la Conférence des Parties a adopté la Liste et ses mises à jour comme recueil officiel des noms des espèces inscrites aux annexes CITES reprenant les noms figurant dans les références normalisées officielles. Nous sommes très reconnaissants au PNUE Centre de surveillance continue de la conservation mondiale de la nature (PNUE-WCMC) de s'être de nouveau attelé à cette tâche; nous adressons des remerciements particuliers au personnel qui a accompli ce travail méticuleux.

Les frais de préparation et de production de la Liste ont été pris en charge par la Commission européenne, *Joint Nature Conservation Committee* (Royaume-Uni) et le PNUE-WCMC, ainsi que par le Secrétariat CITES; nous remercions vivement nos partenaires pour leur importante contribution.

Nous savons que la Liste des espèces CITES est largement utilisée et très appréciée par les organes de gestion, les autorités scientifiques, les douanes et les personnes impliquées dans la mise en œuvre de la CITES, ainsi que par les organisations non gouvernementales, les scientifiques, la presse et autres entités. Nous sommes par ailleurs conscients que nous devons continuer de nous adapter aux besoins nouveaux des utilisateurs. C'est pourquoi que nous souhaiterions connaître les réactions et les suggestions des utilisateurs de cet ouvrage sur la manière dont nous pourrions l'améliorer à l'avenir.

Secrétariat CITES  
Genève  
2005

## Remerciements

La *Liste des espèces CITES* a été préparée au nom du Secrétariat CITES par le PNUE Centre de surveillance continue de la conservation mondiale de la nature (PNUE-WCMC).

Le PNUE-WCMC est l'agence chargée de l'évaluation de la diversité biologique et de la mise en œuvre des directives du Programme des Nations Unies pour l'environnement, la principale organisation intergouvernementale environnementale au monde. Le PNUE-WCMC aspire à aider les décideurs à reconnaître l'importance de la diversité biologique pour l'humanité et à utiliser cette connaissance dans toutes leurs activités. Le défi qu'il doit relever est de transformer des données complexes en informations pertinentes et de mettre au point des outils et des systèmes permettant leur analyse et leur intégration et de répondre aux besoins des nations et de la communauté internationale dans leurs programmes d'action conjoints.

Cette publication a été revue et corrigée par Tim Inskipp et Harriet Gillett avec l'assistance de Joan Field et de Sarah Ferriss et l'appui technique de James O'Carroll. Gerardo Fragoso a supervisé le projet. L'équipe chargée de la production est très reconnaissante au personnel du Secrétariat CITES et au Comité de la nomenclature CITES pour leurs conseils et leur assistance.

Le PNUE-WCMC remercie également la Commission européenne et le *Joint Nature Conservation Committee*, du Royaume-Uni, pour leur appui financier qui a rendu possible la production de ce livre et de son CD-ROM.

## **Illustrations**

Le Secrétariat CITES est très reconnaissant aux photographes et aux institutions qui ont fait don de plaques et de photos pour cette publication.

## **Introduction**

### **Faune et flore CITES**

Ce livre et son CD-ROM donnent la liste des espèces animales et végétales inscrites aux Annexes I, II et III de la CITES adoptée par la Conférence des Parties et valable à compter du 17 février 2005. Le CD-ROM inclut aussi les *Annexes et réserves CITES annotées* avec un index des noms des familles et des noms communs. Les compilateurs espèrent qu'ils seront utiles au personnel des organes de gestion et des autorités scientifiques, ainsi qu'aux douaniers et à toutes les personnes chargées d'appliquer la Convention ou de la faire respecter.

#### **Remarques générales**

Les noms utilisés dans les annexes CITES sont les noms scientifiques acceptés par le Comité CITES de la nomenclature et adoptés par la Conférence des Parties à la CITES. Les noms communs figurant dans la Liste des espèces CITES et dans les annexes annotées sont donnés pour référence. Si l'utilisateur ne trouve pas le nom commun d'une plante ou d'un animal couvert par la CITES, il devra le rechercher sous son nom scientifique ou sous un autre nom commun.

Les espèces figurant dans la *Liste des espèces CITES et annexes et réserves CITES annotées* sont indiquées:

- a) par le nom de l'espèce; ou
- b) par l'ensemble des espèces du taxon supérieur ou une partie désignée de ce taxon.

Les autres références à des taxons supérieurs à l'espèce sont données uniquement à titre d'information ou à des fins de classification.

