INTRODUCTION

The rapid emergence of complex sustainable development problems outpaces the ability of any individual country, however rich and determined, to seek solutions to these problems and to explore all the options open to it in isolation. It is for this reason that nations seek to share knowledge and experience pertaining to their common problems and goals.

Infoterra is UNEP's main channel of international environmental information exchange. Infoterra is a decentralized system of Infoterra national focal points designated by the participating governments to co-ordinate all Infoterra activities in their respective countries.

This directory of Infoterra National Focal Points is designed to provide current connect information for the network. It will be updated quarterly.

INTRODUCTION

La rapidité avec laquelle de nouveaux problèmes complexes liés au développement durable se font jour met en échec la capacité des pays, quelques riches et déterminés qu'ils soient, d'y apporter des solutions et d'étudier toutes les possibilités qui leurs sont offertes en faisant cavalier seul. C'est pourquoi les nations cherchent à partager les connaissances et les données d'expérience touchant à des problèmes et objectifs qui leur sont communs.

Infoterra est le principal moyen dont dispose le PNUÉ pour assurer l'échange international de renseignements sur l'environnement. C'est un système décentralisé s'appuyant sur un réseau mondial de points focaux nationaux chargés par les gouvernements participants de coordonner toutes les activités d'Infoterra dans leurs pays respectifs.

Le présent Répertoire des points focaux nationaux d'Infoterra a pour but de fournir les derniers renseignements exacts nécessaires pour le réseau. Il sera mis à jour tous les trois mois.

INTRODUCCION

La rápida aparición de complejos problemas de un desarrollo sostenible supera la capacidad de cualquier país, por rico y decidido que sea, para buscar por sí solo soluciones a esos problemas y estudiar todas las opciones que se le presenten. Por esa razón, las naciones procuran compartir conocimientos y experiencias que guarden relación con sus problemas y objetivos comunes.

INFOTERRA es el medio principal con que cuenta el PNUMA para el intercambio de información ambiental a nivel internacional. INFOTERRA es un sistema descentralizado de centros nacionales de coordinación designados por los gobiernos participantes para coordinar todas las actividades de INFOTERRA en sus respectivos países.

El presente directorio de centros nacionales de coordinación de INFOTERRA tiene por objeto facilitar información actual para establecer contacto con la red. Se actualizará con periodicidad trimestral.

ВВЕДЕНИЕ

Все возрастающий бурный рост числа сложных проблем комплексного и устойчивого развития опережает возможность их решения на уровне отдельно взятых стран, даже если они богаты и целеустремленны, с учетом всех возможных вариантов в этом процессе. В связи с этим все страны желают участвовать в совместном накоплении и использовании знаний и опыта, имеющих общее значение для решения их отдельных проблем и достижения желаемых целей.

ИНФОТЕРРА является основным каналом ЮНЕП для международного обмена информацией. Она работает как децентрализованная система, в которой взаимодействуют выделенные национальные центры, назначаемые правительствами стран - ее членом, с целью координации участия в ИНФОТЕРРА всех заинтересованных организаций в этих странах.

Настоящий регистр Национальных выделенных центров ИНФОТЕРРА предназначен для оперативного установления связей в рамках ее сети. Он обновляется ежеквартально.
