Policies of it member states in the
Southeast Pacific

Regional Seas Program (UNEP)

1981: LIMA CONVENTION

Panamá - Colombia - Ecuador - Perú - Chile

CPPS role in the Regular Process

- March 2011: States gave CPPS a mandate to coordinate participation of SEP in the RP
- April 2011: CPPS Organized a working group of 2 contact points per state (political/technical)
- Working Group reviewed the RP documents and recommended CPPS to organize a Workshop in the SEP within the framework of RP
- CPPS prepared documentation according to Guidelines for Workshops to assist the RP
 - Appendix 1: Information to be provided by participants in advance of the workshop

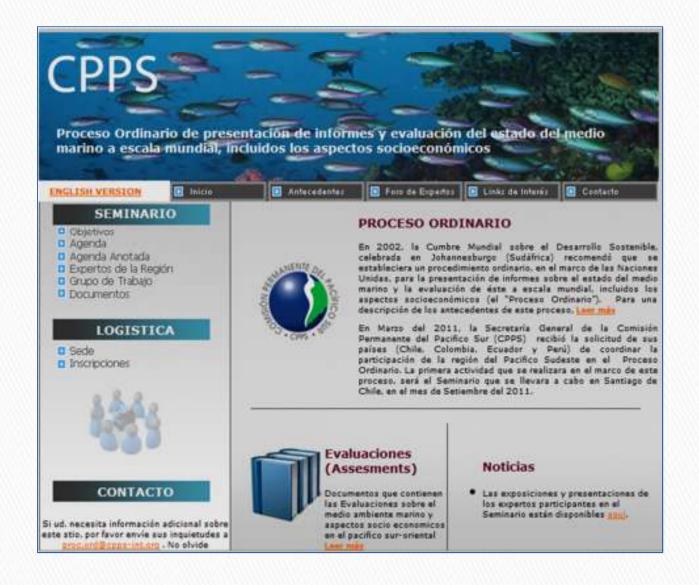

CPPS role in the Regular Process

- CPPS and member states coordinated actions with its NY delegations at UUNN.
- > At Ad-Hoc Working Group of the Whole meeting, (27-28 June 2011) all 5 states of SEP proposed to organize the first Workshop from the RP.
- > A Declaration was presented to the meeting, asking CPPS to coordinate such Workshop.
- > UNEP offered technical and financial support
- July-Sept: CPPS coordinated with UNEP and the GOERP via telecom the organization of the Workshop (Chile as host country)

CPPS: Under Guidelines for Workshop

- Selected a Group of Experts from the Region
- Coordinated w/DOALOS all aspects of the Workshop (via Chile as host country)
- Prepared documentation for Workshop
 - Assessments carried out in the Region
 - Prioritization of the Outline of 1st Global integrated Assessment.
- Created a Web page for the Workshop

Web page for the Workshop

Identified and catalogued available assessments in the region

1st Workshop (RP) Santiago de Chile (13th- 15th September 2011)

Participants of the Workshop (52)

- 25 experts from the region's 5 states
- 3 experts from the GOERP
- 5 experts from NEP
- 5 participants of states out of SP region
- UNEP/DOALOS/IOC
- Observers (FAO/WWF/TNC/Humboldt LME/
- 6 participants of CPPS

Outline of the Workshop

- Session day 1
 - Presentations by GOERP (objectives, expected output)
 - Outline/criteria for Integrated Assessments/
- Session day 2 (3 working groups)
 - Physical Sciences
 - Biological Sciences
 - Socioeconomic Aspects
- Session day 3
 - General discussions/Results and Conclusions

Results of discussions from the Workshop

- States recognized the importance of RP and will seek the support of governments to carry out all cycles of RP
- Experts identified existence of large amounts of data but not ready to use for an integrated assessment
 - Most of it physical and biological data, very limited socioeconomic data readily available
- Most data is related to areas within coast and the continental platform. Need to expand data collection out of this area into the high seas
- There is an urgent need of capacity building in integrated assessment

Results of discussions from the Workshop

- There is expertise in the region to tackle the challenges of the RP, with the help of the GOERP and experts from other regions
- There is a need to reinforce the technical capacities of experts from the region on issues related to the RP
- Experts are committed to make available all relevant information for the RP, and CPPS will make it accessible for all cycles the Process.

Conclusions of the Workshop

- There is an urgent need to tackle the timetable of the RP and select a pool of experts for RP asap.
- Strong lobbying will be necessary to seek outside funds for the RP from sources other that states, UNEP and CPPS.
- A mechanism for communication and coordination will be necessary within the region for a follow up of the implementation of the RP

Conclusions of the Workshop

- All data identified as relevant for the RP, should be further analyzed and verified by experts from the region when available for the RP
- Need to promote a coordination mechanism between the SEP and the SWP to carry out assessments in the high seas areas of the SP
- Importance of carrying out Technical Workshops to promote horizontal cooperation within the region for training of local experts
