## GRUPE DE RECHERCHE ET D'ANALYSE APPLIQUÉES POUR LE DÉVELOPPEMENT

### BACKGROUND

"NEERE" in the local language means pretty or clean. As its name suggests, the general objective of this project is to contribute to the emergence of cities sanitized / shareholders based on an integrated and sustainable waste management system. At the end of the project, all households educated and subscribers to the new system in place should practice responsible management of their waste. Furthermore, the project should enable the people to have a more pleasant living environment with the removal of at least 60% of piles of garbage and dumps scattered in the cities concerned. This should contribute significantly to improving the health status of populations when we know that garbage is the proliferation of places of mosquitoes responsible for malaria that cause the death of many children and pregnant women in Burkina Faso where it accounts for almost Half [47.6%] of the reasons for consultation, more than half [59.7%] of the reasons for hospitalization and 46.9% of causes of death [Ministry of Health, 2011].
