

**World Federation of Engineering Organizations comments( submitted on 17/08/2017):**

"One suggestion would be to add a new section 3.2.5 Transform Engineering Practice and move Cooperation and partnerships to 3.2.6.

**3.2.5 Transform Engineering Practice.**

Engineering, technology, science, and innovation are expected to play a pivotal role in achieving the social UN Sustainable Development Goals - improving human well being for all - while minimizing impacts on the environment. This requires a transformation of engineering practice which starts with transforming the way engineers are educated; all engineers should have the knowledge and skills needed to promote sustainable development (SDG 4). The World Federation of Engineers Organization (WFEO) Code of Practice for Sustainable Development then provides a framework for applying that knowledge in practice. "