Le lecteur trouvera d'autres détails concernant chaque taxon, comme le nom de l'auteur et la répartition géographique, sur le site officiel de la CITES: [www.cites.org](http://www.cites.org)

### **Nomenclature et taxonomie**

La nomenclature et la taxonomie suivies ici sont celles utilisées dans les annexes CITES. Lorsque les annexes n'incluent que le nom d'un ordre, d'une famille ou d'un genre, les noms des espèces de ce taxon supérieur ont le plus souvent été inclus dans la Liste. Lorsqu'une référence normalisée a été adoptée par la Conférence des Parties, les noms de ces espèces sont ceux utilisés dans les publications pertinentes signalées dans la partie *Références* à la fin de l'ouvrage. Les noms adoptés figurent en gras dans la Liste. Lorsqu'aucune référence normalisée n'a été adoptée (comme signalé sous *Références*), les noms des espèces de taxons supérieurs sont ceux actuellement utilisés dans la base de données du PNUE-WCMC et proviennent de diverses publications.

## Liste des espèces CITES

La Liste des espèces CITES comprend une liste alphabétique d'espèces animales et une liste alphabétique d'espèces végétales. Il y a trois types d'entrées: nom scientifique, nom commun et synonyme scientifique. Les noms communs et les synonymes renvoient aux noms scientifiques, où figurent les informations CITES.

### Nom scientifique

La Liste contient, dans l'ordre alphabétique, tous les taxons animaux et végétaux inscrits aux annexes CITES – à l'exception des genres d'orchidées inscrits à l'Annexe II non couverts par les trois volumes publiés de la *Liste CITES des orchidées*, pour lesquels seul le nom du genre est inscrit – *Aa* spp., par exemple.

- Présentation
- 1) Nom scientifique (ceux adoptés par la Conférence des Parties sont en gras);
  - 2) En option: noms communs en anglais (E), en espagnol (S) et en français (F);
  - 3) En option: symboles #1 à #10 et exposants (exemple<sup>1</sup>) (voir *Interprétation ci-dessous*);
  - 4) Annexe(s) I, II, III, auxquelles l'espèce est inscrite, ou 'NC' pour signaler les taxons partiellement inscrits ou non inscrits aux annexes CITES<sup>1</sup>. Certains taxons font l'objet d'une inscription scindée; cela signifie qu'ils sont inscrits en partie à une annexe et en partie à une autre. Lorsqu'un taxon est inscrit à la fois à l'Annexe I et à l'Annexe II, par exemple, il est signalé par 'I/II'. Parfois, seules certaines populations sont inscrites alors que d'autres ne sont pas couvertes par la Convention. Un taxon en partie inscrit à l'Annexe I et en partie non inscrit, par exemple, est signalé par 'I/NC' ; et
  - 5) Pour la faune, famille en majuscules et code à deux lettres indiquant la classe à laquelle appartient l'espèce. Les codes suivants ont été utilisés:

Ac	=	Actinopterygii
Am	=	Amphibia
An	=	Anthozoa
Ar	=	Arachnida
Av	=	Aves
Bi	=	Bivalvia
El	=	Elasmobranchii
Ga	=	Gastropoda
Hi	=	Hirudinoidea
Hy	=	Hydrozoa
In	=	Insecta
Ma	=	Mammalia
Re	=	Reptilia
Sa	=	Sarcopterygii

### Exemples

- *Abeillia abeillei*: (E) Emerald-chinned Hummingbird, (S) Colibri barbiermeralda, (F) Colibri d'Abeillé **II** TROCHILIDAE Av
- *Aa* spp. #8 **II** ORCHIDACEAE

<sup>1</sup> Quelques espèces non inscrites aux annexes CITES ont été incluses pour information: trois espèces de Psittaciformes: *Agapornis roseicollis*, *Melopsittacus undulatus* et *Nymphicus hollandicus*, et quatre espèces de Falconiformes: *Cathartes aura*, *Cathartes burrovianus*, *Cathartes melambrotus* et *Coragyps atratus*. Ce sont les seules espèces de ces grands ordres à ne pas être couvertes par la CITES. De même, *Aloe vera* est la seule espèce d'*Aloe* non inscrite aux annexes.

## Nom commun

Quand ils sont connus, les noms communs en anglais, en espagnol et en français sont donnés.

Présentation Le nom commun en anglais (E), en espagnol (S) ou en français (F) est suivi du nom scientifique. Il y a une seule entrée pour chaque nom commun: il y en a une pour ‘Aigle doré’ mais pas pour ‘Doré, Aigle’.

Exemples – Perroquets (F): PSITTACIFORMES spp.  
– Orchids, slipper (E): *Paphiopedilum* spp. / *Phragmipedium* spp.  
– Colibri d’Abeillé (F): *Abeillia abeillei*

## Synonyme scientifique

Certains synonymes de noms scientifiques – mais pas tous – apparaissent dans la liste.

