NOTE

This document is not an official publication but a compilation of information about the Caribbean marine environment intended to facilitate communications between centres cooperating in the framework of UNEP Regional Seas Action Plans as well as to improve awareness of regional marine environmental activities and of documents related thereto.

The designations employed and the presentation of the material in this document do not imply expression of opinion whatsoever on the part of UNEP concerning the legal status of any State, Territory, City, or Area or of its authorities, or concerning the delimitations of its frontiers or boundaries.

AVERTISSEMENT

Le présent document n'est pas une publication officielle; il rassemble des informations sur le milieu marin des Caraïbes, afin de faciliter la communication entre les centres qui coopèrent aux plans d'action du PNUE pour les mers régionales, et de mieux faire connaître les activités régionales sur le milieu marin et les documents qui s'y rapportent.

Les appellations employées dans le présent document et la présentation des données qui y figurent n'impliquent de la part du Programme des Nations Unies pour l'environnement (PNUE) aucune prise de position quant au statut juridique des Etats, territoires, villes ou zones, ou de leurs autorités, ni quant au tracé de leurs frontières ou limites.

NOTA

Este documento no es una publicación oficial, sino una compilación de información sobre el medio ambiente marino del Caribe, que tiene por objeto facilitar las comunicaciones entre los centros que cooperan en el marco de los planes de acción del PNUMA para los mares regionales, y dar a conocer las actividades regionales con el medio ambiente marino y los documentos pertinentes.

Las denominaciones empleadas en este documento y la forma en que aparecen presentados los datos que contiene no implican, de parte del Programa de las Naciones Unidas para el Medio Ambiente (PNUMA), juicio alguno sobre la condición jurídica de estados, territorios, ciudades o zonas, o de sus autoridades, ni respecto de la limitación de sus fronteras o límites.

UNEP/FAO. 1988. Bibliography of the marine environment: Caribbean. UNEP Regional Seas Directories and Bibliographies. Rome, FAO. 297 p. (Trilingual)

As part of the continued effort of the United Nations Environment Programme (UNEP) to provide technical information which may contribute to the protection of the marine environment and in cooperation with the Food and Agriculture Organization (FAO), global, regional, and specialized directories of marine environmental institutions and bibliographies of the marine environment are being systematically prepared.

This bibliography was compiled exclusively from the Aquatic Sciences and Fisheries Abstracts (ASFA) bibliographic database using selection criteria based on the subject classification (see following pages) for the years 1978–1986. The classification of entries was performed by the Food and Agriculture Organization (FAO) who was responsible for the actual publishing under UNEP project FP/5102–84–06. The bibliography is a contribution from UNEP to the development of the Action Plan for the Caribbean Environment.

Each bibliographic reference has been assigned an accession number which is printed together with the publication year, the title of the publication in its original language (with a translation of the title, if necessary, into English), the author(s), the first author address (subsequent author addresses are noted with an asterisk), publisher and publication details, and a list of the applicable subject classifications. Since the citations were compiled from a computerized database, there are no accents or other diacritical marks and additional peculiarities of database input continue to be included.

The subject classification list follows the Preface. Each publication or article appears in the following classified listing under every subject to which it was considered directly relevant. Thus, articles which contain references to topics in a number of classifications will appear in several places in the classified list, each time in accession–number order. The final section is an author index. This shows, for each author, the subject classifications referenced and the accession numbers of the publications relevant to that subject group. This index system is not infallible; citations for crab or fish resources may not be also cross–referenced in the biology section. The entire bibliography should be consulted for complete coverage of any topic.

The bibliography has been prepared with considerable care and attention to detail. However, it may contain errors or omissions and any comments, criticisms, or suggestions for improvements or additions in future editions are welcome. They should be addressed to:

Dans le cadre des efforts que ne cesse de déployer le Programme des Nations Unies pour l'environnement (PNUE) en vue de fournir des informations techniques pouvant contribuer à la protection du milieu marin, et en collaboration avec l'Organisation des Nations Unies pour l'alimentation et l'agriculture (FAO), des annuaires mondiaux, régionaux et spécialisés des institutions concernées, ainsi que des bibliographies sur le milieu marin sont régulièrement préparés.

