

**Ethiopia's Proposal On Implementation of resolution
UNEP/EA.4/Res.22,**

**H.E. Meles Alem, Permanent Representative of the FDR Ethiopia to United Nations
Environment Program**

Ethiopia welcomes the detailed roadmap towards the realization of the web-based monitoring and follow-up system. Ethiopia underlines the importance of linking the implementation of resolutions with the Sub-Programs of the organization to boost coherence of reporting and ease of follow-up.

Ethiopia wishes to be less theoretical and more practical or action oriented and suggest the following:

- 1.** Per the chairperson's summary of the 6th Annual Sub Committee Meeting, many member States express preference for Option number 2 and Option number 3, therefore, for the sake of moving forward, Ethiopia suggests to eliminate Option 1 and to continue the consultation on Option 2 and 3;
- 2.** Ethiopia believes that the secretariat incorporates the valuable comments provided by Member States during our previous CPR meeting and the 6th Annual Sub-Committee Meeting; therefore, Ethiopia wishes to ask fellow CPR to join us in instructing the Secretariat to enter the development phase and continue to develop the website;

I thank you!