Présentation Synonyme scientifique suivi de ‘=’ puis du nom scientifique accepté. C'est ce dernier qu'il faut chercher, en suivant l'ordre alphabétique, pour trouver les autres renseignements sur l'espèce.

Exemple *Tirucallia goetzei* = *Euphorbia goetzei*

## Annexes et réserves CITES annotées (CD-ROM uniquement)

Des informations sont fournies sur tous les taxons actuellement ou antérieurement inscrits aux annexes CITES. La date de l'inscription originale est indiquée pour tous les taxons (ordre, famille, genre, espèce, sous-espèce) et les populations spécifiquement nommés dans les annexes actuelles ou dans des versions antérieures. Toutes les réserves faites par les Parties sont signalées avec la date d'entrée en vigueur et, dans le cas de réserves passées, la date de retrait.

Les informations sont disposées dans l'ordre taxonomique et incluent les noms communs des taxons supérieurs. Exemple: URSIDAE (ours). Cependant, les noms communs des espèces n'apparaissent dans cette partie que lorsqu'une seule ou quelques espèces d'une famille sont inscrites. Exemple: ESCHRICHTIIDAE (baleine grise). Cela signifie que dans la plupart des cas, les noms d'espèces sont en latin. Si l'utilisateur ne trouve pas une espèce sous son nom commun dans les *Annexes et réserves CITES annotées*, il cherchera d'abord son équivalent scientifique dans la *Liste des espèces CITES* puis ce nom scientifique dans les *Annexes et réserves CITES annotées*.

Des informations sont fournies dans les cinq colonnes suivantes: Nom scientifique, Annexe CITES, Code ISO, Dates et Notes, comme suit:

## Nom scientifique

Cette colonne donne le nom scientifique des taxons qui sont, ou ont été, inscrits aux annexes. Ces noms peuvent être situés à divers niveaux taxonomiques: ordre, famille, genre, espèce, sous-espèce ou variété. Les ordres et les familles sont donnés dans la même séquence taxonomique que celle utilisée dans les annexes CITES. Les espèces (et les sous-espèces) sont indiquées par ordre alphabétique dans chaque famille. Les noms des taxons supérieurs, figurant en caractères gras, sont communiqués pour information.

## Annexe CITES

Dans les trois colonnes suivantes figurent la ou les annexes auxquelles les taxons sont ou étaient inscrits. Les réserves faites par les Parties sont signalées en ajoutant ‘r’ au numéro de l’annexe pour indiquer que la réserve est entrée en vigueur, ou ‘w’ pour indiquer qu’elle a été retirée. Si les Annexes I et II sont toutes deux applicables à un taxon à une certaine date, l’Annexe I est indiquée en premier. La mention ‘Del’ remplaçant un numéro d’annexe dans une des trois colonnes signale que le taxon a été supprimé de l’annexe à la date indiquée.

## Code ISO

Cette colonne donne le code ISO de toute Partie et de tout territoire mentionné dans le contexte d'une inscription à l'Annexe III, des réserves et des espèces faisant l'objet d'une inscription scindée ou partielle.

## Dates

Cette colonne donne les dates d'entrée en vigueur des changements survenus dans les annexes concernant l'espèce en question. Les dates sont indiquées dans l'ordre chronologique (jour/mois/année; exemple: 01/07/75 = 1<sup>er</sup> juillet 1975), la date la plus ancienne étant citée la première. Les inscriptions ultérieures d'un taxon ou d'une population figurent aux lignes suivantes. Lorsque les populations d'un taxon sont scindées entre l'Annexe I et l'Annexe II, les deux annexes sont indiquées après chaque date à laquelle un changement a eu lieu, avec des notes indiquant le statut de toutes les populations à chaque annexe.

## Notes

La dernière colonne contient toute information supplémentaire, par exemple sur les changements et la situation après chaque changement. Pour les populations isolées, le déroulement des faits est indiqué de manière que tout changement d'annexe peut être repéré en lisant les lignes se référant à chaque changement. Les références aux populations sont indiquées par le code ISO à deux lettres des pays ou territoires (voir plus haut). D'autres notes donnent des informations complémentaires sur les taxons inscrits (synonymes scientifiques, par exemple). Les mots 'inclus dans...' indiquent que le taxon a d'abord été inscrit séparément puis englobé dans un taxon supérieur. Les mots 'inscrit sous...' indiquent que le taxon faisait d'abord partie d'un taxon supérieur inscrit puis a été traité séparément, soit qu'il ait été transféré à une autre annexe, ou qu'il ait fait l'objet d'une réserve.

