My goals in support of who provided his trust in voting for me as well earn the respect of those did not! My goals to bring it to reality at the UN space with the help of all credited organizations is the following: 1/ Climate Change by inducing knowledge based. 2/ Demographic Shift with safety, health and environmental impacts 3/ Urban Sprawl issues that effected the way we live by engaging architects/ engineers and advocates with local city authorities 4/ Digital Technologies inherited as only tool to understand cross thematic issues as well SDGs 5/ Inequality issues are the foundation and the catalyst for change by engaging youth, women and the orderlies leaving no one behind.

Is there anything else you wish to share about yourself or your organization which you think would be helpful for members of the NGO MG to know?:

I like to share that suggested pathways and recommendations, to continue resilience and facts checks Protecting the planet and building resilience... It's nearly impossible and substantially more expensive to keep global warming checked... Without matching a bolstering local action including volunteers to accelerate the implementation. Thank you for voting for me, and your kind support together we get there "the future we want, and the UN we need."