La présente bibliographie a été élaborée à partir des résumés de sciences aquatiques et halieutiques (ASFA), base de données bibliographiques répertoriées par sujets (voir pages suivantes) pour les années 1978 à 1986. Le classement des entrées a été réalisé par l'Organisation des Nations Unies pour l'alimentation et l'agriculture (FAO), responsable de la publication actuelle dans le cadre du projet PNUE FP/5102-84-06. Ces travaux constituent une contribution du PNUE au Plan d'action pour le programme d'environnement des Caraïbes.

Chaque référence bibliographique est assortie d'un numéro d'accès et comprend: l'année de publication et le titre de l'ouvrage dans sa langue d'origine (avec sa traduction anglaise le cas échéant), le nom de l' (ou des) auteur(s), l'adresse du premier auteur (celles des collaborateurs sont notées par un astérisque), l'éditeur, l'édition, et la liste des domaines couverts. Les informations provenant d'une base de données informatisée, le document ne contient ni accent ni signe diacritique, mais certaines particularités inhérentes à la saisie des données y figurent encore.

La liste des domaines fait suite à la préface. Chaque publication ou article apparaît au chapitre suivant sous tous les domaines directement concernés. Ainsi, les articles couvrant plusieurs sujets apparaîtront à divers endroits, chaque fois dans l'ordre des numéros d'accès. Au dernier chapitre figure un index par auteur. Il indique pour chaque auteur l'ensemble des domaines couverts et les numéros d'accès des publications correspondantes. Le système n'est pas infaillible; des citations ayant trait aux crabes ou aux ressources en poissons, ne comporteront pas nécessairement de renvoi à la rubrique biologie. Il faudra consulter toute la bibliographie pour couvrir entièrement un sujet.

La bibliographie a été préparée en apportant beaucoup de soins et d'attention aux détails; toutefois elle peut comporter des erreurs ou omissions, et toutes observations critiques ou suggestions pour sa mise à jour dans des éditions ultérieures sont bienvenues et doivent être adressées au:

Como parte de esfuerzo continuo del Programa de las Naciones Unidas para el Medio Ambiente (PNUMA) encaminado a facilitar información técnica que contribuya a la protección del medio ambiente marino, en cooperación con la Organización de las Naciones Unidas para la Agricultura y la Alimentación (FAO), se preparan sistemáticamente directorios globales, regionales y especializados sobre instituciones interesadas en el medio ambiente marino y bibliografías relativas al mismo.

Esta bibliografía fue compilada exclusivamente a partir de la base de datos bibliográficos de los Resúmenes sobre las Ciencias Acuáticas y la Pesca (ASFA) utilizando criterios de selección basados en una clasificación por materias (véanse las páginas siguientes) para los años 1978-1986. La clasificación de las entradas fue hecha por la FAO, que es la responsable de la publicación efectiva dentro del proyecto del PNUM FP/5102-84-06. La bibliografía es una aportación del PNUMA al desarrollo del Plan de Acción para el Programa Ambiental del Caribe.

A cada referencia bibliográfica se ha asignado un número de acceso que aparece juntamente con el año de publicación, el título, de la misma en su idioma original (con una traducción del título, si es necesario, al inglés), el autor o los autores, la dirección del primer autor (las direcciones de los siguientes autores aparecen indicadas con un asterisco), la editorial y detalles de la publicación, y una lista de las clasificaciones aplicables por materias. Como se compilaron las citas a partir de una base de datos en ordenador, no hay acentos ni otros signos diacríticos y siguen incluyéndose las peculiaridades adicionales de los insumos de la base de datos.

La lista de clasificación por materias aparece después de este prólogo. Cada publicación o artículo aparece en esta lista clasificada bajo todas las materias para las que se considere directamente pertinente. De esta forma, los artículos que contienen referencias a temas que figuran en varias clasificaciones aparecerán en varios lugares en la lista por materias, figurando cada vez por orden del número de acceso. La sección final es un índice de autores en que se indica, con respecto a cada autor, las referencias a la clasificación por materias y los números de acceso de las publicaciones pertinentes a dicho grupo de materias. Este sistema de índices no es infalible: es posible que las citas referentes a recursos de cangrejos o peces no incluyan también referencias cruzadas en la sección de biología. Para tratar exhaustivamente cualquier tema hay que consultar toda la bibliografía.

Se ha preparado esta bibliografía con mucho cuidado y atendiendo a los detalles. Sin embargo, puede contener errores u omisiones, por lo que se agradecerán todos los comentarios, críticas o sugerencias que permitan incluir mejoras o adiciones en futuras ediciones. Las observaciones deberán enviarse a:
