Fourteenth Meeting of SPA/BD Thematic Focal Points

Portorož, Slovenia, 18-21 June 2019

**Agenda Item 8.1: Evaluation of implementation of the SAP BIO during 2004-2018 and orientations for the elaboration of a new post-2020 SAP BIO document**

**Conclusions and recommendations of the consultation process to evaluate the implementation of the SAP BIO (Strategic Action Programme for the Conservation of Biological Diversity in the Mediterranean Region)**

For environmental and economy reasons, this document is printed in a limited number and will not be distributed at the meeting. Delegates are kindly requested to bring their copies to meetings and not to request additional copies.

Note:

The designations employed and the presentation of the material in this document do not imply the expression of any opinion whatsoever on the part of Specially Protected Areas Regional Activity Centre (SPA/RAC) and UN Environment concerning the legal status of any State, Territory, city or area, or of its authorities, or concerning the delimitation of their frontiers or boundaries.

During their sixth meeting, held in Portoroz (Slovenia) on 18 June 2019, the SAP BIO national correspondents and the regional partners represented at the meeting finalized an evaluation of implementation of SAP BIO during the period 2004-2018 and agreed on the following conclusions and recommendations.

1. The SAP BIO, adopted in December 2003, played an important role as a strategic framework for implementation of the SPA/BD Protocol at national and regional levels in terms of harmonization and alignment of planning for biodiversity conservation. It also played a role in facilitating exchanges among departments within and among countries on common concerns in biodiversity conservation.
2. Changes in the context of and the policies on biodiversity during the 15 years since adoption of the SAP BIO indicate that the post-2020 SAP BIO should have new orientations and should focus on priorities tailored to address current and future regional and national challenges in the Mediterranean.
3. While taking into account (as appropriate) the results of the assessment of implementation of SAP BIO during the period 2004-2018, it is crucial to ensure maximum harmonization between the new orientations and priorities to be promoted in the post-2020 SAP BIO and those that will be decided at global level in the post-2020 Biodiversity Framework to be adopted in October 2020 by the CBD. Harmonization should also be ensured between the post-2020 SAP BIO and other relevant global and regional frameworks, such as the 2030 Agenda and the SDGs.
4. The evaluation showed that one difficulty in implementation of SAP BIO during 2004-2018 was related to the complexity of the priorities, activities and NAPs. To facilitate its implementation, the post-2020 SAP BIO, while including high ambitions, should be based on a short list of concrete, realistic priorities and be focused and easy to monitor and evaluate, with well-defined benchmarks.

### **Recommended steps for elaboration of the post-2020 SAP BIO**

#### Step A: Identification of priorities and orientations

5. The post-2020 SAP BIO should be based first on consultations in countries to identify national priorities for the conservation of marine and coastal biodiversity and the actions required. Common guidelines should be defined to ensure harmonization among national consultations and to establish close links with the orientations to be included in the post-2020 biodiversity framework of the CBD and with relevant initiatives at regional level, in particular the EcAp process and its IMAP.
6. The regional consultation to be conducted in step A should be done by a dedicated working group, facilitated by SPA/RAC and with online tools (such as video conferences and common online working platforms) to ensure collaboration and exchange among countries.
7. Based on the results of the consultations to be conducted at national level, SPA/RAC will identify the needed regional supporting activities to include in the regional component of the post-2020 SAP BIO, supported by a first meeting of the Advisory Committee and a first meeting of National Correspondents for the Post-2020 SAP BIO.

8. As step A will take place in parallel with meetings and workshops of the Secretariat of the CBD for elaboration of the post-2020 biodiversity framework, SPA/RAC should identify and participate in the most relevant of those meeting and workshops in order to ensure maximum harmonization between the new SAP BIO and the post-2020 biodiversity framework and to highlight work on the post-2020 agenda in the Mediterranean in a global arena.

Step B: Elaboration of the draft post-2020 SAP BIO

9. A first draft of the new SAP BIO will be prepared by SPA/RAC from the results of step A. It will be submitted for consultation by relevant organizations and the secretariats of relevant regional bodies (such as GFCM, ACCOBAMS, European Commission, IUCN). To this end, a second meeting of the SAP BIO Advisory Committee will be convened by SPA/RAC.
10. Should external funding support become available, technical expertise and expert coordination meetings could be organized to support preparation of key thematic regional documentation and draft marine and coastal NBSAPs in every country.
11. The first draft of the new SAP BIO could be presented to potential donors to indicate the main orientations and priorities and the funding required for implementation of the new SAP BIO.
12. A second meeting of National Correspondents for the post-2020 SAP BIO will be convened to review the first draft and amend it as necessary, with a view to submission for adoption by the Contracting Parties. The meeting should be held after COP15 of the CBD in October 2020, which is expected to adopt the post-2020 biodiversity framework.

Step C: Adoption of the post-2020 SAP BIO

13. The draft post-2020 SAP BIO finalized during the second meeting of National Correspondents for the post-2020 SAP BIO, held under Step B, will be reviewed by the SPA/BD thematic<sup>1</sup> focal points and the MAP focal points and submitted for adoption by the Contracting Parties during COP 22 of the Barcelona Convention.

Tentative calendar

Step A: Identification of priorities and orientations	January 2020 – February 2021
Step B: Elaboration of the draft post-2020 SAP BIO	January 2021 – May 2021
Step C: Adoption of the post-2020 SAP BIO	According to the calendar of meetings of thematic focal points, MAP focal points and Contracting Parties

---

<sup>1</sup>If the Contracting Parties agree to pursue such a thematic approach for future focal points meetings. Otherwise “SPA/BD focal points”