Voici un exemple: si l'on examine les différentes étapes de l'inscription aux annexes de la population de *Crocodylus niloticus* du Malawi, l'on constate que la première entrée pour cette espèce indique que l'espèce entière (toutes ses populations) a été inscrite à l'Annexe I le 1<sup>er</sup> juillet 1975. On trouve ensuite, sous cette entrée, un certain nombre d'autres entrées indiquant le transfert de diverses populations de l'Annexe I à l'Annexe II. L'une d'elles signale que la population du Malawi (MW) a été transférée à l'Annexe II le 1<sup>er</sup> août 1985. Une autre indique que le 18 janvier 1990, un programme d'élevage en ranch d'espèces de l'annexe II a commencé pour cette espèce; la dernière entrée résume la situation actuelle de l'espèce et indique que la population de *C. niloticus* du Malawi élevée en ranch est toujours inscrite à l'Annexe II.

## Clé aux annotations

## Interprétation

Conformément aux dispositions de l'Article I, paragraphe b, alinéa iii), de la Convention, le signe (#) suivi d'un nombre placé après le nom d'une espèce ou d'un taxon supérieur inscrit à l'Annexe II ou à l'Annexe III sert à désigner des parties ou produits obtenus à partir de cette espèce ou de ce taxon et qui sont mentionnés comme suit aux fins de la Convention:

- #1 sert à désigner toutes les parties et tous les produits, sauf:
  - a) les graines, les spores et le pollen (y compris les pollinies);
  - b) les cultures de plantules ou de tissus obtenues *in vitro* en milieu solide ou liquide et transportées en conteneurs stériles; et
  - c) les fleurs coupées des plantes reproduites artificiellement;
- #2 sert à désigner toutes les parties et tous les produits, sauf:
  - a) les graines et le pollen;
  - b) les cultures de plantules ou de tissus obtenues *in vitro* en milieu solide ou liquide et transportées en conteneurs stériles;
  - c) les fleurs coupées des plantes reproduites artificiellement; et
  - d) les produits chimiques et les produits pharmaceutiques finis;
- #3 sert à désigner les racines entières et tranchées et les parties de racines, à l'exception des parties et produits transformés tels que poudres, pilules, extraits, toniques, tisanes et autres préparations;
- #4 sert à désigner toutes les parties et tous les produits, sauf:
  - a) les graines, sauf celles des cactus mexicains provenant du Mexique, et le pollen;
  - b) les cultures de plantules ou de tissus obtenues *in vitro* en milieu solide ou liquide et transportées en conteneurs stériles;
  - c) les fleurs coupées des plantes reproduites artificiellement;
  - d) les fruits, et leurs parties et produits, des plantes acclimatées ou reproduites artificiellement; et
  - e) les éléments de troncs (raquettes), et leurs parties et produits, de plantes du genre *Opuntia* sous-genre *Opuntia* acclimatées ou reproduites artificiellement;
- #5 sert à désigner les grumes, les bois sciés et les placages;
- #6 sert à désigner les grumes, les bois sciés, les placages et les contreplaqués;
- #7 sert à désigner les grumes, les copeaux et les matériaux déchiquetés non transformés;
- #8 sert à désigner toutes les parties et tous les produits, sauf:
  - a) les graines et le pollen (y compris les pollinies);
  - b) les cultures de plantules ou de tissus obtenues *in vitro* en milieu solide ou liquide et transportées en conteneurs stériles;
  - c) les fleurs coupées des plantes reproduites artificiellement; et
  - d) les fruits, et leurs parties et produits, du genre *Vanilla* reproduites artificiellement;
- #9 sert à désigner toutes les parties et tous les produits sauf ceux portant le label 'Produced from Hoodia spp. material obtained through controlled harvesting and production in collaboration with the CITES Management Authorities of Botswana/Namibia/South Africa under agreement no. BW/NA/ZA xxxxxx' (Produit issu de matériels d'*Hoodia* spp. obtenus par prélèvement et production contrôlés, en collaboration avec les organes de gestion CITES de l'Afrique du Sud, du Botswana ou de la Namibie selon l'accord no BW/NA/ZA xxxxxx); et
- #10 sert à désigner toutes les parties et tous les produits, sauf:
  - a) les graines et le pollen; et
  - b) les produits pharmaceutiques finis.

## **Remarques supplémentaires**

La Conférence des Parties a ajouté des conditions pour l'inscription de certains taxons aux annexes. Ces conditions sont indiquées, lorsque c'est possible, dans une note au bas de la page pertinente, ou alors seulement dans une note en fin de texte lorsque leur longueur ne permet pas cette présentation. Les notes sont toutes reprises ci-dessous.

### **Faune**

<sup>1</sup> *Acinonyx jubatus* Quotas d'exportation annuels pour les spécimens vivants et les trophées de chasse: Botswana: 5; Namibie: 150; Zimbabwe: 50. Le commerce de ces spécimens est soumis aux dispositions de l'Article III de la Convention.

