 \*\* Based on percentage increase from previous year's contribution  
 \*\*\* full share as per the Environment Fund Voluntary Indicative Scale of Contributions (VISIC)

The support from the Environment Fund is vital in enabling UNEP's work to promote environmental law and governance. The recently launched Global Climate Litigation Report: 2023 Status Review shows that people are increasingly turning to the courts to combat the climate crisis – demonstrating the importance of environmental rule of law in addressing the triple planetary crisis of climate change, nature and biodiversity loss, and pollution and waste.
