

Options Paper on the Future of the Global Environment Outlook

Briefing to the Committee of Permanent
Representatives, June 20, 2019

Pierre Boileau

Nomination Process

- ... preparation of an options document for the future of the GEO process in broad consultation with Member States, stakeholders and other global environmental assessment processes, focusing on the scope and objectives of the GEO process. The options document process and consultation will be overseen and managed by a Steering Committee to be established under the auspices of UNEA
- The members of the SC may be nominated by Member States and all members of the specialized agencies and will be approved by the CPR
- The deadline for submission of nominations for the various roles is 30th of May 2019.
- available expertise representing a range of disciplines, with geographic and gender balance and a particular emphasis on ensuring full representation from both developing and developed country experts

Types of expertise required

- Significant documented professional experience with international environmental affairs and/or international sustainable development;
- Comprehensive understanding of environmental assessment processes and their role in informing policy makers;
- Extensive expertise with the international policy agenda and assessment work;
- Preferably previous experience with high-level intergovernmental processes in relation to environmental policy and sustainable development

 - 2 from Latin America Group
 - 2 from Eastern European Group
 - 6 from Africa Group
 - 7 from Asia-Pacific Group
 - 8 from Western Europe and other Groups

Illustrative Work Programme of the Steering Committee

Thank you

Producing an assessment of this scale requires many generous contributions. The following organizations provided funding directly or indirectly to the sixth *Global Environment Outlook*: The Government of Norway, the European Union, the Governments of Italy, Singapore, China, Mexico, Switzerland, Denmark, Egypt and Thailand. Together with UN Environment's Environment Fund and Regular Budget, these contributions allowed for the production of GEO-6 and its accompanying Summary for Policymakers, as well as subsequent outreach activities.