<sup>2</sup> *Ceratotherium simum simum* A seule fin de permettre le commerce international d'animaux vivants vers des destinataires appropriés et acceptables, et de trophées de chasse. Tous les autres spécimens sont considérés comme des spécimens d'espèces inscrites à l'Annexe I et leur commerce est réglementé en conséquence.

<sup>3</sup> *Cetacea spp.* Un quota d'exportation annuel zéro a été établi pour les spécimens vivants de la population de *Tursiops truncatus* de la mer Noire prélevés dans la nature pour des transactions principalement commerciales.

<sup>4</sup> *Chaetophractus nationi* Un quota d'exportation annuel zéro a été établi. Tous les spécimens sont considérés comme des spécimens d'espèces de l'Annexe I et leur commerce est réglementé en conséquence.

<sup>5</sup> *Crocodylus niloticus* Sauf les populations des pays suivants: Afrique du Sud, Botswana, Ethiopie, Kenya, Madagascar, Malawi, Mozambique, Namibie, Ouganda et République-Unie de Tanzanie (soumise à un quota d'exportation annuel de pas plus de 1600 spécimens sauvages, y compris les trophées de chasse, en plus des spécimens de ranchs), Zambie et Zimbabwe, qui sont inscrites à l'Annexe II.

<sup>6</sup> *Felidae spp.* Les spécimens de la forme domestiquée ne sont pas soumis aux dispositions de la Convention.

<sup>7</sup> *Geochelone sulcata* Un quota d'exportation annuel zéro a été établi pour *Geochelone sulcata* pour les spécimens prélevés dans la nature pour des transactions principalement commerciales.

<sup>8</sup> *Helioporidae spp.*, *Milleporidae spp.*, *Scleractinia spp.* *Styelidae spp.* *Tubiporidae spp.* Les fossiles ne sont pas soumis aux dispositions de la Convention.

<sup>9</sup> *Loxodonta africana*

**Populations de l'Afrique du Sud, du Botswana et de la Namibie (inscrites à l'Annexe II):**

A seule fin de permettre:

- 1) les transactions non commerciales portant sur des trophées de chasse;
- 2) le commerce d'animaux vivants pour des programmes de conservation *in situ*;
- 3) le commerce des peaux;
- 4) les transactions portant sur des articles en cuir: commerciales ou non commerciales (Afrique du Sud et Namibie); et non commerciales (Botswana);
- 5) les transactions commerciales ou non commerciales portant sur les poils (Namibie);
- 6) les transactions non commerciales portant sur des ékipas marqués et certifiés individuellement, et sertis dans des bijoux finis (Namibie); et
- 7) le commerce de l'ivoire brut enregistré (Afrique du Sud: défenses entières et morceaux d'ivoire coupés qui, à la fois, mesurent au moins 20 cm et pèsent au moins 1 kg; Botswana et Namibie: défenses entières et morceaux) aux conditions suivantes:
  - i) uniquement les stocks enregistrés appartenant au gouvernement et originaires de l'Etat concerné (à l'exclusion de l'ivoire saisi et de l'ivoire d'origine inconnue) et, dans le cas de l'Afrique du Sud, uniquement l'ivoire provenant du parc national Kruger;
  - ii) uniquement à destination de partenaires commerciaux dont le Secrétariat aura vérifié, en consultation avec le Comité permanent, qu'ils disposent d'une législation nationale et de mesures de contrôle du commerce intérieur suffisantes pour garantir que l'ivoire importé ne sera pas réexporté et qu'il sera géré en respectant toutes les obligations découlant de la résolution Conf. 10.10 (Rev. CoP12) concernant la

fabrication et le commerce intérieurs;

- iii) pas avant que le Secrétariat ait vérifié les pays d'importation candidats et que MIKE ait communiqué au Secrétariat des informations de base (effectifs des populations d'éléphants, fréquence du braconnage, etc.);
  - iv) des quantités maximales de 30.000 kg (Afrique du Sud), 20.000 kg (Botswana) et 10.000 kg (Namibie) d'ivoire pourront être commercialisées et expédiées en un seul envoi sous la stricte supervision du Secrétariat;
  - v) le produit de la vente ira exclusivement à la conservation des éléphants et à des programmes de conservation et de développement des communautés dans les limites des zones à éléphants ou à proximité; et
  - vi) seulement quand le Comité permanent aura décidé que les conditions susmentionnées sont remplies.
- Sur proposition du Secrétariat, le Comité permanent peut décider de l'arrêt total ou partiel de ce commerce si les pays d'exportation ou d'importation ne respectent pas les conditions énoncées, ou s'il est prouvé que le commerce a des effets préjudiciables sur les autres populations d'éléphants.

