(3 June 2021)**

Presentation of the UNEP Programme Performance Report for 2020

UK Intervention/compliments/questions on UNEPs 2020/21 programme performance review

- **(Resource Efficiency section within UNEP report)** – *“We thank the secretariat for all of the valuable work taken forward under the resource efficiency and Sustainable Production and Consumption agenda, particularly work on “lifecycle” analysis and around a “value chain” approach. These are important and helpful developments, for which the UK is appreciative”.*

- **(Climate Change section within report)** – *“The UK welcomes results on work around Reducing Emissions from Deforestation and Forest Degradation (REDD+) and support UNEP has provided countries to access finance, including results-based finance. We note that results-based finance for REDD+ is referenced in the Paris Agreement. This is an important obligation to deliver upon and something the UK also supports through a substantial International Climate Finance portfolio.”*
