Subject of letter: Application for membership in the UNEP Global Mercury Partnership

Dear Sir/Madam

Johnson Matthey wishes to become an active supporter of the UNEP Global Mercury Partnership and we are committed to promoting and achieving the partnership goals. Protecting people and the planet is a core value for the company, driving the highest standard of health and safety, and seeking to safeguard our planet.

Johnson Matthey is a global leader in mercury removal solutions from natural gas and refinery streams, and actively looking to extend into sustainable feedstocks purification. Our absorbent technology has been applied globally for over three decades, effectively removing mercury to extremely low levels with no risk of release back into the environment. About 20 years ago, Johnson Matthey went a step further and developed a cradle-to-grave service designed to take care of all aspects of operation and absorbent recycling at end of run, preventing mercury contaminated waste being landfilled. Customers utilising JM's service are guaranteed that the waste is retired in an environmentally responsible and permanent manner. We have also extended our precious metal catalysis expertise into the development of alternatives to mercury-based catalysts, in particular for the production of vinyl chloride from coal (an area of focus for UNEP).

We believe that our experience and technical knowledge will bring significant value to the Partnership, especially in the Oil and Gas cross-cutting theme, and we sincerely hope that UNEP will accept Johnson Matthey as a partner. Looking forwards to hearing from you

Best regards

Dr. Ekaterina Novakova
Market Manager Purification

UNEP GLOBAL MERCURY PARTNERSHIP

PARTNERSHIP AREAS

Please check the partnership area(s) to which your organization intends to contribute to:

- Artisanal and small-scale gold mining
- Mercury cell chlor-alkali production
- Mercury air transport and fate research
- Mercury in products
- Mercury releases from coal combustion
- Mercury waste management
- Mercury supply and storage
- Mercury releases from the cement industry

> Please specify in your support letter how your organization intends to contribute to each of the selected partnership area(s).

ORGANIZATION APPLYING TO BECOME A PARTNER

Name of Organization: Johnson Matthey

Type of Organization:

- Government
- Intergovernmental Organization
- Non-governmental Organization
- Industry / private sector
- Academia / scientific institution
- Other, please specify
