

MALAYSIA INTERVENTION

ITEM 6

PREPARATION FOR THE FIFTH SESSION OF THE UNITED NATIONS ENVIRONMENT ASSEMBLY

AHEG was mandated to identify potential response options and analyse every angle of those identified options. All the relevant information with regards to these options should be put forward for continuation of work and consideration by UNEA.

Having said that, we recognize that the chair summary should reflect all pertinent issues and interventions in a neutral and balance manner. Hence Malaysia would like to express our support for the revised version of Chair Summary and would also like to thank Mr Chair and your team for the commitment and hard work throughout this process.

Thank you.