Tous les autres spécimens sont considérés comme des spécimens d'espèces inscrites à l'Annexe I et leur commerce est réglementé en conséquence.

#### **Population du Zimbabwe (inscrite à l'Annexe II):**

A seule fin de permettre:

- 1) l'exportation de trophées de chasse à des fins non commerciales;
- 2) l'exportation d'animaux vivants vers des destinataires appropriés et acceptables;
- 3) l'exportation de peaux; et
- 4) l'exportation d'articles en cuir et de sculptures en ivoire à des fins non commerciales.

Tous les autres spécimens sont considérés comme des spécimens d'espèces inscrites à l'Annexe I et leur commerce est réglementé en conséquence. Pour garantir que a) les destinataires des animaux vivants sont appropriés et acceptables et/ou que, b), l'importation est faite à des fins non commerciales, l'organe de gestion ne délivrera pas de permis d'exportation ni de certificat de réexportation sans avoir reçu de l'organe de gestion du pays d'importation un certificat attestant que: dans le cas a), par analogie avec l'Article III, paragraphe 3 (b), de la Convention, l'autorité scientifique compétente a jugé que le destinataire proposé a les installations adéquates pour conserver et traiter avec soin les animaux; et/ou dans le cas b), par analogie avec l'Article III, paragraphe 3 (c), l'organe de gestion a la preuve que les spécimens ne seront pas utilisés à des fins principalement commerciales.

<sup>10</sup> *Manis spp.* Un quota d'exportation annuel zéro a été établi pour *Manis crassicaudata*, *M. javanica* et *M. pentadactyla* pour les spécimens prélevés dans la nature pour des transactions principalement commerciales.

<sup>11</sup> *Melanosuchus niger* Soumise à un quota d'exportation annuel zéro jusqu'à ce qu'un quota d'exportation annuel ait été approuvé par le Secrétariat CITES et le Groupe UICN/CSE de spécialistes des crocodiles.

<sup>12</sup> *Vicugna vicugna*

**Population de l'Argentine (inscrite à l'Annexe II):** A seule fin de permettre le commerce international de la laine obtenue par la tonte de vigognes vivantes, des tissus, et des produits qui en dérivent et autres articles artisanaux. L'envers des tissus doit porter le logo adopté par les Etats de l'aire de répartition de l'espèce, signataires du *Convenio para la Conservación y Manejo de la Vicuña*, et les lisières les mots "VICUÑA-ARGENTINA". Les autres produits doivent porter une étiquette incluant le logo et les mots "VICUÑA-ARGENTINA-ARTESANÍA". Tous les autres spécimens sont considérés comme des spécimens d'espèces inscrites à l'Annexe I et leur commerce est réglementé en conséquence.

**Population de la Bolivie (inscrite à l'Annexe II):** A seule fin de permettre le commerce international: a) de la laine obtenue par la tonte de vigognes vivantes et des produits qui en dérivent, provenant des populations des unités de conservation de Mauri-Desaguadero, Ulla Ulla et Lípez-Chichas; et b) des produits faits à partir de la laine obtenue par la tonte de vigognes vivantes du reste de la population bolivienne. La laine doit porter le logo adopté par les Etats de l'aire de répartition de l'espèce, signataires du *Convenio para la Conservación y Manejo de la Vicuña*, et les lisières les mots "VICUÑA-BOLIVIA". Les autres produits doivent porter une étiquette incluant le logo et les mots "VICUÑA-BOLIVIA-ARTESANÍA". Tous les autres spécimens sont considérés comme des spécimens d'espèces inscrites à l'Annexe I et leur commerce est réglementé en conséquence.

**Population du Chili (inscrite à l'Annexe II):** A seule fin de permettre le commerce international de la laine obtenue par la tonte de vigognes vivantes, ainsi que des tissus et des articles qui en dérivent, y compris les articles artisanaux de luxe et les articles tricotés. L'envers des tissus doit porter le logo adopté par les Etats de l'aire de répartition de l'espèce, signataires du *Convenio para la Conservación y Manejo de la Vicuña*, et les lisières les mots "VICUÑA-CHILE". Les autres produits doivent porter une étiquette incluant le logo et les mots "VICUÑA-CHILE-ARTESANÍA". Tous les autres spécimens sont considérés comme des spécimens d'espèces inscrites à l'Annexe I et leur commerce est réglementé en conséquence.

