

Regional Multi-stakeholder consultations for Europe in preparation for the 2019 UN Environment Assembly

September 3 – 4, 2018, Tallinn, Estonia

Location: Park Inn by Radisson Meriton Conference & Spa Hotel Tallinn

27 Toompuiestee 4, Paldiski maantee, 10149 Tallinn

Background

The fourth session of the [UN Environment Assembly \(UNEA4\)](#) will be held in Nairobi from 11 - 15 March 2019. The Assembly is expected to deliberate on [“Innovative solutions for environmental challenges and sustainable consumption and production”](#). The Global Major Groups and Stakeholders Forum (GMGSF), a meeting of civil society organizations to prepare for the Assembly, will take place prior to the Assembly (date tbc).

The multi-stakeholder preparations and engagement in the Assembly is based on:

- (1) The need to reinforce the visibility and impact of the UN Environment Assembly in the context of the follow-up of the 2030 Agenda for Sustainable Development at the global and regional levels (including the High Level Political Forum and the Regional Forums on Sustainable Development convened by the UN Regional Commissions);
- (2) The mandate set out in the [Rio + 20 Conference in 2012](#), where governments highlighted that the engagement of civil society in the UN Environment Assembly and its decision-making process is an important factor that will ensure relevance and success of the new global assembly. [1]
- (3) The need to give a space to stakeholders, in particular from civil society, to build early consensus on strategic and structural issues in view of the fourth session of the Assembly, so that regional inputs can be fed into the preparatory process of the Assembly;

In order to make the fourth session of the Assembly a success, a proper preparation at the regional, sub-regional and national level, as well as participation of stakeholders in the Assembly itself is of key importance.

1. Participants and target audience

The regional consultation will bring together [Major Groups and Stakeholders \(MGS\) accredited to UN Environment, non-accredited regional MGS partners](#), UN Environment staff, and resource people on Environment Assembly's theme.

2. Purpose and Objectives of the Meeting

The scope of the 2-day consultation is to exchange and discuss latest development in UN Environment, including UN Environment's efforts on delivering the environmental dimension of the 2030 agenda and preparation for the 2019 Environment Assembly.

2.1. Getting and understanding about the latest developments at UN Environment, including:

- Stakeholder Engagement at UN Environment
- Implementation of the outcomes of the 2017 Assembly/[Action Plan to “Beat Pollution”](#)
- Criteria on engaging with the private sector
- Updates on other areas of UNEP’s work (e.g. [SDGs](#) and indicators work, [GEO-6 regional reports](#) towards Global report, [Environment Live](#), [Global Pact for the Environment](#) and other tools available to all stakeholders, trainings and other education materials, [environmental right defenders](#)).

2.2. On the road to the 2019 UN Environment Assembly

- Generating stakeholder inputs on the theme of the 2019 Assembly including the Executive Director’s thematic report on the theme of the Assembly and possible resolutions
- Encourage stakeholders to discuss policy proposals and ideas to upgrade good practices of successful multi stakeholder partnerships. To identify innovative solutions that address sustainable consumption and production, and other environmental challenges

3. Expected Outcome

The meeting will result into:

- A regional Civil Society Statement for the 2019 Assembly which should be finalized by the time of the Assembly latest to be included in the INF doc for the Assembly. If it is not possible to reach a consensus among various groups, also several statements are possible. The Civil Society Unit in UN Environment will ensure that the information is shared with member states, i.e. by the preparation of an Information Document that contains all regional statements.
- Assignment of lead coordinators from Major Groups, besides the outgoing and incoming Regional Representatives that take responsibility for different aspects of Major Groups and Stakeholders engagement in the 2017 assembly.
- Input to the Executive Director’s report on “Innovative solutions for environmental challenges and sustainable consumption and production”
- New partnerships that address the theme of the 2019 Assembly
- Update stakeholders on sub-regional activities connected to the implementation of SDGs, as well as, discussion on potential joint initiatives.