**Population du Pérou (inscrite à l'Annexe II):** A seule fin de permettre le commerce international de la laine obtenue par la tonte de vigognes vivantes et du stock de 3249 kg de laine qui existait au Pérou au moment de la neuvième session de la Conférence des Parties (novembre 1994), ainsi que des tissus et des articles qui en dérivent, y compris les articles artisanaux de luxe et les articles tricotés. L'envers des tissus doit porter le logo adopté par les Etats de l'aire de répartition de l'espèce, signataires du *Convenio para la Conservación y Manejo de la Vicuña*, et les lisières les mots "VICUÑA-PERÚ". Les autres produits doivent porter une étiquette incluant le logo et les mots "VICUÑA-PERÚ-ARTESANÍA". Tous les autres spécimens sont considérés comme des spécimens d'espèces inscrites à l'Annexe I et leur commerce est réglementé en conséquence.

## Flore

<sup>13</sup> *Cactaceae* spp. Les spécimens reproduits artificiellement des hybrides et/ou cultivars suivants ne sont pas soumis aux dispositions de la Convention: *Hatiora x graeseri*; *Schlumbergera x buckleyi*; *S. russelliana x S. truncata*; *S. orssichiana x S. truncata*; *S. opuntioides x S. truncata*; *S. truncata* (cultivars); *Cactaceae* spp. (cultivars) formes mutants dépourvus de chlorophylle, greffés sur les porte-greffe suivants; *Harrisia 'Jusbertii'/Hylocereus trigonus ou H. undatus; Opuntia microdasys* (cultivars).

<sup>14</sup> *Cyclamen* spp. Les spécimens reproduits artificiellement des cultivars de *Cyclamen persicum* ne sont pas soumis aux dispositions de la Convention. Cette dérogation ne s'applique pas aux spécimens commercialisés sous forme de tubercules dormants.

<sup>15</sup> *Orchidaceae* spp. Les spécimens reproduits artificiellement d'hybrides des genres *Cymbidium*, *Dendrobium*, *Phalaenopsis* et *Vanda* ne sont pas soumis aux dispositions de la Convention lorsque:

- 1) les spécimens sont commercialisés dans des envois composés de conteneurs individuels (cartons, boîtes ou caisses) contenant chacun 20 plants ou plus du même hybride;
- 2) les plants dans chaque conteneur sont facilement reconnaissables comme étant des spécimens reproduits artificiellement de par leur grande uniformité et leur bon état de santé; et
- 3) les envois sont assortis de documents, comme une facture, indiquant clairement le nombre de plants de chaque hybride.

Les spécimens reproduits artificiellement des hybrides suivants:

- *Cymbidium*: hybrides interspécifiques à l'intérieur du genre et hybrides intergénériques
  - *Dendrobium*: hybrides interspécifiques à l'intérieur du genre connu en horticulture comme "types nobile" et "types phalaenopsis"
  - *Phalaenopsis*: hybrides interspécifiques à l'intérieur du genre et hybrides intergénériques
  - *Vanda*: hybrides interspécifiques à l'intérieur du genre et hybrides intergénériques
- ne sont pas soumis aux dispositions de la Convention lorsque:

- 1) ils sont commercialisés en fleur, c'est-à-dire avec au moins une fleur ouverte par spécimen, avec des pétales recourbés;
- 2) ils sont traités professionnellement pour le commerce de détail, en étant présentés par exemple sous emballage imprimé ou munis d'une étiquette imprimée;
- 3) ils sont facilement reconnaissables comme étant des spécimens reproduits artificiellement de par leur grande propreté, leurs inflorescences non endommagées, un système racinaire intact et une absence générale de dégâts ou blessures propres aux plants d'origine sauvage;
- 4) les plants ne présentent pas les caractéristiques d'une origine sauvage, telles que des dégâts causés par des insectes ou d'autres animaux, des champignons ou des algues adhérant aux feuilles, ou des dégâts mécaniques aux inflorescences, racines, feuilles ou autres parties, résultant du prélèvement; et
- 5) les étiquettes ou les emballages indiquent le nom commercial du spécimen, le pays où il a été reproduit artificiellement ou, dans le cas de commerce international durant la production, le pays où le spécimen a été étiqueté et emballé; et les étiquettes ou les emballages présentent une photo de la fleur, ou

prouvent autrement, de manière facilement vérifiable, une utilisation appropriée des étiquettes et des emballages. Les plants qui, à l'évidence, ne remplissent pas les conditions requises pour bénéficier de la dérogation doivent être assortis des documents CITES appropriés.

<sup>16</sup> *Dicksonia* spp. Seulement la population d'Amérique.

<sup>17</sup> *Euphorbia* spp. Les spécimens reproduits artificiellement de cultivars d'*Euphorbia trigona*, les spécimens reproduits artificiellement de mutants colorés, en branche à crête ou en éventail d'*Euphorbia lactea* greffés sur des porte-greffes reproduits artificiellement d'*Euphorbia neriifolia*, ainsi que les spécimens reproduits artificiellement de cultivars d'*Euphorbia* "Milii" lorsqu'ils sont commercialisés en envois de 100 plants ou plus et facilement reconnaissables comme étant des spécimens reproduits artificiellement ne sont pas soumis aux dispositions de la Convention.

<sup>18</sup> *Panax ginseng* Seulement la population de la Fédération de Russie.

<sup>19</sup> *Swietenia macrophylla* Populations néotropicales.

<sup>20</sup> *Taxus chinensis*, *T. cuspidata*, *T. fuana*, *T. sumatrana*, *T. wallichiana* Les plants complets en pot ou autres conteneurs de petite taille et reproduits artificiellement, dont chaque envoi est accompagné d'une étiquette ou d'un document indiquant le nom du ou des taxons et la mention "reproduit artificiellement", ne sont pas soumis aux dispositions de la Convention.

Eggli, U. ed. 2001. *CITES Aloe and Pachypodium Checklist*. Royal Botanic Gardens, Kew. [for/para/pour *Aloe* & *Pachypodium*]

Farjon, A. 2001. *World Checklist and Bibliography of Conifers*. Second edition. Royal Botanic Gardens, Kew. [for/para/pour *Taxus*]

Hunt, D. 1999. *CITES Cactaceae Checklist*. Second edition. Royal Botanic Gardens, Kew. [for/para/pour Cactaceae]

Roberts, J. A., Anuku, S., Burdon, J., Mathew, P., McGough, H. N. and Newman, A. 2001. *CITES Orchid Checklist*. Volume 3. Royal Botanic Gardens, Kew. [for/para/pour *Aerangis*, *Angraecum*, *Ascocentrum*, *Bletilla*, *Brassavola*, *Calanthe*, *Catasetum*, *Miltonia*, *Miltonioides*, *Miltoniopsis*, *Renanthera*, *Renantherella*, *Rhynchostylis*, *Rossioglossum*, *Vanda*, & *Vandopsis*]

Roberts, J. A., Beale, C. R., Benseler, J. C., McGough, H. N. and Zappi, D. C. 1995. *CITES Orchid Checklist*. Volume 1. Royal Botanic Gardens, Kew. [for/para/pour *Cattleya*, *Cypripedium*, *Laelia*, *Paphiopedilum*, *Phalaenopsis*, *Phragmipedium*, *Pleione*, & *Sophronitis*]

Roberts, J. A., Allman, L. R., Beale, C. R., Butter, R. W., Crook, K. R. and McGough, H. N. 1997. *CITES Orchid Checklist*. Volume 2. Royal Botanic Gardens, Kew. [for/para/pour *Cymbidium*, *Dendrobium* (selected sections only/únicamente las partes seleccionadas/uniquement les parties sélectionnées), *Disa*, *Dracula*, & *Encyclia*]

Stevenson, D. W., Osborne, R. and Hill, K. D. 1995. A world list of cycads. Pp. 55-64 in P. Vorster (ed.) *Proceedings of the Third International Conference on Cycad Biology*. Cycad Society of South Africa. [for/para/pour Cycadaceae, Stangeriaceae & Zamiaceae]

This publication represents an essential tool in the implementation of the Convention. It provides the list of CITES species, their scientific synonyms, their English, French and Spanish common names, and an indication of the Appendix in which they are included. The enclosed CD-ROM also includes a section that provides the original listing date of all taxa and populations specifically named in the current or past Appendices. It indicates all reservations ever made by Parties, when these entered into force and, for past reservations, when they were withdrawn.

Esta publicación constituye un instrumento esencial para aplicar la Convención. Ofrece la lista de las especies CITES, sus sinónimos científicos, sus nombres comunes en español, inglés y francés, y el Apéndice en que están incluidas. El CD-ROM adjunto contiene una sección en la que se indica la fecha de inclusión original de todos los taxa y las poblaciones citadas específicamente en los Apéndices vigentes y pasados. Se indican también las reservas formuladas por las Partes, con las fechas de entrada en vigor y, en el caso de reservas pasadas, las fechas en que se retiraron.

La présente publication est un outil indispensable pour bien appliquer la Convention. Elle inclut la liste des espèces CITES avec indication de l'annexe à laquelle elles sont insérées, leurs synonymes scientifiques, et leurs noms communs en français, en anglais et en espagnol. Dans le CD-ROM qui l'accompagne, l'utilisateur trouvera la date de première inscription de tous les taxa et des populations spécifiées dans les annexes actuelles ou passées, ainsi que toutes les réserves jamais formulées par les Parties avec leur date d'entrée en vigueur et, dans le cas des réserves passées, leur date de retrait.
